

Home – the Gateway to Health

Rory Doyle

Environmental Health Service Manager

Professional Services, Colchester Borough Council

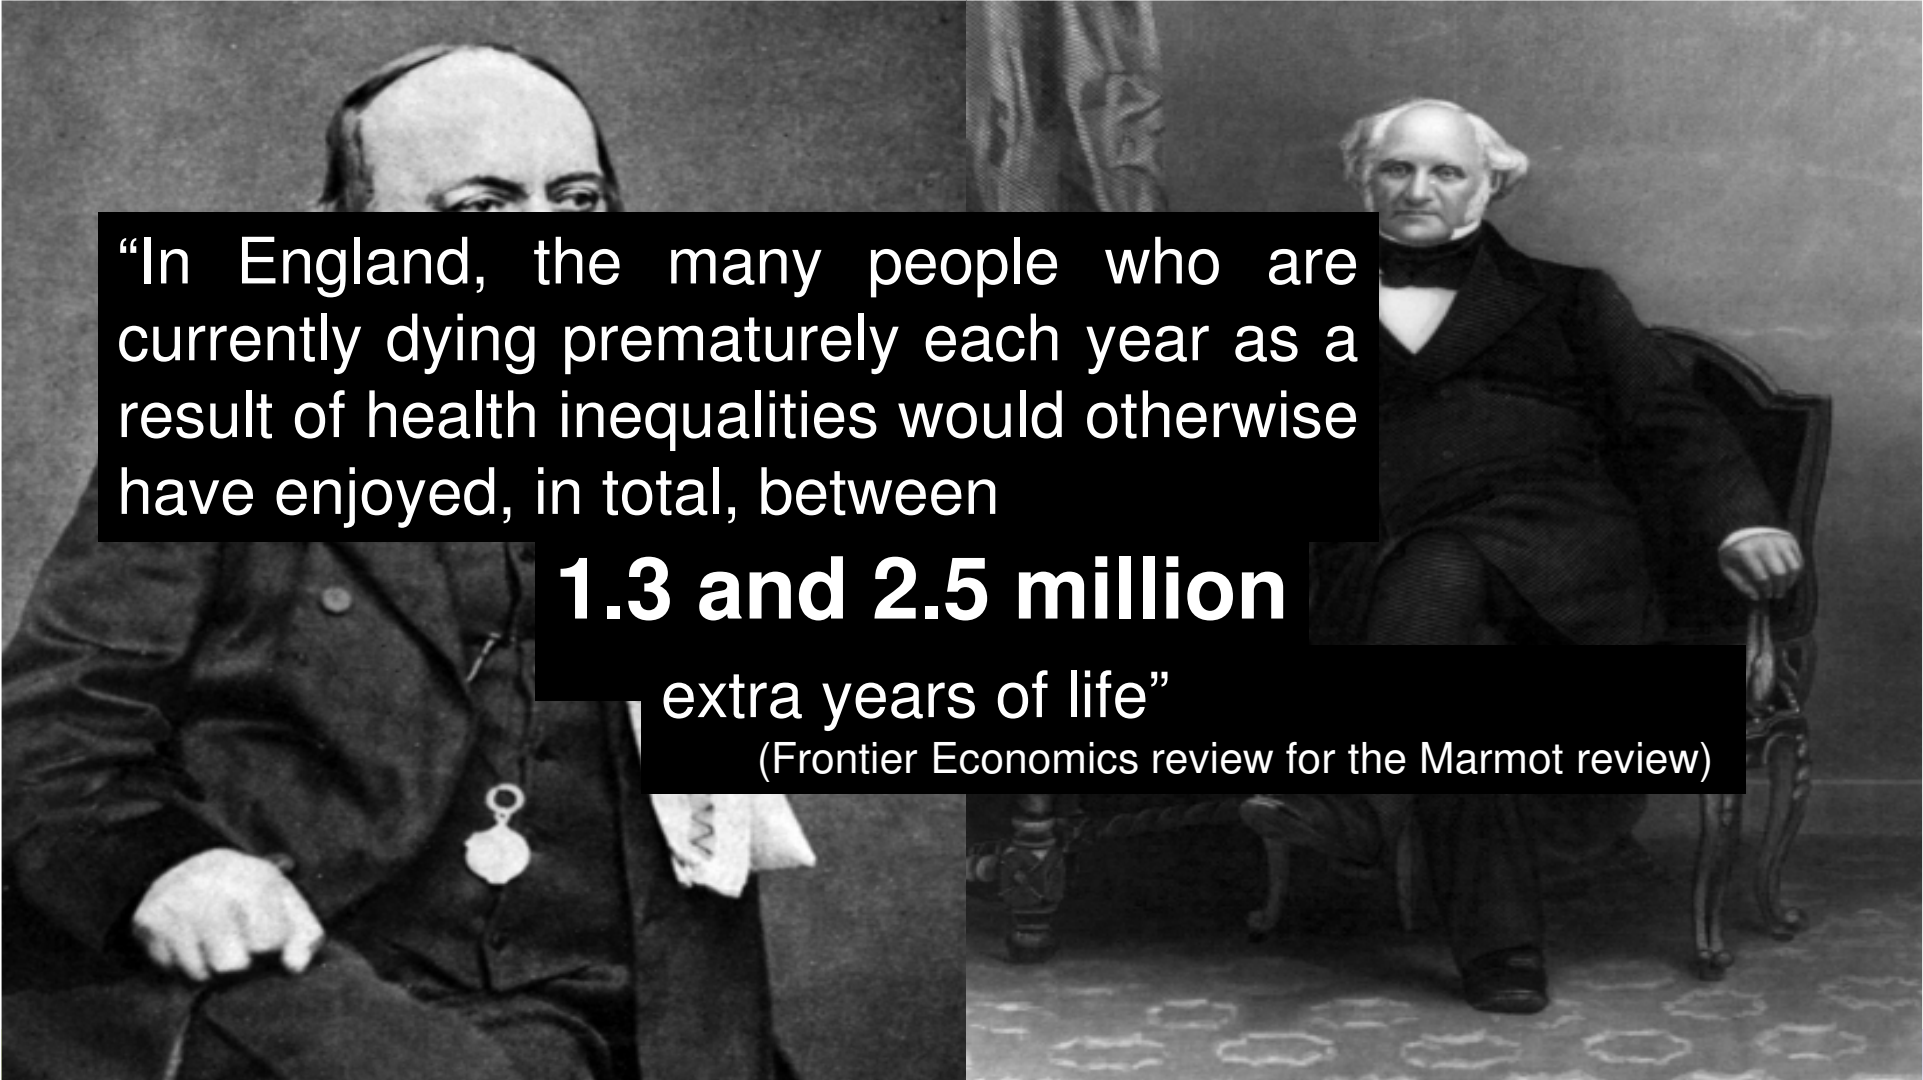

Colchester, the place to *live*, *learn*, *work*, and *visit*.

- Good health and wellbeing is the work of a lifetime, accumulated from birth
- Our home is our 'health setting' for most, if not all, of our life

“In England, the many people who are currently dying prematurely each year as a result of health inequalities would otherwise have enjoyed, in total, between

1.3 and 2.5 million

extra years of life”

(Frontier Economics review for the Marmot review)

Customer Business Culture

The shift in focus within the NHS presents new opportunities to form strategic and productive alliances

Are you involved? Is it working?

- **Shift in health care provision** from the hospital to the home and community
- Without **adopting a collaborative approach**, all sectors will increasingly struggle to effectively manage services in the very near future
- **Focus on prevention** - Identify and support before need becomes urgent
- Increasing need for us all to **take a holistic approach** to mental and physical health support.
- **Mobilise** and make better use of assets
- There is a clear determination to forge better links and **work together in partnership.**
