Chapter 1

Introduction

Background

LUC was appointed by Colchester Borough Council (hereafter referred to as CBC) in May 2021 to carry out the Habitat Regulations Assessment (HRA) of the Main Modifications to the Colchester Borough Section 2 Local Plan 2017-2033 (hereafter referred to as the 'Section 2 Local Plan')

1.1 Colchester's emerging Local Plan will replace the adopted Local Plan 2010 to 2021^{1,2}, and will guide future growth and direct new development in the Borough up to 2033. The emerging Local Plan comprises two distinct sections:

- Section 1 of the Local Plan prepared jointly by the North Essex Authorities (i.e., CBC, Tendring District Council, and Braintree District Council) outlines the strategic vision for growth and development in North Essex and forms the first part of each authorities' respective Local Plans.
- Section 2 of the Local Plan provides more detailed policies and site allocations for Colchester Borough only.

1.1 The Publication Draft Local Plan and supporting evidence base, including two accompanying Section 1 and Section 2 HRA Reports, was submitted to the Secretary of State for independent examination in October 2017³.

1.2 Following the Examination hearings for the Section 2 Local Plan in April 2021, CBC prepared a schedule of proposed Main Modifications to the Section 2 Local Plan and the reasoning behind each proposed modification. The Examination process has resulted in the Inspector proposing nearly 100 Main Modifications across the Plan. The Inspector has found that the Main Modifications are essential to ensure that the Section 2 Local Plan can be found sound and then adopted by CBC.

1.3 The purpose of this HRA is to consider whether the proposed Main Modifications are likely to have any new or different effects to those identified in the HRA of the

¹ The adopted Local Plan comprises the Core Strategy (adopted 2008, amended 2014); Site Allocations DPD (2010); Development Policies DPD (adopted 2010, amended 2014); Proposals Maps (2010); Tiptree Jam Factory DPD (2013); and adopted Neighborhood Plans. Available at: <https://www.colchester.gov.uk/local-plan/the-local-plan/>

² Although Neighbourhood Plans currently make up the Adopted Local Plan, these will not be replaced or superseded by the emerging Local Plan.

³ Colchester Borough Council (2017) Publication Draft stage of the Colchester Borough Local Plan 2017-2033 [online] Available at: <https://www.colchester.gov.uk/local-plan/evidence-base-emerging-local-plan-2017-33/>

Publication Draft Section 2 Local Plan and, if so, to carry out HRA of the proposed modifications.

This HRA focusses on the 'Main Modifications' to the Section 2 Local Plan. Additional 'Minor Modifications' have also been prepared to address non-substantive matters such as typographical, factual and grammatical errors. These Minor Modifications are not subject to HRA as they do not have the potential to lead to likely significant effects.

Context for the Colchester Borough Publication Draft Local Plan

1.4 Colchester Borough Council published its Publication Draft Local Plan in June 2017 and submitted it in October 2017. The Local Plan sets out a vision, strategy, objectives and policies for planning and delivery across the Borough. The plan includes two sections, Section 1 is a shared strategic plan prepared with Braintree District Council and Tendring District Council, collectively the North Essex Authorities (NEAs). Section 2 includes policies and allocations specific to Colchester Borough. Taken together, these two sections of the plan combine to provide a strategy and policies for shaping the Borough and meeting and managing the Borough's housing, employment and other land use needs, as well as protecting and conserving the Borough's natural, cultural and historic assets until 2033 and beyond.

1.5 Examination hearing sessions for the Shared Strategic Section 1 Local Plan were held in January and May 2018 and January 2020. In May 2020 the Inspector said in a letter to the NEAs that the Colchester/Braintree Borders and West of Braintree Garden Community proposals were not, in his view, deliverable. Consequently, the NEAs published the Inspector's Main Modifications for consultation, which removed these two garden communities. A separate HRA, which was prepared by LUC, was undertaken for the Section 1 Local Plan. The NEAs, as competent authorities under the Habitat Regulations, concluded that the policies of the Section 1 Plan provide sufficient certainty that the necessary mitigation measures will be implemented in order to ensure that the Section 1 Plan (either alone or in combination with other plans or projects) would not adversely affect the integrity of any Habitats site.

1.6 The Section 1 Local Plan Inspector concluded in his Final Report (December 2020) that subject to the Main

Modifications, the Plan is therefore capable of being adopted in compliance with the Conservation of Habitats and Species Regulations 2017.

Main Modifications

1.7 CBC prepared a Draft Schedule of Recommended Modifications (March 2021) in advance of the hearing sessions which took place in April 2021 and proposed further Modifications during the hearing sessions. Following the Examination hearings, the Inspector prepared a Final Schedule of Main Modifications to the Section 2 Local Plan, which this HRA relates to. The proposed modifications take into account the matters raised by the Inspector as well as participating representors.

Summary of Main Modifications

1.8 The most significant modifications to the Section 2 Local Plan relate to five policies, namely Policy SG1: Colchester's Spatial Strategy; Policy SG8: Neighbourhood Plans; Policy SC2: Middlewick Ranges; Policy SS10: Layer de la Haye; and Policy SS11: Marks Tey. These policies are appraised in detail in **Appendix E** and their implications for this HRA are detailed herein.

The requirement to undertake Habitats Regulations Assessment of Development Plans

1.9 The requirement to undertake HRA of development plans was confirmed by the amendments to the Habitats Regulations published for England and Wales in 2007⁴; the currently applicable version is the Habitats Regulations 2017, as amended⁵. When preparing its Local Plan, Colchester Borough Council is therefore required by law to carry out an HRA. Colchester Borough Council can commission consultants to undertake HRA work on its behalf and this (the work documented in this report) is then reported to and considered by Colchester Borough Council as the 'competent authority'. Colchester Borough Council will consider this work and may only progress the Local Plan if it considers that the Plan will not adversely affect the integrity⁶ of any Habitats site. The requirement for authorities to comply with the Habitats Regulations when preparing a Local Plan is also noted in the Government's online Planning Practice Guidance (PPG).

1.10 HRA refers to the assessment of the potential effects of a development plan on one or more Habitats sites, including

⁴ The Conservation (Natural Habitats, &c.) (Amendment) Regulations 2007 (2007) SI No. 2007/1843.

⁵ The Conservation of Habitats and Species Regulations 2017 (2017) SI No. 2017/1012, as amended by The Conservation of Habitats and Species (Amendment) (EU Exit) Regulations 2019 (SI 2019/579).

⁶ The integrity of a site is the coherence of its ecological structure and function, across its whole area, that enables it to sustain the habitat, complex of habitats and/or the levels of populations of the species for which it was designated. (Source: UK Government [Planning Practice Guidance](#))

Special Protection Areas (SPAs) and Special Areas of Conservation (SACs):

- SACs are designated under the Habitats Regulations as amended and target particular habitat types (specified in Annex 1 to the Habitats Directive) and species (specified in Annex II to the Habitats Directive). These annexes to the Habitats Directive list habitat types and species (excluding birds) considered to be most in need of conservation at a European level. Designation of SACs also has regard to the threats of degradation or destruction to which the sites are exposed and, before EU exit day, to the coherence of the Natura 2000 network of Habitats sites. After EU exit day, regard is had to the importance of such sites for the coherence of the national site network.
- SPAs are areas classified⁷ for rare and vulnerable birds or regularly occurring migratory species.
- Potential SPAs (pSPAs)⁸, candidate SACs (cSACs)⁹, Sites of Community Importance (SCIs)¹⁰ and Ramsar sites should also be included in the HRA.
- Ramsar sites support internationally important wetland habitats and are listed under the Convention on Wetlands of International Importance especially as Waterfowl Habitat (Ramsar Convention, 1971).

1.11 For ease of reference during HRA, these designations can be collectively referred to as Habitats sites¹¹ despite Ramsar designations being at the international level.

1.12 The overall purpose of the HRA is to conclude whether or not a proposal or policy, or the whole development plan, would adversely affect the integrity of the Habitats site in question either alone or in combination with other plans and projects. This is judged in terms of the implications of the plan for the 'qualifying features' for which the Habitats site was designated, i.e.:

- SACs – Annex I habitat types and Annex II species¹²;
- SPAs – Annex I birds and regularly occurring migratory species not listed in Annex I¹³;
- Ramsar sites – the reasons for listing the site under the Convention¹⁴.

1.13 Significantly, HRA is based on the precautionary principle meaning that where uncertainty or doubt remains, an adverse impact should be assumed.

Stages of HRA

1.14 The HRA of development plans is undertaken in stages (as described below) and should conclude whether or not a proposal would adversely affect the integrity of the Habitats site in question.

1.15 The HRA should be undertaken by the 'competent authority', in this case Colchester Borough Council, and LUC has been commissioned to do this on the Council's behalf. The HRA also requires close working with Natural England as the statutory nature conservation body¹⁵ in order to obtain the necessary information, agree the process, outcomes and mitigation proposals. The Environment Agency, while not a statutory consultee for the HRA, is also in a strong position to provide advice and information throughout the process as it is required to undertake HRA for its existing licences and future licensing of activities.

Requirements of the Habitats Regulations

1.16 In assessing the effects of a Local Plan in accordance with Regulation 105 of the Conservation of Habitats and Species Regulations 2017, as amended, there are potentially two tests to be applied by the competent authority: a 'Significance Test' followed, if necessary, by an Appropriate Assessment which would inform the 'Integrity Test'. The relevant sequence of questions is as follows:

⁷ Classified (a) before the day of the UK's exit from the EU (31 January 2020) in accordance with Article 4(1) or 4(2) of the European Union Wild Birds Directive for rare and vulnerable birds (as listed in Annex I of the Directive), and under Article 4(2) for regularly occurring migratory species not listed in Annex I, or (b) after exit day under the retained transposing regulations.

⁸ Potential SPAs are sites that have been approved by the Minister for formal consultation but not yet proposed to the European Commission, as listed on the [GOV.UK website](#).

⁹ Candidate SACs are sites that have been submitted to the European Commission, but not yet formally adopted, as listed on the JNCC's [SAC list](#).

¹⁰ SCIs are sites that had been adopted by the European Commission before the day of the UK's exit from the EU (31 January 2020) but not yet formally designated as SACs by the UK Government.

¹¹ The term 'Natura 2000 sites' can also be used interchangeably with 'Habitats sites' in the context of HRA, although the latter term is used throughout this report.

¹² As listed in the site's citation on the JNCC website (all features of European importance, both primary and non-primary, need to be considered).

¹³ As identified in sections 3.1, 3.2 and 4.2 of the SPA's standard data form on the JNCC website; species for which the site assessment of population (abbreviated to 'Pop.' in table at section 3.1 and 3.2) is 'D' (non-significant population) are not qualifying features and are only relevant to the HRA if qualifying features are dependent on them. Information from SAC and Spa Standard Data Forms is also published by the JNCC in the [Natura 2000 site details - spreadsheet](#). At sites where there remain differences between species listed in the [2001 SPA Review](#) and the extant site citation in the standard data form, the relevant country agency (Natural England or Natural Resources Wales) should be contacted for further guidance.

¹⁴ As set out in section 14 of the relevant 'Information Sheet on Ramsar Wetlands' available on the JNCC website.

¹⁵ Regulation 5 of the Habitats Regulations 2017.

- Step 1: Under Reg. 105(1)(b), consider whether the plan is directly connected with or necessary to the management of the sites. If not, as is the case for the Colchester Local Plan, proceed to Step 2.
- Step 2: Under Reg. 105(1)(a) consider whether the plan is likely to have a significant effect on a Habitats site, either alone or in combination with other plans or projects (the 'Significance Test'). If yes, proceed to Step 3.
- Step 3: Under Reg. 105(1), make an Appropriate Assessment of the implications for the Habitats site in view of its current conservation objectives (the 'Integrity Test'). In so doing, it is mandatory under Reg. 105(2) to consult Natural England, and optional under Reg. 105(3) to take the opinion of the general public.
- Step 4: In accordance with Reg. 105(4), but subject to Reg. 107, give effect to the land use plan only after having ascertained that the plan would not adversely affect the integrity of a Habitats site.
- Step 5: Under Reg. 107, if Step 4 is unable to rule out adverse effects on the integrity of a Habitats site and no alternative solutions exist then the competent authority may nevertheless agree to the plan or project if it satisfies the derogation tests including there being no satisfactory alternative, it being carried out for 'imperative reasons of overriding public interest' (IROPI), and the favourable conservation status of the qualifying features being maintained.

1.17 Table 1.1: below summarises the stages and associated tasks and outcomes typically involved in carrying out a full HRA of a development plan, based on various guidance documents^{16,17,18,19}.

Table 1.1: Stages of HRA

Stage	Task	Outcome
Stage 1: HRA Screening	Description of the development plan. Identification of potentially affected Habitats sites and factors contributing to their integrity. Review of other plans and projects. Assessment of likely significant effects of the development plan alone or in combination with other plans and projects.	Where effects are unlikely, prepare a 'finding of no significant effect report'. Where effects judged likely, or lack of information to prove otherwise, proceed to Stage 2.
Stage 2: Appropriate Assessment (where Stage 1 does not rule out likely significant effects)	Information gathering (development plan and Habitats Sites). Impact prediction. Evaluation of development plan impacts in view of conservation objectives. Where impacts are considered to affect qualifying features, identify how these effects will be avoided or reduced.	Appropriate assessment report describing the plan, Habitats site baseline conditions, the adverse effects of the plan on the Habitats site, how these effects will be avoided or reduced, including the mechanisms and timescale for these mitigation measures. If effects remain after all alternatives and mitigation measures have been considered proceed to Stage 3.

¹⁶ UK Government Planning Practice Guidance, available from <https://www.gov.uk/guidance/appropriate-assessment>

¹⁷ European Commission (2001) Assessment of plans and projects significantly affecting European Sites. Methodological guidance on the provisions of Article 6(3) and (4) of the Habitats Directive 92/43/EEC.

¹⁸ DCLG (2006) Planning for the Protection of European Sites: Appropriate Assessment

¹⁹ RSPB (2007) The Appropriate Assessment of Spatial Plans in England. A guide to why, when and how to do it.

