Sorry, but would also like to add that I still have a number of Newts in my Pond, however they don't want to be still long enough for me to get photos.

Good afternoon

I understand that the 06 April 2021 is the final date for further comments to be made regarding the Colchester Local Plan.

My comments relate to the proposed site at Peldon Road Abberton.

Apart from the items I raised in my initial response I would like to add the following.

As I originally pointed out there are a number of properties (mine included) that have a very poor view when pulling onto Peldon Road from our drive ways. This has been highlighted by a number of near misses caused by the road works that have been in place for the last couple of weeks. More vehicles using the road from the proposed site will only increase the prospect of a serious accident taking place.

I would also like to ask that the impact on the environmental side of the proposed development take into account the damage done to the plot by the owner or his agent(s) by driving a tractor around the site with a large attachment that appeared to do nothing other than destroy the natural habitat that had built up over a number of years. Because of the the local fauna/wildlife will have suffered a significant reduction or possibly destruction just prior to the environmental report being prepared. So please make sure this is taken into account.

Kind Regards

James Bond