Stage	Task	Outcome
<p>Stage 3:</p> <p>Assessment where no alternatives exist, and adverse impacts remain taking into account mitigation</p>	<p>Identify ‘imperative reasons of overriding public interest’ (IROPI).</p> <p>Demonstrate no alternatives exist.</p> <p>Identify potential compensatory measures.</p>	<p>This stage should be avoided if at all possible. The test of IROPI and the requirements for compensation are extremely onerous.</p>

1.18 It is normally anticipated that an emphasis on Stages 1 and 2 of this process will, through a series of iterations, help ensure that potential adverse effects are identified and eliminated through the inclusion of mitigation measures designed to avoid or reduce effects. The need to consider alternatives could imply more onerous changes to a plan document. It is generally understood that the derogation tests are likely to be justified only very occasionally and would involve engagement with the Government.

Recent Case Law Changes

1.19 This HRA has been prepared in accordance with recent case law findings, including most notably the recent ‘People over Wind’ and ‘Holohan’ rulings from the Court of Justice for the European Union (CJEU).

1.20 The recent ‘People over Wind, Peter Sweetman v Coillte Teoranta’ judgment ruled that Article 6(3) of the Habitats Directive should be interpreted as meaning that mitigation measures should be assessed as part of an Appropriate Assessment, and should not be taken into account at the screening stage. The precise wording of the ruling is as follows:

“Article 6(3)must be interpreted as meaning that, in order to determine whether it is necessary to carry out, subsequently, an appropriate assessment of the implications, for a site concerned, of a plan or project, it is not appropriate, at the screening stage, to take account of measures intended to avoid or reduce the harmful effects of the plan or project on that site.

1.21 In light of the above, the HRA screening stage for the Local Plan has not relied upon avoidance or mitigation measures to draw conclusions as to whether the Local Plan would result in likely significant effects on Habitats sites, with any such measures being considered at the Appropriate Assessment stage as appropriate. This is discussed in more detail in **Section 3** below.

1.22 This HRA also fully considers the recent Holohan v An Bord Pleanala (9 Nov 2018) CJEU judgement which stated that:

“Article 6(3) of Council Directive 92/43/EEC of 21 May 1992 on the conservation of natural habitats and of wild fauna and flora must be interpreted as meaning that an ‘appropriate assessment’ must, on the one hand, catalogue the entirety of habitat types and species for which a site is protected, and, on the other, identify and examine both the implications of the proposed project for the species present on that site, and for which that site has not been listed, and the implications for habitat types and species to be found outside the boundaries of that site, provided that those implications are liable to affect the conservation objectives of the site.

Article 6(3) of Directive 92/43 must be interpreted as meaning that the competent authority is permitted to grant to a plan or project consent which leaves the developer free to determine subsequently certain parameters relating to the construction phase, such as the location of the construction compound and haul routes, only if that authority is certain that the development consent granted establishes conditions that are strict enough to guarantee that those parameters will not adversely affect the integrity of the site.

Article 6(3) of Directive 92/43 must be interpreted as meaning that, where the competent authority rejects the findings in a scientific expert opinion recommending that additional information be obtained, the ‘appropriate assessment’ must include an explicit and detailed statement of reasons capable of dispelling all reasonable scientific doubt concerning the effects of the work envisaged on the site concerned.

1.23 In undertaking this HRA, LUC has fully considered the potential for effects on species and habitats, including those not listed as qualifying features, to result in secondary effects upon the qualifying features of Habitats sites, including the potential for complex interactions and dependencies. In addition, the potential for offsite impacts, such as through impacts to functionally linked land, and or species and habitats located beyond the boundaries of Habitats site, but which may be important in supporting the ecological processes of the qualifying features, has also been fully considered in this HRA.

1.24 In addition to this, the HRA takes into consideration the ‘Wealden’ judgement and the ‘Dutch Nitrogen Case’ judgement from the Court of Justice for the European Union.

1.25 *Wealden District Council v Secretary of State for Communities and Local Government, Lewes District Council and South Downs National Park Authority (2017)* ruled that it was not appropriate to scope out the need for a detailed assessment for an individual plan or project based on AADT figures detailed in the Design Manual for Roads and Bridges or the critical loads used by DEFRA or Environmental Agency without considering the in-combination impacts with other plans and projects.

1.26 In light of this judgement, the HRA therefore considers traffic growth based on the effects of development provided for by the Plan in combination with other drivers of growth such as development proposed in neighbouring districts and demographic change.

1.27 The ‘*Coöperatie Mobilisation for the Environment and Vereniging Leefmilieu (Dutch Nitrogen)*’ judgement stated that “*May the positive effects of the autonomous decrease in the nitrogen deposition ... be taken into account in the appropriate assessment..., it is important that the autonomous decrease in the nitrogen deposition be monitored and, if it transpires that the decrease is less favourable than had been assumed in the appropriate assessment, that adjustments, if required, be made*”

1.28 The judgement states that according to previous case law “*...it is only when it is sufficiently certain that a measure will make an effective contribution to avoiding harm to the integrity of the site concerned, by guaranteeing beyond all reasonable doubt that the plan or project at issue will not adversely affect the integrity of that site, that such a measure may be taken into consideration in the ‘appropriate assessment’ within the meaning of Article 6(3) of the Habitats Directive*”

1.29 The HRA therefore only considers the existence of conservation and/or preventative measures if the expected benefits of those measures are certain at the time of the assessment. The HRA will also ensure that if a threshold approach is applied it will consider the risk of significant effects being produced even if below the threshold values to ensure that there is no adverse effect on integrity of the Habitats sites.

Structure of this report

1.30 This chapter (**Chapter 1**) has described the background to the production of the Local Plan and the requirement to undertake HRA. The remainder of the report is structured into the following sections:

- **Chapter 2: The Local Plan** summarises the content of Section 2 of the Colchester Borough Publication Draft Local Plan as proposed to be modified, which is the subject of this report.
- **Chapter 3: HRA Method** sets out the approach used, and the specific tasks undertaken during the screening and appropriate assessment of the HRA.
- **Chapter 4: HRA Screening Assessment** describes the findings of the screening stage of the HRA.
- **Chapter 5: Appropriate Assessment** sets out the findings of the Appropriate Assessment stage of the HRA.
- **Chapter 6: Conclusions** summarises the HRA conclusions for Section 2 of the Colchester Borough Publication Draft Local Plan as proposed to be modified, and describes the next steps to be undertaken.

Chapter 2

Section 2 of the Colchester Borough Publication Draft Local Plan

Vision

2.1 The overarching vision for Colchester in 2033 is:

‘Colchester will be an active and welcoming town with its rich and prestigious heritage treasured and showcased for all to enjoy. Colchester will be acclaimed for the creative, innovative and sustainable ways in which it addresses the wide range of challenges facing the Borough, including climate change; population growth and its changing composition; new lifestyle and technological innovations; creating and maintaining strong safe, healthy communities; and shifting market forces.

The Council will work proactively to ensure that the historic Town Centre continues its role as the cultural and economic heart of the Borough and international visitor destination. The surrounding urban area of Colchester will continue to provide a focus for new housing and employment with good transport accessibility and links to green spaces within both urban areas and the adjacent countryside. Tiptree, Wivenhoe and West Mersea are the largest of the Borough’s sustainable settlements and will provide essential services and facilities to their rural hinterland. The rural hinterland will remain home to an array of distinctive and thriving villages, set amidst beautiful landscapes and coastal areas which will be protected and enhanced for the enjoyment of all.

Colchester has made the most of its brownfield sites in recent years, revitalising large areas of the town, providing an array of high quality new homes, businesses, and facilities. Colchester will build on this progress with the delivery of a range of high quality greenfield developments and regenerating further brownfield sites where they become available. Working in partnership with our neighbours and local communities, a new exemplary Garden Community to the East will become innovatively designed, sustainable communities enabling a strong sense of local identity, social inclusion, and involvement; well-co-ordinated and timely delivery of high quality infrastructure and facilities; good links to the Borough’s primary hub at Colchester Town Centre; a range of market and affordable housing, and an array of job opportunities, together with opportunities for sport; renewable energy; leisure and recreation; walking and cycling, and growing produce.

2.2 *The Borough will enable the provision of a wide range of new housing that addresses the need for affordable, well-designed and adaptable homes that meet the needs of a diverse market, including families, young people/students, and an increasing number of older residents. New development will be designed and located to ensure that residents are, from the start, able to reach a wide range of destinations using sustainable transport methods. The Council with its partners will pursue a range of funding options to ensure the timely delivery of new infrastructure and facilities.*

Colchester will boast a diverse and thriving economy within a prosperous South East region, supported by high quality digital infrastructure and accessible locations for new employment development, providing job opportunities for all. The Borough Council will pursue commercial opportunities that support job creation and generate revenue to help sustain the delivery of essential public services to the whole community, working in partnership with public and private sector partners. Colchester will provide an array of high quality training and educational opportunities at all levels, providing equality of opportunity for all. In particular, the University of Essex will grow in its role as a leading higher education institution, developing strong links to the new Garden Community as well as the Town Centre and East Colchester.'

2.3 The overarching vision is supported by three themes, which are used as a framework for 16 strategic objectives:

Sustainable Growth:

Strategic Objectives

2.4 Strategic objectives for this theme include:

- Ensure new development is sustainable and minimises the use of scarce natural resources and addresses the causes and potential impacts of climate change, and encourages renewable energy.
- Focus new development at sustainable locations to create new communities with distinctive identities whilst supporting existing communities, local businesses, and sustainable transport.
- Provide high quality housing of all tenures at accessible locations to accommodate our growing community.
- Ensure there are sufficient sites allocated in the right locations to support employment growth over the plan period.
- Focus development at accessible locations which support public transport, walking and cycling, and reduce the need to travel, and enhance sustainable travel connections.

- Protect and enhance the vitality and viability of Colchester's historic Town Centre.
- Secure infrastructure to support new development.
- Promotion of healthy lifestyles through the provision and enhancement of sport, leisure and recreation facilities, public open space and green infrastructure.

Natural Environment:

Strategic Objectives

2.5 Strategic objectives for this theme include:

- Protect the countryside and coast.
- Develop a green infrastructure network across the Borough.
- Ensure new development avoids areas of flood risk and reduces future flood risk where possible.
- Protect and enhance landscapes, biodiversity, green spaces, air and water quality, and river corridors.
- Protect and enhance designated sites, geodiversity and soils.

Places:

Strategic Objectives

2.6 Strategic objectives for this theme include:

- Ensure the unique qualities of different communities and environments in the Borough are identified, protected and enhanced through policies and allocations which ensure high quality, consistency, equity and responsiveness to local character.
- Promote high quality design and sustain Colchester's historic character, found in its buildings, townscape and archaeology.
- Improve streetscapes, open spaces and green links to provide attractive and accessible spaces for residents to live, work and play.

Chapter 3

Method

3.1 The HRA of the Local Plan comprises of two stages:

- Screening Assessment; and
- Appropriate Assessment.

3.2 The methods undertaken for each of these assessments is provided in more detail below.

Screening Assessment

3.3 HRA Screening of the plan has been undertaken in line with current available guidance and seeks to meet the requirements of the Habitats Regulations. The tasks that have been undertaken during the screening stage of the HRA and the conclusions reached are described in detail below. This section sets out policies and impact types for which likely significant effects are predicted or cannot be ruled out prior to mitigation and avoidance measures.

3.4 The purpose of the screening stage is to:

- Identify all aspects of the plan which would have no effect on a Habitats site, so that that they can be eliminated from further consideration in respect of this and other plans;
- Identify all aspects of the plan which would not be likely to have a significant effect on a Habitats site (i.e. would have some effect, because of links/connectivity, but which are not significant), either alone or in combination with other aspects of the same plan or other plans or projects, which therefore do not require 'appropriate assessment'; and
- Identify those aspects of the plan where it is not possible to rule out the risk of significant effects on a Habitats site, either alone or in combination with other plans or projects. This provides a clear scope for the parts of the plan that will require appropriate assessment.

Identification of Habitats sites which may be affected by the Plan

3.5 In order to initiate the search of Habitats sites that could potentially be affected by the Local Plan, it is established practice in HRAs to consider Habitats sites within the local

planning authority areas covered by a Plan, and also within a buffer distance from the boundary of the Plan area.

3.6 A distance of 20km was used to identify Habitats sites likely to be affected by impacts relating to development in Colchester Borough. In addition to this, consideration was also given to Habitats sites connected to the plan area beyond this

Table 3.1: Habitats sites within 20km of Colchester Borough.

Habitats Site	Closest Distance / Location from Colchester Borough
SACs	
Essex Estuaries	Within the Borough
Hamford Water	13.5km / East
SPAs	
Abberton Reservoir	Within the Borough
Blackwater Estuary (Mid-Essex Coast Phase 4)	Within the Borough
Colne Estuary (Mid-Essex Coast Phase 2)	Within the Borough
Stour and Orwell Estuaries	Within the Borough
Dengie (Mid-Essex Coast Phase 1)	2.5km / South
Outer Thames Estuary	3.5km / South
Hamford Water	13.5km / East
Foulness (Mid-Essex Coast Phase 5)	14.7km South-east
Crouch and Roach Estuaries (Mid-Essex Coast Phase 3)	15.9km / South
Ramsar sites	
Abberton Reservoir	Within the Borough
Blackwater Estuary (Mid-Essex Coast Phase 4)	Within the Borough
Colne Estuary (Mid-Essex Coast Phase 2)	Within the Borough
Stour and Orwell Estuaries	Within the Borough
Dengie (Mid-Essex Coast Phase 1)	2.5km / South
Hamford Water	13.5km / East
Foulness (Mid-Essex Coast Phase 5)	14.7km South-east
Crouch and Roach Estuaries (Mid-Essex Coast Phase 3)	15.9km / South

distance, for example through hydrological pathways or recreational visits by residents of Colchester.

3.7 Habitats sites identified for inclusion in the HRA are listed below in **Table 3.1** and **Figure 1** in **Appendix A**. Detailed information about each site is provided in **Appendix B**.

3.8 The designated features and conservation objectives of the Habitats sites, together with current pressures on and potential threats, was established using Data Forms for SACs and SPAs²⁰ and Information Sheets for Ramsar Wetlands published on the JNCC website²¹, as well as Natural

England's Site Improvement Plans²², Supplementary Advice Notes²³ and the most recent conservation objectives published on the Natural England website (most were published in

²⁰ These were obtained from the Joint Nature Conservation Committee and Natural England websites (www.jncc.gov.uk and www.naturalengland.org.uk)

²¹ www.jncc.defra.gov.uk

²² Natural England is in the process of compiling Site Improvement Plans for all Natura 2000 sites in England as part of the Improvement programme for England's Natura 2000 sites (IPENS).

²³ Supplementary Advice Notes, Natural England, <http://publications.naturalengland.org.uk/category/6490068894089216>

2014)²⁴. This analysis enabled Habitats site interest features to be identified, along with the features of each Habitats site which determine site integrity and the specific sensitivities and threats facing the site. This information was then used to inform an assessment of how the potential impacts of the Local Plan may result in likely significant effects on each of the Habitats sites in question, either alone or in-combination.

Assessment of ‘Likely Significant Effect’

3.9 As required under Regulation 105 of The Conservation of Habitats and Species Regulations 2017 (the ‘Habitats Regulations’), an assessment has been undertaken of the ‘likely significant effects’ of the Plan. The assessment has been prepared in order to identify which policies or site allocations would be likely to have a significant effect on Habitats sites. The screening assessment has been conducted without taking pre-embedded mitigation into account, in accordance with the ‘*People over Wind*’ judgment.

3.10 Consideration will be given to the potential for the development proposed to result in significant effects associated with:

- Physical loss of/damage to habitat;
- Non-physical disturbance (noise, vibration and light);
- Non-toxic contamination;
- Air pollution;
- Recreation pressure; and
- Changes to hydrology including water quality and quantity.

3.11 This approach also allows for consideration to be given to the cumulative effects of the site allocations rather than focussing exclusively on individual developments provided for by the Local Plan.

3.12 A risk-based approach involving the application of the precautionary principle is adopted in the assessment, such that a conclusion of ‘no significant effect’ will only be reached where it is considered very unlikely, based on current knowledge and the information available, that a proposal in the Local Plan would have a significant effect on the integrity of a Habitats site. The screening assessment identifies assumptions that have been applied to enable specific impacts on Habitats sites to either be screened in or out.

Interpretation of ‘Likely Significant Effect’

3.13 Relevant case law helps to interpret when effects should be considered as a Likely Significant Effect, when carrying out HRA of a land use plan.

3.14 In the Waddenzee case²⁵, the European Court of Justice ruled on the interpretation of Article 6(3) of the Habitats Directive (translated into Reg. 102 in the Habitats Regulations), including that:

3.15 An effect should be considered ‘likely’, “if it cannot be excluded, on the basis of objective information, that it will have a significant effect on the site” (para 44). An effect should be considered ‘significant’, “if it undermines the conservation objectives” (para 48). Where a plan or project has an effect on a site “but is not likely to undermine its conservation objectives, it cannot be considered likely to have a significant effect on the site concerned” (para 47).

3.16 An opinion delivered to the Court of Justice of the European Union²⁶ commented that:

“The requirement that an effect in question be ‘significant’ exists in order to lay down a de minimis threshold. Plans or projects that have no appreciable effect on the site are thereby excluded. If all plans or projects capable of having any effect whatsoever on the site were to be caught by Article 6(3), activities on or near the site would risk being impossible by reason of legislative overkill.”

3.17 This opinion (the ‘Sweetman’ case) therefore allows for the authorisation of plans and projects whose possible effects, alone or in combination, can be considered ‘trivial’ or de minimis; referring to such cases as those “which have no appreciable effect on the site”. In practice such effects could be screened out as having no Likely Significant Effect; they would be ‘insignificant’.

Mitigation provided by the Local Plan

3.18 Some of the potential effects of the Local Plan could be mitigated through the implementation of other policies in the plan itself, such as the provision of green infrastructure within new developments (which could help mitigate increased pressure from recreation activities at Habitats sites). Nevertheless, in accordance with the recent ‘*People over Wind*’ judgement, avoidance and mitigation measures cannot be relied upon at the Screening Stage, and therefore, where such measures exist, they will be considered at the Appropriate Assessment stage for impacts and policies where

²⁴

²⁵ ECJ Case C-127/02 “Waddenzee” Jan 2004.

²⁶ Advocate General’s Opinion to CJEU in Case C-258/11 Sweetman and others v An Bord Pleanala 22nd Nov 2012.

likely significant effects, either alone or in-combination, cannot be ruled out.

In-combination Effects

3.19 Regulation 102 of the Amended Habitats Regulations 2017 requires an Appropriate Assessment where “a land use plan is likely to have a significant effect on a Habitats site (either alone or in combination with other plans or projects) and is not directly connected with or necessary to the management of the site”. Therefore, it will be necessary to consider whether any impacts identified from the Local Plan may combine with other plans or projects to give rise to significant effects in combination.

3.20 This exercise will be carried out as part of the screening stage of the HRA. The potential for in-combination effects will only be considered for those Plan components identified as unlikely to have a significant effect alone, but which could act in combination with other plans and projects to produce a significant effect. This approach accords with recent guidance on HRA.

3.21 The first stage in identifying ‘in-combination’ effects involves identifying which other plans and projects in addition to the Local Plan may affect the Habitats sites that will be the focus of this assessment. This exercise will seek to identify those components of nearby plans that could have an impact on the Habitats sites considered as part of this HRA, e.g. areas or towns where additional housing or employment development is proposed near to the same Habitats sites (as there could be effects from the transport, water use, infrastructure and recreation pressures associated with the new developments).

3.22 The potential for in-combination impacts has been focussed in Colchester and any authorities that overlap with Habitats sites considered within this HRA. The findings of any associated HRA work for those plans will be reviewed where available. With help from the Council, any strategic projects in the area that could have in-combination effects with the Local Plan will also be identified and reviewed, if applicable.

3.23 Should any other plans or projects be identified throughout the HRA process that could lead to in-combination effects on Habitats sites with the Local Plan, they will be included in the review.

3.24 The HRA Screening will identify and review other plans and projects for consideration of in-combination effects and will outline the components of each plan or project that could have an impact on nearby Habitats sites and considering the

findings of the accompanying HRA work (where available). This information will be updated as the HRA work for the Local Plan progresses. The local plans and associated HRAs of the following authorities will be included as a minimum:

- Tendring District;
- Braintree District;
- East Suffolk District;
- Ipswich Borough;
- Maldon District;
- Chelmsford City;
- Babergh District;
- Uttlesford District;
- South Cambridgeshire District; and
- St Edmundsbury Borough.

3.25 In addition, the following key plans will be included as they are developed further:

- Eight Ash Green Neighbourhood Plan;
- Great Tey Neighbourhood Plan;
- Marks Tey Neighbourhood Plan;
- Messing cum Inworth Neighbourhood Plan;
- Stanway Neighbourhood Plan;
- Tiptree Neighbourhood Plan;
- West Bergholt Neighbourhood Plan;
- West Mersea Neighbourhood Plan
- Wivenhoe Neighbourhood Plan;
- Eight Ash Green Neighbourhood Plan;
- Essex Minerals Local Plan;
- Essex and Southend-on-Sea Waste Local Plan; and
- Essex Local Transport Plan.

3.26 The Government’s National Infrastructure Planning website²⁷ will also be reviewed for major projects that could have significant effects in combination with those of the Local Plan.

²⁷ <https://infrastructure.planninginspectorate.gov.uk/projects/south-east/>

Appropriate Assessment

3.27 The Appropriate Assessment stage of HRA focuses on those policies and related impacts judged likely to have a significant effect at the Screening stage, and seeks to conclude whether, in light of mitigation and avoidance measures, they would result in an adverse effect on the integrity of the qualifying features of a Habitats site(s), or where insufficient certainty regarding this remains. The integrity of a site depends on the site being able to sustain its 'qualifying features' across the whole of the site and ensure their continued viability.

Chapter 4

Screening Assessment

4.1 As described in **Chapter 3**, a screening assessment was carried out in order to identify the likely significant effects of the Local Plan on the Habitats sites within 20km. The full screening matrix, which sets out the decision-making process used for this assessment can be found in **Appendix C** and the findings are summarised below.

HRA Screening of Policies

No 'Likely Significant Effect' Predicted

4.2 The following policies are not expected to result in development and therefore will not result in significant effects on Habitats sites:

- Policy SG1: Colchester's Spatial Hierarchy
- Policy SG5: Centre Hierarchy
- Policy SG6a Local Centres
- Policy SG7: Infrastructure Delivery and Impact Mitigation
- Policy SG8: Neighbourhood Plans
- ENV4: Dedham Vale Area of Outstanding Natural Beauty Plans
- Policy ENV5: Pollution and Contaminated Land
- Policy PP1: Generic Infrastructure and Mitigation Requirements
- Policy TC2: Retail Frontages
- Policy TC4: Transport in Colchester Town Centre
- Policy NC4: Transport in North Colchester
- Policy SC3: Transport in South Colchester
- Policy EC4: Transport in East Colchester
- Policy WC5: Transport in West Colchester
- Policy DM1: Health and Wellbeing
- Policy DM8: Affordable Housing
- Policy DM9: Development Density

- Policy DM10: Housing Diversity
- Policy DM12: Housing Standards
- Policy DM15: Design and Amenity
- Policy DM16: Historic Environment
- Policy DM17: Retention of Open Space and Recreation Facilities
- Policy DM18: Provision of Public Open Space
- Policy DM19: Private Amenity Space
- Policy DM22: Parking
- Policy DM23: Flood Risk and Water Management
- Policy DM24: Sustainable Urban Drainage Systems

4.3 The following policies will not result in development and will contribute to ensuring the safeguarding of Habitats sites:

- Policy ENV1: Environment
- Policy ENV2: Coastal Areas
- Policy ENV3: Green Infrastructure

4.4 The following policies will not directly result in development but do support proposals for renewable energy projects:

- Policy CC1: Climate Change
- Policy DM25: Renewable Energy, Water, Waste and Recycling

Policies resulting in development or with potential pathways to Habitats Sites where the scale and location of the impact is negligible, or the effect is insignificant.

4.5 The following policies could result in some development, but the development arising would be either located away from sensitive Habitats sites within the urban area or would be small in scale so would not be expected to contribute significantly to increased vehicle traffic, recreation pressure or changes to water quantity and quality:

- Policy SG6: Town Centre Uses
- Policy DM2: Community Facilities
- Policy DM3: Education Provision
- Policy DM4: Sports Provision
- Policy DM5: Tourism, Leisure, Culture and Heritage
- Policy DM7: Agricultural Development and Diversification

- Policy DM11: Gypsies, Travellers, and Travelling Showpeople
- Policy DM13: Domestic development
- Policy DM14: Rural Workers' Housing
- Policy DM20: Promoting Sustainable Transport and Changing Travel Behaviour
- Policy DM21: Sustainable Access to Development

Likely Significant Effects predicted

4.6 The following policies are highlighted as having potential impact pathways to Habitats sites and Likely Significant Effects cannot be ruled out:

- Policy SG2: Housing Delivery
- Policy SG3: Economic Growth Provision
- Policy SG4: Local Economic Areas
- Policy TC1: Town Centre Policy and Hierarchy
- Policy TC3: Town Centre Allocations
- Policy NC1: North Colchester and Severalls Strategic Economic Area
- Policy NC2: North Station Special Policy Area
- Policy NC3: North Colchester
- Policy SC1: South Colchester Allocations
- Policy SC2: Middlewick Ranges
- Policy EC1: Knowledge Gateway and University of Essex Strategic Economic Area
- Policy EC2: East Colchester / Hythe Special Policy Area
- Policy EC3: East Colchester
- Policy WC1: Stanway Strategic Economic Area
- Policy WC2: Stanway
- Policy WC3: Colchester Zoo
- Policy WC4: West Colchester
- Policy SS1: Abberton and Langenhoe
- Policy SS2: Boxted
- Policy SS3: Chappel and Wakes Colne
- Policy SS4: Copford
- Policy SS5: Eight Ash Green
- Policy SS6: Fordham

- Policy SS7: Great Horkesley
- Policy SS8: Great Tey
- Policy SS9: Langham
- Policy SS10: Layer de la Haye
- Policy SS11: Marks Tey
- Policy SS12a: West Mersea
- Policy SS12b: Coast Road, West Mersea
- Policy SS12c: Mersea Island Caravan Parks
- Policy SS13: Rowhedge
- Policy SS14: Tiptree
- Policy SS15: West Bergholt
- Policy SS16: Wivenhoe
- Policy OV1: Development in Other Villages
- Policy OV2: Countryside
- Policy DM6: Economic Development in Rural Areas and the Countryside

HRA Screening of Impacts

4.7 For some types of impacts, screening for likely significant effects has been determined on a proximity basis, using GIS data to determine the proximity of potential development locations to the Habitats sites that are the subject of the assessment. However, there are many uncertainties associated with using set distances as there are very few standards available as a guide to how far impacts will travel. Therefore, during the screening stage a number of assumptions have been applied in relation to assessing the likely significant effects on Habitats sites that may result from the plan, as described below.

Physical Damage and Loss

4.8 Any development resulting from the Local Plan would take place within the boundary of Colchester; therefore, only Habitats sites within the boundary could be affected by physical damage or loss of habitat within the site boundaries. Habitats sites identified within the Borough and were considered in more detail, included:

- Abberton Reservoir SPA and Ramsar
- Blackwater Estuary (Mid Essex Coast Phase 4) SPA and Ramsar
- Colne Estuary (Mid Essex Coast Phase 2) SPA and Ramsar

- Stour and Orwell Estuaries SPA and Ramsar
- Essex Estuaries SAC.

4.9 Habitat loss from development in areas outside of the Habitats site boundaries may result in likely significant effects where that habitat contributes towards maintaining the interest feature for which the Habitats site is designated. This includes land which may provide offsite movement corridors or feeding and sheltering habitat for mobile species such as bats, birds and fish. Habitats sites susceptible to the indirect effects of habitat loss are restricted to those sites with qualifying species that rely on offsite habitat, including:

- Dengie (Mid-Essex Coast Phase 1) SPA and Ramsar
- Outer Thames Estuary SPA
- Hamford Water SPA, SAC and Ramsar
- Foulness (Mid-Essex Coast Phase 5) SPA and Ramsar
- Crouch and Roach Estuaries (Mid-Essex Coast Phase 3) SPA and Ramsar.

4.10 Natural England has advised that their recognised distance for the consideration of offsite functionally linked land is generally 2km, but for certain species, including most notably, golden plover and lapwing, a greater distance of 15km may be appropriate. This buffer has been considered for each of the Habitats sites above, which are designated for supporting qualifying bird species.

Abberton Reservoir SPA and Ramsar

4.11 Abberton Reservoir is a large fresh water reservoir located approximately 9.7km south-west of Colchester. The site is a designated SSSI, SPA and Ramsar site principally for the internationally important populations of regularly occurring Annex 1 and migratory bird species. No site allocations are proposed within the boundary of the SPA and Ramsar.

4.12 The SPA and Ramsar site support transient bird species that also rely upon habitats located outside of the site boundaries. This includes species such as wigeon, gadwall, great crested grebe, pochard, golden plover and lapwing which may rely on offsite pastures and arable fields for feeding. **As a result, there is potential for the proposed site allocations to result in physical loss and damage to offsite habitats of importance to qualifying bird species.**

Blackwater Estuary (Mid Essex Coast Phase 4) SPA and Ramsar

4.13 The Blackwater Estuary SPA and Ramsar is a large estuary between the Dengie peninsula and Mersea Island on the Essex coast. It stretches from immediately adjacent to

Maldon and about 8 km south of Colchester. No development is proposed within the boundaries of the SPA and Ramsar site.

4.14 The Site is designated for a range of qualifying bird species including dark-bellied brent goose, hen harrier, golden plover and redshank, which may rely on offsite pastures and arable fields for feeding. **As a result, there is potential for the proposed site allocations to result in physical loss and damage to offsite habitats of importance to qualifying bird species.**

Colne Estuary (Mid Essex Coast Phase 2) SPA and Ramsar

4.15 The Colne Estuary (Mid-Essex Coast Phase 2) SPA and Ramsar boundaries are concurrent with the Essex Estuaries SAC within this part of Essex, located along the eastern boundary of Colchester Borough. The SPA and Ramsar site supports transient species that use offsite habitat. This includes species such as golden plover and dark-bellied Brent goose, which rely on offsite pastures and arable fields.

4.16 No development is proposed within the boundaries of the SPA and Ramsar site however the qualifying bird species may rely on offsite pastures and arable fields for feeding. **As a result, there is potential for the proposed site allocations to result in physical loss and damage to offsite habitats of importance to qualifying bird species.**

Stour and Orwell Estuaries SPA and Ramsar

4.17 A small part of the Stour and Orwell Estuaries SPA and Ramsar site is located in the north-east corner of the Colchester Borough boundary. No development is proposed within the boundaries of the SPA and Ramsar site.

4.18 The SPA and Ramsar site support transient bird species that also rely upon habitats located outside of the site boundaries. This includes species such as lapwing, dark-bellied brent goose and curlew, which may rely on offsite pastures and arable fields for feeding. **As a result, there is potential for the proposed site allocations to result in physical loss and damage to offsite habitats of importance to qualifying bird species.**

Essex Estuaries SAC

4.19 Essex Estuaries SAC is a large estuarine site in the south of Colchester Borough. The site comprises the major estuaries of the Colne, Blackwater, Crouch and Roach rivers. The SAC is designated primarily for supporting estuaries, mudflats and sandflats not covered by seawater at low tide, *salicornia* and other animals colonising mud and sand, spartina swards, Atlantic salt meadows, and Mediterranean

and thermo-Atlantic halophilous scrubs. Therefore, impacts to this SAC are restricted to direct damage or loss of these habitats within the SAC boundary.

4.20 No site allocations are proposed within the boundary of the SAC and **therefore no likely significant effect is predicted as a result of direct physical damage and loss either alone or in-combination with other plans and projects.**

Dengie (Mid-Essex Coast Phase 1) SPA and Ramsar

4.21 Dengie (Mid-Essex Coast Phase 1) SPA and Ramsar lies outside of the district boundary at 2.5km and therefore no likely significant effect is considered in relation to direct physical damage and loss.

4.22 However, as this SPA and Ramsar supports qualifying bird species, including dark-bellied brent goose, grey plover, hen harrier and knot, which rely on functional offsite habitat. There is potential for proposed development within the Local Plan, which lie within 2km of the Habitats site to result in a likely significant affect. A 15km buffer was not applied for this site as did not list golden plover or lapwing as qualifying species.

4.23 Given the distance of the SPA and Ramsar site at 2.5km from the district, **no likely significant effect to the SPA and Ramsar is predicted as a result of on- or offsite physical damage and loss either alone or in-combination with other plans and projects.**

Outer Thames Estuary SPA

4.24 The Outer Thames Estuary SPA lies outside of the district boundary at 3.5km. The SPA's qualifying species, red throated diver, is primarily a marine species that remains offshore during the winter period. This species only returns to shore during the breeding season and relies on moorland habitat in Northern Scotland (mainland), Orkney and Outer Hebrides.

4.25 Given the distance of the SPA from the district at 3.5km and that this species is considered unlikely to rely on habitat present on land in Colchester, **no likely significant effect to the SPA is predicted as a result of physical damage and loss either alone or in-combination with other plans and projects.**

Hamford Water SPA and Ramsar

4.26 The Hamford Water SPA and Ramsar are situated along the eastern coast of Tendring District, 13.5km from Colchester Borough and therefore no likely significant effect is considered in relation to direct physical damage and loss.

4.27 The site supports transient species that use offsite habitat such as golden plover and dark-bellied brent goose, which may rely on offsite pastures and arable fields for foraging. Based on Natural England's recognised distances, a 15km buffer was applied to identify site allocations with potential to affect the SPA and Ramsar.

4.28 A review of proposed development within the Local Plan identified that there are no site allocations within 15km of this SPA and Ramsar. Therefore, **there is no potential for likely significant effects to occur in relation to physical damage and loss onsite and offsite either alone or in-combination.**

Hamford Water SAC

4.29 Hamford Water SAC is located 13.5km from Colchester Borough and is designated for supporting Fisher's estuarine moth. Natural England has advised that grassland habitats located outside of the SAC may also contribute to maintaining the population of the Fisher's estuarine moth. As a result, loss of habitat close to the SAC may result in likely significant effects on the SAC qualifying feature.

4.30 However, given the distance of the SAC at 13.5km from the Borough **no likely significant effect to the SAC is predicted as a result of physical damage and loss either alone or in-combination with other plans and projects.**

Foulness (Mid-Essex Coast Phase 5) SPA and Ramsar

4.31 The (Mid-Essex Coast Phase 5) SPA and Ramsar lies 14.7km from the Borough and therefore no likely significant effect is considered in relation to direct physical damage and loss.

4.32 The SPA and Ramsar is designated for supporting a range of wetland bird species, including grey plover, knot, bar-tailed godwit, redshank, avocet, dark-bellied Brent geese, dunlin, ringed plover, shelduck, oystercatcher and curlew. Based on Natural England's recognised distances, a 2km buffer was applied. Given the distance of the SPA and Ramsar site at 14.7km from the Borough, **no likely significant effect to the SPA and Ramsar is predicted as a result of direct physical damage and loss either alone or in-combination with other plans and projects.**

Crouch and Roach Estuaries (Mid-Essex Coast Phase 3) SPA and Ramsar.

4.33 Crouch and Roach Estuaries (Mid-Essex Coast Phase 3) SPA and Ramsar lies 15.9km from the Borough and therefore no likely significant effect is considered in relation to direct physical damage and loss.

4.34 The SPA and Ramsar is designated for supporting a wintering waterbirds, principally dark-bellied brent goose. Based on Natural England's recognised distances, a 2km buffer was applied. Given the distance of the SPA and Ramsar site at 15.9km from the Borough, **no likely significant effect to the SPA and Ramsar is predicted as a result of direct physical damage and loss either alone or in-combination with other plans and projects.**

Non-Physical Disturbance

4.35 Noise and vibration effects, e.g. during the construction of new housing or employment development, are most likely to disturb bird species and are thus a key consideration with respect to Habitats sites where these species are the qualifying features. Artificial lighting at night (e.g. from streetlamps, flood lighting and security lights) has the potential to affect species where it occurs in close proximity to key habitat areas, such as key roosting sites of SPA birds.

4.36 It has been assumed that the effects of noise, vibration and light are most likely to be significant within a distance of 500 metres. There is also evidence of 300 metres being used as a distance up to which certain bird species can be disturbed by the effects of noise; however, it has been assumed (on a precautionary basis) that the effects of noise, vibration and light pollution are capable of causing an adverse effect if development takes place within 500 metres of a Habitats site with qualifying features sensitive to these disturbances. Habitats sites susceptible to non-physical disturbance from proposed development within the Borough are restricted to Habitats sites, which lie in or within 500m of the Borough, including Abberton Reservoir SPA and Ramsar, Blackwater Estuary (Mid Essex Coast Phase 4) SPA and Ramsar, Colne Estuary (Mid Essex Coast Phase 2) SPA and Ramsar, Stour and Orwell Estuaries SPA and Ramsar and Essex Estuaries SAC.

4.37 All other Habitats sites are located over 500m from the Borough boundary at the closest point and/or do not support mobile species likely to be significantly affected as a result of non-physical disturbance.

Abberton Reservoir SPA and Ramsar

4.38 The SPA and Ramsar site support qualifying wetland bird species, which are susceptible to disturbance from noise, vibration and increased lighting. A review of site allocations identified no proposed allocations with 500m of the SPA and Ramsar and therefore, **no likely significant effect to the SPA and Ramsar are predicted as a result of non-physical disturbance either alone or in-combination with other plans and projects.**

Blackwater Estuary (Mid Essex Coast Phase 4) SPA and Ramsar

4.39 The SPA and Ramsar site support qualifying wetland bird species, which are susceptible to disturbance from noise, vibration and increased lighting.

4.40 A review of site allocations identified that there are no allocations in proximity to the SPA/Ramsar with potential to be affected by non-physical disturbance.

4.41 There is therefore no potential for likely significant effects to occur in relation to non-physical disturbance either alone or in-combination.

Colne Estuary (Mid Essex Coast Phase 2) SPA and Ramsar

4.42 The SPA and Ramsar site support qualifying wetland bird species, which are susceptible to disturbance from noise, vibration and increased lighting.

4.43 A review of site allocations identified that there are no allocations in proximity to the SPA/Ramsar with potential to be affected by non-physical disturbance.

4.44 There is therefore no potential for likely significant effects to occur in relation to non-physical disturbance either alone or in-combination.

Stour and Orwell Estuaries SPA and Ramsar

4.45 The SPA and Ramsar site support qualifying wetland bird species, which are susceptible to disturbance from noise, vibration and increased lighting. A review of site allocations identified no proposed allocations with 500m of the SPA and Ramsar and therefore, **no likely significant effect to the SPA and Ramsar are predicted as a result of non-physical disturbance either alone or in-combination with other plans and projects.**

Essex Estuaries SAC

4.46 Although Essex Estuaries SAC is located within the Borough its qualifying features are not susceptible to non-physical disturbance and therefore, **no likely significant effect to the SAC are predicted as a result of non-physical disturbance either alone or in-combination with other plans and projects.**

Air Pollution

4.47 Air pollution is most likely to affect Habitats sites where plant, soil and water habitats are the qualifying features, but

some qualifying animal species may also be affected, either directly or indirectly, by deterioration in habitat as a result of air pollution. Deposition of pollutants to the ground and vegetation can alter the characteristics of the soil, affecting the pH and nitrogen levels, which can then affect plant health, productivity and species composition.

4.48 In terms of vehicle traffic, nitrogen oxides (NO_x, i.e. NO and NO₂) are considered to be the key pollutants. Deposition of nitrogen compounds may lead to both soil and freshwater acidification, and NO_x can cause eutrophication of soils and water.

4.49 Based on the Highways Agency Design Manual for Road and Bridges (DMRB) Manual Volume 11, Section 3, Part 114 (which was produced to provide advice regarding the design, assessment and operation of trunk roads including motorways), it is assumed that air pollution from roads is unlikely to be significant beyond 200m from the road itself. Where increases in traffic volumes are forecast, this 200m buffer needs to be applied to the relevant roads in order to make a judgement about the likely geographical extent of air pollution impacts.

4.50 The DMRB Guidance for the assessment of local air quality in relation to highways developments provides criteria that should be applied at the Screening Stage of an assessment of a plan or project, to ascertain whether there are likely to be significant impacts associated with routes or corridors. Based on the DMRB guidance, affected roads which should be assessed are those where:

- Daily traffic flows will change by 1,000 AADT (Annual Average Daily Traffic) or more; or
- Heavy duty vehicle (HDV) flows will change by 200 AADT or more; or
- Daily average speed will change by 10 km/hr or more; or
- Peak hour speed will change by 20 km/hr or more; or
- Road alignment will change by 5 m or more.

4.51 Where significant increases in traffic are possible on roads within 200m of Habitats sites, traffic forecast data may be needed to determine if increases in vehicle traffic are likely to be significant. In line with the Wealden judgment²⁸, the traffic growth considered by the HRA should be based on the effects of development provided for by the Plan in combination with other drivers of growth such as development proposed in neighbouring districts and demographic change.

²⁸ Wealden v SSCLG [2017] EWHC 351 (Admin)

4.52 It has been assumed that only those roads forming part of the primary road network (motorways and 'A' roads) are likely to experience any significant increases in vehicle traffic as a result of development (i.e. greater than 1,000 AADT). As such, where a site is within 200m of only minor roads, no significant effect from traffic-related air pollution is considered to be the likely outcome.

4.53 The key commuting corridor for new housing and employment development will likely include A12, A120, A133, A134, A137, A1124 and A1232 which are shown in **Figure 2** in **Appendix A**. Habitats sites within 20km of Colchester Borough that are within 200m of strategic roads are limited to the Stour and Orwell Estuaries SPA and Ramsar site, which is situated within 200m of the A137 and A120.

4.54 All other Habitats sites were located further than 200m from the strategic road network for the district and therefore were screened out of the assessment.

Stour and Orwell Estuaries SPA and Ramsar

4.55 Small areas of the Stour and Orwell Estuaries SPA and Ramsar site are situated within 200m of a strategic road, including the A137 and A120. A total proportion of 0.71% of the SPA and 0.78% of the Ramsar within 200m of these strategic roads. Motorways and A roads within 200m of a sensitive receptor have potential to adversely affect the habitat composition and soil chemistry of the site through deposition of airborne pollutants, particularly Nitrogen. Increased air pollution in proximity to the SPA and Ramsar site may result in the degradation of habitat types upon which the qualifying features depend. Coastal dune habitat used by breeding little terns was highlighted by Natural England's SIP as a key habitat vulnerable to nitrogen deposition.

4.56 Habitats present within 200m of the A137 and A120 include mudflats, saltmarsh and neutral grassland.

4.57 Mudflats, which comprised the majority of habitat within 200m, are not considered vulnerable to the effects of air pollution at these locations due to twice daily flushing by tidal waters. In addition, the effect of air pollution would not expect to noticeably affect the feeding resource of benthic invertebrates upon which SPA birds depend.

4.58 Neutral grassland is considered vulnerable to air pollution but the impacts on this habitat from increased air pollution are unlikely to noticeably and would not affect the suitability of the habitat as a feeding resource for SPA birds which often benefit from high soil productivity.

4.59 The APIS website indicates that the current nitrogen deposition levels at the site are below critical load ranges of 20-30 N/ha/year for salt marsh. Small areas of salt marsh occur within 200m of the roads comprising c3ha in total, the

majority of which is located to the north of the A120 at Harwich Port. The corresponding SSSI unit 9 is reported as being in favourable condition in this area and given the existing and established presence of extensive industrial development at this location, and the small area of saltmarsh within 200m of the road, **no likely significant effects are predicted as a result of air pollution on the Stour and Orwell Estuaries SPA and Ramsar site either alone or in-combination.**

Recreation

4.60 Recreational activities and human presence can result in significant effects on Habitats sites as a result of erosion and trampling, associated impacts such as fire and vandalism or disturbance to sensitive features, such as birds through both terrestrial and water-based forms of recreation.

4.61 Habitats sites with qualifying bird species are likely to be particularly susceptible to recreational disturbances from walking, dog walking, angling, illegal use of off-road vehicles and motorbikes, wildfowling, and water sports. An increase in recreational pressure from development therefore has the potential to disturb bird populations of SPA and Ramsar sites as a result of both terrestrial and water-based recreation. In addition, recreation can physically damage habitat as a result of trampling and also through erosion associated with boat wash and terrestrial activities such as use of vehicles.

4.62 The Local Plan will result in housing growth, and associated population increase within the borough. Where increases in population are likely to result in significant increases in recreation at a Habitats site, either alone or in-combination, the potential for likely significant effects will require assessment.

4.63 Each Habitats site will typically have a 'Zone of Influence' (ZOI) within which increases in population would be expected to result in likely significant effects. ZOIs are usually established following targeted visitor surveys and the findings are therefore typically specific to each Habitats site (and often to specific areas within a Habitats site). The findings are likely to be influenced by a number of complex and interacting factors and therefore it is not always appropriate to apply a generic or non-specific ZOI to a Habitats Site. Particularly in relation to coastal Habitats sites, which have the potential to draw large number of visitors from areas much further afield.

4.64 As part of the Essex Coast Recreational disturbance Avoidance and Mitigation Strategy (RAMS) initiative for which Colchester Borough Council are involved in, visitor surveys were undertaken during the 2010-2013 and the winter of 2017/18 to determine specific ZOI for all Habitats sites along the Essex coast. The ZOI have been agreed with Natural

England in respect of the following Habitats sites and have been applied in this assessment:

- Blackwater SPA and Ramsar – 22km
- Colne Estuary SPA and Ramsar – 9.7km
- Hamford Water SPA and Ramsar – 8km
- Hamford Water SAC – 8km
- Stour and Orwell Estuaries SPA and Ramsar – 13km
- Dengie SPA and Ramsar – 20.8
- Crouch and Roach Estuaries Ramsar and SPA – 4.5km
- Foulness Estuary SPA and Ramsar – 13km

4.65 The ZOI of Hamford Water SAC, SPA and Ramsar, Crouch and Roach Estuaries Ramsar and SPA and Foulness Estuary SPA and Ramsar does not extend into Colchester Borough. **These Habitats sites were therefore screened out of the assessment.**

4.66 Dengie SPA and Ramsar have a ZOI of 20.8km, which extends into Colchester Borough. As a result, in line with the precautionary principle of HRA, **these Habitats sites were screened into the assessment and will need to be assessed for likely significant effects in relation to recreational pressure.**

4.67 All other Habitats sites above have ZOIs which extend into Colchester Borough and **therefore need to be assessed for likely significant effects in relation to increased recreational pressure.**

4.68 Essex Estuaries SAC lies within several SPA and Ramsar sites including Colne Estuary SPA and Ramsar (9.7km), Blackwater Estuary SPA and Ramsar (22km), Dengie SPA and Ramsar (20km), Crouch and Roach Estuaries SPA and Ramsar (4.1km) and Foulness Estuary SPA and Ramsar (13km). The respective ZOIs for each SPA and Ramsar have been applied to the Essex Estuaries SAC. More detail is provided in the Screening Assessment below.

4.69 Abberton Reservoir SPA and Ramsar lies within the Borough boundary and whilst Natural England has confirmed that this site can be screened out in terms of recreational disturbance due to the distance and success of existing visitor management regimes, it has been included for assessment for **likely significant effects in relation to increased recreational pressure in accordance with the precautionary principle of HRA and recent case law which prevents reliance on existing management regimes as an avoidance and mitigation measure at the screening stage.**

4.70 Due to the proximity of the Outer Thames Estuary SPA, there is potential for increased recreation from water-based

activities to impact the qualifying bird species of the SPA, which are dependent on the marine habitat of the SPA and this site has **therefore been screened into the assessment for consideration of recreational impacts.**

Essex Estuaries SAC

4.71 The SAC encompasses the Colne Estuary which lies between the southern parts of Colchester Borough and Tendring District. The SAC is subject to a range of land and water-based activities, including walking, fishing and water sports. Negative effects associated with these activities are primarily related to disturbance associated with the qualifying bird species of the Colne Estuary (Mid-Essex Coast Phase 2) SPA and Ramsar site and the Blackwater SPA and Ramsar, two sites which is concurrent with the SAC over much of this area. However, the coastal and estuarine habitats of the SAC may also be affected by factors associated with human access such as off-road vehicle use, erosion, fire, trampling and vandalism, but the nature of the habitat types present is such that their susceptibility to recreational disturbance is limited, at least to some extent, by their inaccessible nature. In addition, the presence of permissive footpaths and well-structured public access is likely to direct people away from sensitive habitat types within the SAC, such as Atlantic salt meadows.

4.72 The SAC is also sensitive to the effects of water-based recreation, particularly through the erosion of saltmarsh habitat associated with the wash of motorised watercraft such as jet skis. This was raised as a particular concern by Natural England during ongoing consultation as part of this assessment.

4.73 The SAC is comprised of a series of sites, including Colne Estuary National Nature Reserve (NNR), Colne Point Nature Reserve and Colne Estuary SSSI, which are managed by Natural England and the Essex Wildlife Trust. Management measures in place at the NNR and Nature Reserve, which are likely to minimise disturbance and damage to the SAC, include the use of restricted access to permit holders at Brightlingsea Marshes, Essex Wildlife Trust members only at Colne Point Nature Reserve, and prohibited access to dogs at Colne Point Nature Reserve. These measures are likely to contribute towards reducing the impacts of recreational disturbance but it is unclear whether these measures are actively enforced.

4.74 As part of the Essex Coast RAMS, specific visitor surveys were undertaken to inform the ZOI of the SAC. Essex Estuaries SAC overlaps with several SPA and Ramsar sites including Colne Estuary SPA and Ramsar (9.7km), Blackwater Estuary SPA and Ramsar (22km), Dengie SPA and Ramsar (20km), Crouch and Roach Estuaries SPA and Ramsar (4.1km) and Foulness Estuary SPA and Ramsar (13km). The respective ZOIs for each SPA and Ramsar have been applied

to the SAC. These ZOIs encompass much of Colchester and therefore population increases associated with housing growth have the potential to increase visitor pressures at the Essex Estuaries SAC.

4.75 A review of other plans and projects and associated HRA findings, identified that the HRAs of the Braintree Section 2 Local Plan and Tendring Section 2 Local Plan each identified the potential for Likely Significant Effects on the Essex Estuaries SAC as a result of in-combination effects with one another, and with the Strategic Section 1 Local Plan.

4.76 Despite the limited susceptibility of several of the SAC habitats to recreational pressure, there is a level of uncertainty as to whether Likely Significant Effects will occur as a result of increased recreational pressure associated with proposed development within the Local Plan. **Therefore, in line with a precautionary approach, further assessment is required at the Appropriate Assessment stage to determine whether increased recreational pressures would be likely to adversely affect the integrity of the SAC. Further dialogue with Natural England will be required at the Appropriate Assessment stage to develop the necessary avoidance and mitigation strategy and provide safeguards to ensure no adverse effect on integrity, either alone or in-combination.**

Colne Estuary (Mid-Essex Coast Phase 2) SPA and Ramsar

4.77 The SPA and Ramsar site are subject to the same land and water-based activities as Essex Estuaries SAC. These activities mentioned above are considered a key vulnerability to qualifying bird species of the SPA and Ramsar site as a result of direct disturbance to qualifying bird species and damage to features of importance to these species, such as feeding and roosting sites.

4.78 Damage from trampling is also considered a potential threat to qualifying plant species of the Ramsar site. However, the likelihood of this occurring is limited to some extent by a lack of accessibility to key habitats, such as saltmarsh, as a result of difficult terrain and frequent flooding. The provision of permissive footpaths adjacent to pastures and agricultural fields was identified using OS mapping and aerial photography, and it is likely that the footpaths would limit disturbance to small areas of the Habitats site.

4.79 The site is also sensitive to the effects of water-based recreation, particularly through direct disturbance to roosting and feeding bird species, and via the erosion of saltmarsh habitat upon which they depend as a result of the wash of motorised watercraft such as jet skis. This was raised as a concern for the Colne Estuary SPA/Ramsar by Natural

England during ongoing consultation as part of this assessment.

4.80 Measures have been implemented by Natural England and the Essex Wildlife Trust who manage the Colne Estuary NNR and Colne Point Nature Reserve, which lie within the SPA and Ramsar site, to restrict access to permit holders only at Brightlingsea Marshes and Essex Wildlife Trust members only at Colne Point Nature Reserve. Dog walking is also prohibited at Colne Point Nature Reserve, which supports an important breeding site for little terns. These measures are likely to contribute towards reducing the impacts of recreational disturbance on the SPA/Ramsar but it is unclear whether these measures are actively enforced and to what extent they are effective.

4.81 Following targeted visitor surveys undertaken as part of the Essex Coast RAMS in the winter of 2017/18, a ZOI of 9.7km was identified and has been applied in this assessment.

4.82 A review of site allocations within 9.7km of the SPA and Ramsar identified the following residential site allocations, which have potential to contribute to increased recreational pressure in the Habitats sites.

Table 4.1: Site Allocations within 9.7km of the Colne Estuary (Mid-Essex Coast Phase 2) SPA and Ramsar

Site Allocation	No. of Housing Units	Distance from Habitats Site (km)
SS12A (Dawes Lane)	100	1.0km
SS16 (Land off Croquet Gardens)	25	1.2km
SS12A (Brierley Paddocks)	100	1.4km
SS1 (Land to the west of Peldon Road)	50	1.8km
SS1 (Land to the east of Peldon Road)	5	1.8km
SS16 (Land behind the Fire Station, Colchester Road)	80	1.9km
SS16 (Land behind Broadfields)	120	1.9km
SS13 (Rowhedge Business Centre)	40	2.2km

Site Allocation	No. of Housing Units	Distance from Habitats Site (km)
SS16 (Land at Elmstead Road)	25	2.4km
EC3 (Place Farm)	30	3.2km
SC2 (Middlewick Ranges)	1000	3.3km
EC2 (East Colchester / Hythe Special Policy Area)	TBC	3.7km
EC3 (Land at Port Lane)	130	4.6km
SS10 (Layer de la Haye)	70	4.7km
EC3 (Barrington Road/Bourne Road vacant site)	28	4.9km
EC3 (Magdalen Street sites)	TBC	5.3km
EC3 (East Bay Mill)	22	5.6km
SC1 (South of Berechurch Hall Road)	150	5.6km
SC1 (ABRO Site)	171 - 304	6.0km
TC3 (Land at Britannia Car Park)	150	6.0km
TC3 (Vineyard Gate)	100	6.1km
TC3 (Part of St Runwalds Car park)	40	6.4km
SC1 (Land at Gosbecks Phase 2)	150	6.5km
WC4 (Essex County Hospital site, Lexden Road)	120	6.7km
NC2 (North Station Special Policy Area)	TBC	6.8km

Site Allocation	No. of Housing Units	Distance from Habitats Site (km)
WC4 (Land at Irvine Road)	8	7.1km
WC2 (Land off Dyers Road including Fiveways Fruit Farm)	490	8.4km
NC1 (Residential Allocation)	300	8.6km
NC3 (Land at Braiswick)	70	9.0km
WC2 (Land to the West of Lakelands)	250	9.6km
SS15 (West Bergholt)	120	10.6km
Total²⁹	3944 to 4077	-

4.83 A significant number of housing units are proposed within the ZOI of the SPA, which will result in increased levels of recreation in the local area. This has potential to result in increased recreational pressure on the SPA as a result of proposed development within the Local Plan and will require appropriate avoidance and mitigation measures to ensure no adverse effect on the integrity of the SPA.

4.84 There is potential for likely significant effects to occur in relation to impacts from recreation and therefore requires further consideration at appropriate assessment.

Stour and Orwell Estuaries SPA and Ramsar

4.85 The SPA and Ramsar is designated for its large waterbird assemblage, as well as breeding and overwintering birds, which are vulnerable to disturbance and damage to features of importance, such as feeding and roosting sites, from a range of land and water-based activities. These include dog walking, walking, watersports, fishing, wildfowling and military training. In addition to this, there is potential for damage to qualifying plant populations of the Ramsar site to occur as a result of trampling.

4.86 A ZOI of 13km was identified and has been applied in this assessment. The 13km ZOI came from a report for the Suffolk Coast RAMS by Footprint Ecology, which looked at

²⁹ Range (minimum to maximum) of total number of housing units. The total does not include policies which have an undetermined number of housing units.

visitors to the northern shore. NE requested this ZOI be used, despite the 2010-13 and 2017/18 surveys carried out by CBC suggesting a lower ZOI.

4.87 A review of site allocations within 13km of the SPA and Ramsar identified the following residential site allocations, which have potential to contribute to increased recreational pressure in the Habitats sites. This is detailed in **Table 4.2** below.

Table 4.2: Site Allocations within 13km of the Stour and Orwell Estuaries SPA and Ramsar

Site Allocation	No. of Housing Units	Distance from Habitats Site (km)
SS9 (School Road Langham)	70	5.1km
SS9 (Wick Road Langham)	10	5.2km
SS2 (Hill Farm, Boxted ³⁰)	36	7.2km
Tendring / Colchester Borders Garden Community	1100-1250	8.4km
NC1 (Residential Allocation)	300	8.4km
SS16 (Land at Elmstead Road)	25	9.8km
SS16 (Land behind Broadfields)	120	9.9km
SS7 (Great Horkesley Manor)	80	9.9km
EC2 (East Colchester / Hythe Special Policy Area)	TBC	10.0km
SS16 (Land behind the Fire Station, Colchester Road)	80	10.2km

Site Allocation	No. of Housing Units	Distance from Habitats Site (km)
NC2 (North Station Special Policy Area)	TBC	10.3km
EC3 (East Bay Mill)	22	10.3km
SS7 (School Lane)	13	10.3km
EC3 (Land at Port Lane)	130	10.5km
EC3 (Magdalen Street sites)	TBC	10.7km
SS16 (Land off Croquet Gardens)	25	10.8km
TC3 (Vineyard Gate)	100	10.8km
TC3 (Land at Britannia Car Park)	150	10.9km
TC3 (Part of St Runwalds Car park)	40	11.0km
EC3 (Barrington Road/Bourne Road vacant site)	28	11.2km
NC3 (Land at Braiswick)	70	11.3km
EC3 (Place Farm)	30	11.4km
SC1 (ABRO Site)	171 - 304	11.4km
SC2 (Middlewick Ranges)	1000	11.5km
WC4 (Essex County Hospital site, Lexden Road)	120	11.8km

³⁰ It is noted that this allocation is already developed and so longer needs to be considered as part of the HRA. However, it has been included in line with the precautionary principle.

Site Allocation	No. of Housing Units	Distance from Habitats Site (km)
SS13 (Rowhedge Business Centre)	40	12.2km
Total²⁹	3760 to 4043	-

4.88 A significant number of housing units are proposed within the ZOI of the SPA and Ramsar which will result in increased levels of recreation in the local area. This has potential to result in increased recreational pressure on the SPA and Ramsar as a result of proposed development within the Local Plan and will require appropriate avoidance and mitigation measures to ensure no adverse effect on the integrity of the SPA and Ramsar.

4.89 There is potential for likely significant effects to occur in relation to impacts from recreation and therefore requires further consideration at appropriate assessment.

Abberton Reservoir SPA and Ramsar

4.90 The SPA supports a number of overwintering waterbird species, which are vulnerable to disturbance and damage to features of importance, such as feeding and roosting sites, from a range of land and air-based activities. This includes walking, bird watching, occasional trespassing and low-flying civilian and military aircraft. It should be noted that dog walking, which typically represents one of the most significant disturbance factors to sites designated for birds, is not permitted within the reserve.

4.91 The visitor surveys completed by Colchester Borough Council reported that 65% of the groups surveyed at Abberton during June 2013 were fairly local travelling 10 miles (c. 16km) or less to Abberton Reservoir. Just over 51% lived in Colchester Borough. 52% of visitors at Abberton Reservoir said that they visited because the site is close to home. However, only 14% of visitors to Abberton Reservoir travelled under 5 miles (8km).

4.92 A review of site allocations within 16km of the SPA and Ramsar identified that all residential site allocations are within 16km. Therefore, all residential allocations have potential to contribute to increased recreational pressure in the Habitats sites. This is detailed in **Table 4.3** below.

Table 4.3: Site Allocations within 16km of Abberton Reservoir SPA and Ramsar

Site Allocation	No. of Housing Units	Distance from Habitats Site (km)
SS1 (Land to the west of Peldon Road)	50	0.6km
SS1 (Land to the east of Peldon Road)	5	0.8km
SS10 (Layer de la Haye)	70	1.0km
SC1 (South of Berechurch Hall Road)	150	1.9km
SC1 (Land at Gosbecks Phase 2)	150	2.7km
SC2 (Middlewick Ranges)	1000	2.8km
SS14 (Tiptree)	400	3.2km
SS13 (Rowhedge Business Centre)	40	3.3km
EC3 (Place Farm)	30	4.0km
WC2 (Land off Dyers Road including Fiveways Fruit Farm)	490	4.1km
WC4 (Land at Irvine Road)	8	4.2km
EC3 (Barrington Road/Bourne Road vacant site)	28	4.3km
SS12B (Coast Road, West Mersea ³¹)	TBC	4.4km
SC1 (ABRO Site)	171 - 304	4.7km
EC2 (East Colchester / Hythe Special Policy Area)	TBC	4.8km
EC3 (Land at Port Lane)	130	4.8km

³¹ It is noted that this policy is a special area policy and does not provide site allocations. However, it does promote development and has therefore been assessed in line with the precautionary principle.

Site Allocation	No. of Housing Units	Distance from Habitats Site (km)
WC4 (Essex County Hospital site, Lexden Road)	120	4.9km

SS3 (Chappel and Wakes Colne)	30	11.3km
SS9 (Wick Road)	10	11.7km
SS9 (School Road)	70	12.2km
SS2 (Hill Farm, Boxted ³⁰)	36	12.5km
Total²⁹	6673 to 6956	-

4.93 A significant number of housing units are proposed within the ZOI of the SPA and Ramsar, which will result in increased levels of recreation in the local area. This has potential to result in increased recreational pressure on the SPA and Ramsar as a result of proposed development within the Local Plan and will require appropriate avoidance and mitigation measures to ensure no adverse effect on the integrity of the SPA and Ramsar.

4.94 There is potential for likely significant effects to occur in relation to impacts from recreation and therefore requires further consideration at appropriate assessment.

Blackwater Estuary (Mid-Essex Coast Phase 4) SPA and Ramsar site

4.95 The SPA and Ramsar site supports large numbers of waterbirds, as well as breeding and overwintering birds, which

are vulnerable to disturbance and damage to features of importance, such as feeding and roosting sites, from a range of land and water-based activities. These include dog walking, walking, watersports, fishing, wildfowling and military training. In addition to this, there is potential for damage to saltmarsh habitat which is a qualifying feature of the Ramsar site as a result of trampling and associated recreational impacts.

4.96 Visitor survey work undertaken as part of the Essex Coast RAMS has recommended a 22km ZOI for the site. This encompasses all of Colchester borough and is therefore likely to be affected by increased recreational pressure associated with increases in visitor pressures at the SPA/Ramsar. This is detailed in **Table 4.4** below.

Table 4.4: Site Allocations within 22km of Blackwater Estuary (Mid-Essex Coast Phase 4) SPA and Ramsar site

Site Allocation	No. of Housing Units	Distance from Habitats Site (km)

Total²⁹	6673 to 6956	-

4.97 Specific mitigation and appropriate policy safeguards are likely to be required to provide certainty that mitigation can prevent impacts to the integrity of the SPA and Ramsar.

4.98 Housing and associated population growth within the south of Colchester in particular as a result of the Local Plan is

likely to result in significant effects on the Blackwater Estuary SPA and Ramsar as a result of recreational pressure.

4.99 There is potential for likely significant effects to occur in relation to impacts from recreation and therefore requires further consideration at appropriate assessment.

Outer Thames Estuary SPA

4.100 Outer Thames Estuary is designated for qualifying red-throated diver, which are reliant on marine habitats to forage over the winter. Although, red-throated divers are highly mobile during the winter and are able to use a range of marine habitats, this species tends to be faithful to their foraging sites and show a strong stress response to changes. Due to these factors there is potential for this species to be affected by increased water-based recreational activities within the SPA as a result of increased housing within the Borough.

4.101 There is potential for likely significant effects from increased recreation in-combination with other plans and policies to occur and therefore requires further consideration at appropriate assessment.

Water Quantity and Quality

4.102 An increase in demand for water abstraction and treatment resulting from the growth proposed in the Plan could result in changes in hydrology at Habitats sites. Depending on the qualifying features and particular vulnerabilities of the Habitats sites, this could result in likely significant effects; for example, due to changes in environmental or biotic conditions, water chemistry and the extent and distribution of preferred habitat conditions. To fully understand the potential impacts of proposed development on Habitats sites a review of relevant Water Cycle Studies (WCS) and liaison with the Environment Agency and relevant water companies will be required.

Abberton Reservoir SPA and Ramsar

4.103 The SPA and Ramsar site support water bird assemblages, which are dependent on water quantity and quality. Any changes in water quantity and quality therefore have the potential to significantly impact the Habitats sites.

4.104 There is no direct source-path-receptor model for the transmission of factors which could affect water quality between this site and development specified within the Local Plan, therefore no changes in water quality are predicted.

4.105 The HRA of the Braintree Site Allocations and Development Management Plan noted that Abberton Reservoir was experiencing lower water levels and higher demand from public use. However, from 2009 to 2012 the Abberton Reservoir underwent an expansion scheme to meet

the predicted rise in water demand. Crucially, the Abberton Reservoir does not supply water to housing or businesses in the Borough.

4.106 The HRA³² noted that Essex and Suffolk Water (ESW) recently completed the expansion of Abberton Reservoir in order to cater for increasing demand. The environmental effects of this were considered in the Braintree Water Cycle Study¹⁸, and the ESW Water Resource Management Plan¹⁹. The capacity of Abberton Reservoir has been increased by 58%²⁰. The latest ESW Water Resource Management Plan states that the Abberton resource scheme means that the Essex Water Resource Zone is now in surplus until 2040³³. The lowering of water levels at Abberton Reservoir is not listed as a key vulnerability or factor currently affecting the site, and given the enhanced reservoir, which has been subject to extensive study, this issue does not require further consideration in this HRA Screening assessment.

4.107 No likely significant effect to the SPA and Ramsar are predicted as a result changes in water quantity and quality either alone or in-combination with other plans and projects.

Essex Estuaries SAC

4.108 The SAC supports tidal and estuarine habitats, including mudflats, sandflats, Atlantic salt meadows and estuarine habitat. These habitats are dependent on water and are therefore likely to be vulnerable to changes in water quantity and quality. An increase in demand for water and water treatment from development within the Local Plan therefore has the potential to significantly affect qualifying features of the SAC.

4.109 The most recent Colchester Water Cycle Study³⁴ (WCS) was completed in 2016 and forms part of the evidence base for the Local Plan. The WCS found that only Langham Water Recycling Centre (WRC), which discharges into the River Stour, does not have sufficient capacity to accept all growth within the plan period. All other WRCs serving the Borough have sufficient capacity to accommodate additional wastewater from the proposed increase in development. The WCS concluded that, allowing for the planned resource management of Anglian Water Services South Essex Resource Zone, Colchester would have adequate water supply to cater for growth over the plan period.

4.110 No Likely Significant Effects to Essex Estuaries SAC are predicted in relation to water quantity and quality either alone or in-combination with other plans or projects

Colne Estuary (Mid-Essex Coast Phase 2) SPA and Ramsar

4.111 The Colne Estuary SPA and Ramsar site support breeding little tern, overwintering water birds, estuarine habitats including saltmarsh, and scarce plants and invertebrates. These qualifying features are dependent on water and are therefore likely to be vulnerable to changes in water quantity and quality. An increase in demand for water and water treatment from development within the Local Plan would have potential to result in significant effects on the SPA and Ramsar site.

4.112 The Haven Gateway Water Cycle Study (HGWCS) study found that the sub-region water supply zone supported a number of water abstraction licences of which some were not fully utilised with a surplus of 66.5Ml/d identified when the licensed abstraction volume (CAMS) was compared against the average volume abstracted. The Lower Colne forms part of the SAC. However, the study confirmed that there are no known issues in relation to water capacity and supply at the abstraction site at this location. As a result, the Local Plan will not result in Likely Significant Effects on the SPA or Ramsar as a result of changes in water quantity.

4.113 The most recent Colchester Water Cycle Study³⁵ was completed in 2016 and found that only Langham Water Recycling Centre (WRC), which discharges into the River Stour, does not have sufficient capacity to accept all growth within the plan period. All other WRCs serving the Borough have sufficient capacity to accommodate additional wastewater in terms of water quality and quantity from the proposed increase in development.

4.114 No Likely Significant Effects to Colne Estuary (Mid-Essex Coast Phase 2) SPA and Ramsar are predicted in relation to water quantity and quality either alone or in-combination with other plans or projects

Stour and Orwell Estuaries SPA and Ramsar site

4.115 The SPA and Ramsar site support qualifying bird species, which are reliant on coastal and estuarine habitat. These habitats are water-dependent and are susceptible to

³² LUC (2018), HRA Screening Report for Braintree District Local Plan

³³ Essex and Suffolk Water (October 2014) Final Water Resources Management Plan 2014

³⁴ AECOM (2016). The Colchester Borough Council Water Cycle Study 2016

³⁵ AECOM (2016). The Colchester Borough Council Water Cycle Study 2016

changes in water quantity and quality. Development therefore has the potential indirectly to affect the integrity of the Habitats sites by reducing the extent or quality of feeding resources or by changing the environmental conditions upon which habitats and species depend.

4.116 The most recent Colchester Water Cycle Study³⁶ was completed in 2016 and found that Langham Water Recycling Centre (WRC), which discharges into the River Stour, does not have sufficient capacity to accept all growth within the plan period. Allocations within the following policies flow to Langham WRC:

- Policy SS2 (Boxted)
- Policy SS9 (Langham)

4.117 The WCS concluded that solutions are required in order to accommodate the growth to ensure that the increased wastewater flow discharged does not impact on the current quality of the receiving watercourses, their associated ecological sites and also to ensure that the watercourses can still meet with legislative requirements.

4.118 In summary, the increased demand for water treatment across Colchester Borough, particularly as a result of housing and employment development at Langham and Boxted, has the potential to result in Likely Significant Effects on the Stour and Orwell Estuaries SPA and Ramsar site as a result of changes in water quality, and therefore further consideration is required at the Appropriate Assessment stage to determine whether the Local Plan will result in adverse effects on integrity, either alone or in-combination.

Blackwater Estuary SPA and Ramsar

4.119 The SPA and Ramsar site support water birds, habitats and invertebrate species which are dependent on water levels and quality. Any changes in water quantity and quality therefore have the potential to significantly impact these Habitats sites.

4.120 The most recent Colchester Water Cycle Study was completed in 2016 and found that only Langham Water

Recycling Centre (WRC), which discharges into the River Stour, does not have sufficient capacity to accept all growth within the plan period. All other WRCs serving the Borough have sufficient capacity to accommodate additional wastewater treatment in terms of quantity and quality from the proposed increase in development.

4.121 Due to this and the absence of a source-path-receptor in terms of impacts associated with water quality and quantity it is unlikely that Likely Significant Effects will occur in relation to water related issues. In addition to this no WRC discharging water into or near to the SPA and Ramsar site exceeded or is predicted to exceed consented discharge levels.

4.122 No Likely Significant Effects to Blackwater Estuary (Mid-Essex Coast Phase 4) SPA and Ramsar site are predicted in relation to water quantity and quality either alone or in-combination with other plans or projects.

Hamford Water SAC, SPA and Ramsar / Outer Thames Estuary SPA, Foulness (Mid-Essex Coast Phase 5) SPA and Ramsar, Crouch and Roach Estuaries (Mid-Essex Coast Phase 3) SPA and Ramsar and Dengie (Mid-Essex Coast Phase 1) SPA and Ramsar

4.123 These Habitats sites support qualifying features, which are dependent on water resources along the coastline. Due to the lack of hydrological connectivity between these Habitats and the Borough, **no likely significant effect to these Habitats Sites are predicted as a result changes in water quantity and quality either alone or in-combination with other plans and projects.**

Summary of Screening Assessment

4.124 Table 4.5 below summarises the Screening conclusions reached in this HRA. Impact types for which a conclusion of No Likely Significant Effect (LSE) was reached are shown with no colour. Those potential impacts where LSEs cannot be ruled out are shown in orange and these are considered in more detail at the Appropriate Assessment stage in **Section 5**.

Chapter 5

Appropriate Assessment

5.1 Following the screening stage, the plan-making authority is required under Regulation 102 of the Habitats Regulations 2017 (as amended) to make an 'Appropriate Assessment' of the implications of the plan for Habitats sites, in view of their conservation objectives.

5.2 European Commission Guidance³⁷ states that the Appropriate Assessment should consider the impacts of the plan (either alone or in combination with other projects or plans) on the integrity of Habitats sites with respect to their conservation objectives and to their structure and function.

5.3 This stage seeks to determine whether implementation of the Local Plan will result in an adverse effect on the integrity of the whole Habitats site in question (many Habitats sites are made up of a number of fragments of habitat). It also considers the potential for in-combination effects from development proposed in neighbouring authorities' Local Plans and the overall quantum of housing within the North Essex Authorities as part of the Strategic Section 1 for Local Plans. Consideration was given to avoidance and mitigation measures that may be included in the Local Plan to reduce the likelihood and significance of effects on Habitats sites.

5.4 A Habitats site's integrity depends on it being able to sustain its 'qualifying features' (i.e. those Annex 1 habitats, Annex II species, and Annex 1 bird populations for which it has been designated) and to ensure their continued viability. A high degree of integrity is considered to exist where the potential to meet a Habitats site's conservation objectives is realised and where the Habitats site is capable of self-repair and renewal with a minimum of external management support. Appropriate Assessment therefore needs to focus on those impacts judged likely to have an effect on the qualifying features of Habitats sites, or where insufficient certainty regarding this remained at the screening stage.

5.5 Likely significant effects arising from the Local Plan, either alone or in-combination, were identified for the following sites and impact types:

- **Physical damage and loss** – in relation to Abberton Reservoir SPA and Ramsar, Blackwater Estuary (Mid-Essex Coast Phase 4) SPA and Ramsar, Colne Estuary

³⁷ Assessment of plans and projects significantly affecting European sites. Methodological guidance on the provisions of Article 6(3) and (4)

of the Habitats Directive 92/43/EEC. European Commission Environment DG, November 2001.

(Mid-Essex Coast Phase 2) SPA and Ramsar, Stour and Orwell Estuaries SPA and Ramsar, Hamford Water SPA and Ramsar

- **Recreation** – in relation to Essex Estuaries SAC, Abberton Reservoir SPA and Ramsar, Blackwater Estuary (Mid-Essex Coast Phase 4) SPA and Ramsar, Colne Estuary (Mid-Essex Coast Phase 2) SPA and Ramsar, Dengie SPA and Ramsar, Stour and Orwell Estuaries SPA and Ramsar and Outer Thames Estuary SPA.
- **Water Quantity and Quality** – in relation to Stour and Orwell Estuaries SPA and Ramsar.

5.6 Appropriate Assessment has been undertaken for these Habitats sites to determine whether the Local Plan will result in Adverse Effects on Integrity (AEoI).

5.7 The Appropriate Assessment focuses on those impacts that are judged likely to have a significant effect on the qualifying features of a Habitats site, or where insufficient certainty regarding this remained at the screening stage. As described in **Chapter 1**, a conclusion needs to be reached as to whether or not a policy or site allocation in the Local Plan would adversely affect the integrity of a Habitats site. To reach a conclusion, consideration was given to whether the predicted impacts of the proposals (either alone or in combination) have the potential to:

- Delay the achievement of conservation objectives for the site
- Interrupt progress towards the achievement of conservation objectives for the site
- Disrupt factors that help to maintain the favourable conditions of the site
- Interfere with the balance, distribution and density of key species that are the indicators of the favourable condition of the site

5.8 The conservation objectives for the above Habitats sites are to ensure that the integrity of the site is maintained or restored as appropriate, and to ensure that the site contributes to achieving the Favourable Conservation Status of its Qualifying Features, by maintaining or restoring:

- The extent and distribution of qualifying natural habitats
- The structure and function (including typical species) of qualifying natural habitats
- The supporting processes on which qualifying natural habitats rely

- The structure and function of the habitats of qualifying species
- The populations of qualifying species
- The distribution of qualifying species within the site

Physical Damage and Loss (Offsite Functionally Linked Land)

5.9 The Local Plan proposes development in areas where qualifying SPA and Ramsar bird species may make use of offsite habitat for foraging, roosting and loafing. All allocations were identified during the screening assessment as potentially resulting in likely significant effects on the following SPA and Ramsar sites as a result of physical damage and loss as a result of loss of offsite functionally linked habitat of potential importance to designated bird species:

- Abberton Reservoir SPA and Ramsar
- Blackwater Estuary (Mid-Essex Coast Phase 4) SPA and Ramsar
- Colne Estuary (Mid-Essex Coast Phase 2) SPA and Ramsar
- Stour and Orwell Estuaries SPA and Ramsar

5.10 The above sites share many of the bird species for which they are designated, and the site allocations specified within the Local Plan typically fall within the ranges of the qualifying bird species associated with several Habitats sites. Therefore, to avoid repetition, the assessment of adverse effects on the integrity of these sites as a result of loss of offsite foraging habitat has been considered on an allocation basis in this section. Nevertheless, where there are differences in the assessment findings between Habitats sites, this is made clear below.

5.11 A desk-based study was undertaken to identify potential impacts from proposed allocations on offsite habitat used by the qualifying bird species. The desk-based study has relied on a sequential approach, whereby if a site's suitability for qualifying bird species is considered negligible or low for a specific reason (e.g. distance or habitat type) no further investigations for that allocation were carried out. If, following the initial review of distance and habitat, a site's potential suitability for qualifying bird species could not be ruled out, a more detailed assessment including mapping of existing relevant bird records may be required. The initial desk study included the following components to inform the assessment:

- Identification of the bird species which are susceptible to the loss of the habitat types affected and ruling out those species unlikely to utilise the habitat types located within

the site allocations (e.g. species restricted to marine habitats).

- A review of aerial imagery and Magic Map Application to identify main habitat types and land use within each site allocation and establish their potential value for qualifying birds.
- Recognition of factors likely to affect suitability of allocations for bird species, including openness, size, shape, proximity of negative factors such as tall boundary features and urban environs, and potential existing sources of disturbance.
- Consideration of the site's location within the landscape. For example, is there direct functional connectivity along flight lines between the allocation and the Habitats sites? Are there landscape scale features which would reduce

the suitability of the allocation, e.g. urban areas located along flight lines?

- A review of the site's location within flood risk zones, because many of the SPA bird species favour sites which do or do not flood.

Bird habitat Preferences

5.12 Bird habitat preferences were cross referenced against the habitat types present within each allocation to determine the suitability of site allocations for qualifying species. Known habitat preferences are summarised in **Table 5.1 below**, which were taken from Birds of the Western Palearctic, British Trust for Ornithology. **Table 5.1** also assesses whether each bird species is susceptible to the loss of habitats located within the site allocations.

Table 5.1: Typical Habitat Preferences for Qualifying Bird Species

Bird Species	Season	Species habitat preferences (relative to season of designation)	Susceptible to loss of offsite habitat as a result of the Local Plan
Avocet	Wintering	Highly specialised needs most often met in lowland maritime regions. A taste for extensive highly saline tracts of still shallow water and flat bare sand, clay, or mud forming islands, ridges, spits, or margins. Also favours smaller and less saline pools, lagoons, muddy arms or deltas, and estuaries, and sheltered muddy tidal flats where ample loose sediment is rich in food organisms. Suitable habitat sometimes formed by artefacts such as saltpans, irrigation waters, polders, floodlands, and even purpose-made scrapes and flashes of water on nature reserves.	No – habitat types affected are of low importance for this species.
Hen harrier	Wintering	In winter, often on arable farmland or rough pastures, or on heathland, coastal sand-dunes, and marshy areas. Habitat selection largely governed by availability of preferred prey species which can be seized in the open; otherwise, not discriminating but choosing spacious, relatively undisturbed landscapes rather than areas in intensive human use.	Yes – may utilise arable and pasture in areas away from existing human settlements.
Golden plover	Wintering	In winter, attracted to mown grass or close-grazed pastures, and to stubbles, fallows, harvest fields, and other farmlands of open character, including floodlands. On coast, tends to neglect tidal flats of mud and sand and to prefer open ground above the foreshore, thus sharing more commonly with Lapwings than with other waders. Strong preference for short permanent pasture for feeding where invertebrate (including earthworm) abundance is highest. Will also utilise bare tilled ground but used more frequently for roosting and loafing than feeding.	Yes – may utilise arable and pasture.
Ruff	Wintering	Outside breeding season, the need for proximity between feeding, resting, and roosting places is reduced, with local movements of up to c.20km from one another sometimes being undertaken. Although dry grasslands, harvested	Yes – may utilise arable and pasture.

Bird Species	Season	Species habitat preferences (relative to season of designation)	Susceptible to loss of offsite habitat as a result of the Local Plan
		cornfields, airfields, and dried beds of seasonal water bodies may still be used, preference is much stronger for muddy margins of lakes, pools, ponds, rivers and other watercourses, irrigated levels, floodlands, and marshes; less frequently seashores and tidal mudflats.	
Little tern	Breeding	Frequently coast dwelling, more along mainland than on islands, but spreads freely up suitable reaches of major rivers and to some lakes where suitable conditions occur. Strongly prefers linear strips of bare shingle, shell beach, or sand, only just above normal tide or flood limits, and often only a few metres from shallow clear water, saline or fresh, where fish of suitable size can be caught by plunging, without necessity for extended foraging flights.	No – habitat types affected are of low importance for this species.
Shelduck	Wintering	Choice of wetland, especially for breeding, governed by attachment to salt or brackish water, either shallow coasts and estuaries or inland seas and lakes. As a coastal species, typically ranges only 1-2km out to sea and little further inland. Wholly freshwater habitats distant from sea used only sporadically and by odd pairs or single birds. Needs foraging areas of fairly high productivity, especially sands and mud flats over which shallow water alternates with drying out through tides or evaporation.	No – habitat types affected are of low importance for this species.
Redshank	Wintering	Outside breeding season predominately coastal, feeding mainly on unvegetated tracts of mud on estuaries, marine inlets, and sheltered bays, tending to avoid cliffed and rocky or shingly sectors, and beaches of pure sand. When remaining inland, concentrates at points of ample food resources, such as sewage farms and watersides. As much a wading as a ground bird; swims not infrequently.	No – habitat types affected are of low importance for this species.
Knot	Wintering	Marine intertidal habitat used during rest of year, normally where large flat muddy, sandy, and pebbly beaches uncovered. At high water, often resists being driven back to vegetated zone behind foreshore, and so forced to pack densely at certain spots.	No – habitat types affected are of low importance for this species.
Dunlin	Wintering	Increasingly, towards south of range, favours lowland and grassland coastal habitat, especially in late summer, including salt-marshes, rough grazing land, sand dunes or sandy machair with moist depressions and river flood plains. Presence of surface water, and of unvegetated patches or short grass, moss, or other low herbage essential. Outside breeding season, strongly attracted to broad coastal beaches, especially mudflats rich in invertebrate food accessible as tide ebbs, but also occurs regularly on lagoons, estuaries, tidal rivers, and margins of lakes and other freshwater bodies as well as sewage farms.	Yes – may utilise pasture where regular flooding occurs.
Black-tailed godwit	Wintering	During breeding, typically favours marshy hummocky moorland but changes in land management have created new habitat and poorly drained pastures, damp heaths	Yes – despite a preference for coastal habitat outside the breeding period this

Bird Species	Season	Species habitat preferences (relative to season of designation)	Susceptible to loss of offsite habitat as a result of the Local Plan
		free of scrub, or border of reedy wetland are of primary importance. But other grasslands managed as meadows, especially when grazed and hay-cut and flooded in winter are also used. Outside the breeding season, favoured habitats include sewage farms, lake margins, tidal marshes, mudflats and sheltered coastal inlets.	species may use flooded pasture and other grasslands for feeding.
Dark-bellied brent goose	Wintering	On leaving breeding quarters, resorts to shallow sea coasts and estuaries, especially with extensive mudflats rich in sea grass. Strongly attached to intertidal feeding zones, but in Britain since 1970's increasing numbers have moved inland to feed on grass and cultivated crops. When not feeding, prefers to rest or sleep on sea surface.	Yes - this species may use pasture and arable fields.
Wigeon	Wintering	Winter habitat lowland and largely maritime, especially along coasts where shallow, fairly sheltered waters and extensive tracts of mud, sand, or salt marsh offer sustenance and security for gatherings. Freshwater and brackish lagoons and tracts of flooded grassland also attractive, and may be used in preference to coastal waters.	Yes- may use flooded pasture.
Teal	Wintering	On passage or in winter will frequent open habitats such as shallow tidal coasts, large estuaries, salt-marshes, and lagoons, brackish or saline, flooded fields, and artificial waters such as reservoirs devoid of vegetation.	Yes – may use flooded fields.
Goldeneye	Wintering	In winter, more opportunistic than most relatives, resorting indiscriminately to fresh and salt water with, however, some apparent bias towards estuaries and marine bays, sheltered shallow coasts, and sewage outfalls.	No – habitat types affected are of low importance for this species.
Cormorant	assemblage	Mainly aquatic, in both salt and fresh waters.	No – habitat types affected are not suitable for this species.
Gadwall	Winter	In winter, tends towards local concentration in suitable shallow sheltered parts of large wetlands, lakes, deltas, estuaries, or lagoons.	No – habitat types affected are not suitable for this species.
Pintail	Winter	In winter prefers sheltered coastal habitats, especially on estuaries, floodlands and inland waters nearby. Also feeds on farmland including stubble.	Yes – may use farmland including stubble fields for feeding.
Great crested grebe	Winter	Aquatic on a range of types of open water	No – habitat types affected are not suitable for this species.
Oystercatcher	Wintering	Governed by varying reliance upon successful adaptation to feeding on hard-shelled marine molluscs in intertidal shore zones, and more generalised capacity for feeding on softer-bodied invertebrates, terrestrial as well as marine. Locally, also, need to suitable secure roosts at high tide and acceptable nest sites with easily accessible feeding areas can be limiting factors. Consequently	No – This species may utilise a range of terrestrial habitats but is primarily reliant on marine habitats and the importance of habitats within the site allocations is low.

Bird Species	Season	Species habitat preferences (relative to season of designation)	Susceptible to loss of offsite habitat as a result of the Local Plan
		primarily tied to shorelines which can be fed on at low tide, and secondarily to lakesides, riversides, and a wide variety of terrestrial open ground where less specialized feeding techniques can be employed.	
Ringed plover	Passage and Wintering	A bird of sea coasts. Secondarily occupies adjoining hinterlands up to substantial distance inland, where estuaries, rivers, lakes, tundra, gravel beds, sand bars, grasslands of sparse and low growth, or other suitable well-drained terrain exists. Whether breeding, migrating or wintering, tends to be most numerous and concentrated on wide sandy or shingle tidal beaches, with access to suitable resting or nesting places above high-water mark.	No – habitat types affected are of low importance for this species.
Grey plover	Wintering	After breeding, some use of inland staging points, often by lakes on sand bars, mudflats, pools, and moist places, including short grassy fields and floodlands. Most, however, make straight for the sea coast where in contrast to golden plover, they concentrate mainly in the intertidal zone, on broad mudflats or sandy beaches, and to lesser extent on saltings, islets subject to occasional submergence, and neighbouring freshwater pools.	No – This species may utilise a range of terrestrial habitats but is primarily a marine feeding bird and the importance of habitats within the site allocations is low.
Lapwing	Wintering	Requires ready access to soil carrying appreciable biomass of surface or subsurface organisms, not arid and preferably moist or near saturation. Invariably chooses unenclosed terrain affording unbroken all-round views. Throughout historical times, natural habitat has been encroached with suitable substitutes created through farming, with a shift from natural to agricultural land. Shares general habitat preferences with lapwing including a preference for short grazed permanent pasture and to a lesser extent, arable fields.	Yes - this species is heavily reliant on grasslands, particularly short permanent pastures, and will also utilise arable fields.
Curlew	Wintering	After breeding season, shifts mainly to marine coastal habitat, especially mudflats and sands extensively exposed at low tide, resting on adjoin saltmarshes, foreshores, and floodlands. Rocky beaches with many pools, muddy estuaries and comparable habitats beside large inland waters, including riverside and swamp edges are also favoured. This species is known to regularly utilise coastal grasslands and arable fields in large numbers.	Yes - this species is heavily reliant on grasslands, particularly those where flooding occurs. Will also utilise arable fields.
Turnstone	Wintering	Outside breeding season almost entirely coastal, preferring shores which are stony, rocky, or covered with seaweed, and similar artefacts such as sea walls and breakwaters, harbours, and jetties.	No – habitat types affected are of low importance for this species.

5.13 The review of habitat types located within the site allocations, in light of individual bird species preferences, identified the following species as being potentially susceptible

to the loss of offsite habitat associated with site allocations proposed within the Local Plan:

- Hen harrier

- Golden plover
- Ruff
- Dunlin
- Black-tailed godwit
- Dark bellied brent goose
- Widgeon
- Teal
- Pintail
- Lapwing
- Curlew

5.14 A summary of the relevant qualifying bird species associated with each of the SPA/Ramsar sites is provided in **Table 5.2** below.

Table 5.2: Qualifying bird species of Habitats sites susceptible to loss of offsite habitat

Key Bird Species Susceptible to loss of functionally linked land	Stour and Orwell SPA/ Ramsar	Blackwater Estuary SPA/ Ramsar	Colne Estuary SPA/ Ramsar	Abberton Reservoir SPA / Ramsar
Golden plover	√	√	√	√
Lapwing	√	√	√	√
Hen harrier	√	√	√	
Ruff		√		
Dunlin	√	√		
Black-tailed godwit	√	√		
Dark-bellied brent goose	√	√	√	
Widgeon	√			
Teal				√
Pintail	√			
Curlew	√			

5.15 Following a review of the species habitat preferences and on-going discussions with Natural England, which has confirmed typical winter foraging and roosting distances for the above species in North Essex, it has been agreed that, with the exception of lapwing and golden plover, the above species are unlikely to be reliant upon offsite habitats located further than 2km from the SPA/Ramsar sites. Golden plover and lapwing have been recorded travelling considerably

further to access preferred feeding areas and therefore a distance of 15km has been agreed for these species. Lapwing and golden plover are qualifying species for each of the Habitats sites assessed and the 15km distance encompasses each of the site allocations considered at this Appropriate Assessment stage. The specific bird species requiring consideration at each of the site allocations within the Local Plan is outlined in **Table 5.3** below.

Table 5.3: Bird species requiring consideration at each site allocation

Site Allocation Name	Bird Species requiring consideration based on distance from SPA/Ramsar sites
Tendring / Colchester Borders Garden Community	Golden plover and lapwing only.
TC3 (Land at Britannia Car Park)	Golden plover and lapwing only.

Site Allocation Name	Bird Species requiring consideration based on distance from SPA/Ramsar sites
TC3 (Vineyard Gate)	Golden plover and lapwing only.

SS9 (Employment Land)	Golden plover and lapwing only.
SS10 (Layer de la Haye)	Golden plover, lapwing and teal.
SS11 (The Anderson's site, Employment Land)	Golden plover and lapwing only.
SS12A (Dawes Lane)	Golden plover, lapwing, hen harrier, ruff, dunlin, black-tailed godwit and dark-bellied brent goose.
SS12A (Brierley Paddocks)	Golden plover, lapwing, hen harrier, ruff, dunlin, black-tailed godwit and dark-bellied brent goose

Site Allocation Name	Bird Species requiring consideration based on distance from SPA/Ramsar sites
SS12A (Employment Land)	Golden plover, lapwing, hen harrier, ruff, dunlin, black-tailed godwit and dark-bellied brent goose
SS12B (Coast Road, West Mersea ³¹)	Golden plover, lapwing, hen harrier, ruff, dunlin, black-tailed godwit and dark-bellied brent goose.
SS12C (Mersea Island Caravan Parks)	Golden plover, lapwing, hen harrier, ruff, dunlin, black-tailed godwit and dark-bellied brent goose.
SS13 (Rowhedge Business Centre)	Golden plover and lapwing only.
SS14 (Tiptree)	Golden plover and lapwing only.
SS14 (Employment Land, Tower Business Park)	Golden plover and lapwing only.
SS14 (Employment Land - Alexander Cleghorn)	Golden plover and lapwing only.
SS14 (Employment Land - Basketworks)	Golden plover and lapwing only.
SS14 (Employment Land – Tiptree Jam Factory)	Golden plover and lapwing only.
SS15 (West Bergholt)	Golden plover and lapwing only.
SS16 (Land behind the Fire Station, Colchester Road)	Golden plover, lapwing, hen harrier and dark-bellied brent goose.
SS16 (Land off Croquet Gardens)	Golden plover, lapwing, hen harrier and dark-bellied brent goose.
SS16 (Land behind Broadfields)	Golden plover, lapwing, hen harrier and dark-bellied brent goose.
SS16 (Land at Elmstead Road)	Golden plover and lapwing only.

Assessment of suitability of site allocations as offsite habitat

5.16 Following the establishment of typical habitat preferences for each species, and in light of existing bird records, each allocation site in the Local Plan was assessed for its suitability in supporting the relevant SPA birds. The assessment was based on a number of parameters, as described in **Table 5.3** below. Typically, site allocations displayed varying combinations of the parameters outlined below, and were therefore subject to professional judgement and interpretation.

Table 5.4: Habitat suitability rating criteria

Suitability for SPA and Ramsar Birds	Typical Description
High	Large sites; area of suitable habitat (e.g. wet grasslands, permanent pastures, arable) capable of supporting significant numbers of SPA birds; absence of any notable negative factors such as PRoW and edge features; land parcel functionally linked with wider habitat and directly linked to SPA/Ramsar via green corridor; site may be prone to flooding (although note absence of flooding favoured by lapwing and golden plover); typically close (within 2km) to SPA/Ramsar and coast.

Suitability for SPA and Ramsar Birds	Typical Description
Moderate	Sites support large areas of functionally linked suitable habitat capable of attracting numbers of SPA birds which by themselves are unlikely to be significant, but which may contribute to supporting significant numbers of birds in-combination with other sites. Likely to be further (over 2km) from SPA/Ramsar and coast, and with presence of some limiting factors.
Low	Smaller or fragmented sites; habitats present may be suitable for supporting low numbers of SPA birds on occasion but limited by negative factors such as size, distance from SPA/Ramsar; absence of sight lines and reductions in 'openness' as a result of edge features such as trees, scrub, and buildings; edge features likely to be close to centre of site; suitability may be compromised by existing recreational use; may be isolated within urban areas.
Negligible	Habitats present are entirely unsuitable for SPA birds, for example existing developed land or small urban infill sites.

Table 5.5: Suitability of Allocations for SPA and Ramsar Birds

Site Allocation Name	Review of Site Parameters	Assessment of Suitability for SPA Qualifying birds
TC3 (Land at Britannia Car Park)	Species considered: Golden plover and lapwing Urban landscape entirely unsuitable for SPA birds.	Negligible
TC3 (Vineyard Gate)	Species considered Golden plover and lapwing only Urban landscape entirely unsuitable for SPA birds.	Negligible
TC3 (Part of St Runwalds Car park)	Species considered: Golden plover and lapwing Urban landscape entirely unsuitable for SPA birds.	Negligible
NC1 (Northern Gateway Zone 1)	Species considered: Golden plover and lapwing Industrial buildings, surrounded by hardstanding with small areas of grassland, scrub, hedgerow and trees also present. Entire site bound by urban development or busy roads.	Negligible
NC1 (Northern Gateway Zone 2)	Species considered: Golden plover and lapwing Urban landscape with sports stadium, large gym, associated parking and two small areas of grassland bound by roads.	Negligible
NC1 (Northern Gateway Zone 3)	c.8.0km from Stour and Orwell Estuaries SPA and Ramsar c.9.3km from Colne Estuary (Mid-Essex Coast Phase 2) SPA and Ramsar c.9.3km from Abberton Reservoir SPA and Ramsar c.13.2km from Blackwater Estuary (Mid-Essex Coast Phase 4) SPA and Ramsar Species considered: Golden plover and lapwing Area: 44.1 Previously arable land which under development. Remaining habitats include a small arable field (5.1ha), grassland, hedgerows	Low

Site Allocation Name	Review of Site Parameters	Assessment of Suitability for SPA Qualifying birds
	and small woodland. New habitats include hardstanding and buildings. Disturbance likely high due to surrounding development and busy road to the south.	
NC1 (Employment land to west)	Species considered: Golden plover and lapwing Urban business park dominated by building and hardstanding with small isolated areas of grassland and scrub. Unsuitable for SPA birds.	Negligible
NC1 (Residential Allocation)	Species considered: Golden plover and lapwing Several shortly mown grass sports pitches with boundary hedgerows and some scrub. Disturbance likely to be high given the sports pitches.	Negligible
NC2 (North Station Special Policy Area)	Species considered: Golden plover and lapwing Urban landscape entirely unsuitable for SPA birds.	Negligible
NC3 (Land at Braiswick)	c.10.9km from Stour and Orwell Estuaries SPA and Ramsar c.9.0km from Colne Estuary (Mid-Essex Coast Phase 2) SPA and Ramsar c.7.3km from Abberton Reservoir SPA and Ramsar c.11.5km from Blackwater Estuary (Mid-Essex Coast Phase 4) SPA and Ramsar Area: 5.3Ha Species considered: Golden plover and lapwing Broadleaved woodland dominates the site, the west of which has a small brook. Two grassland fields (0.9ha and 1.1ha) with scrub bound by hedgerows or treelines are also present. A PRoW runs along the eastern boundary.	Low – part of the site has planning consent
EC1 (Knowledge Gateway)	Species considered: Golden plover and lapwing Largely developed university campus with buildings, hardstanding, amenity grassland and scattered trees. Considered unsuitable for SPA birds due to high disturbance and lack of suitable habitat.	Negligible
EC2 (East Colchester / Hythe Special Policy Area)	Species considered: Golden plover and lapwing Industrial landscape entirely unsuitable for SPA birds.	Negligible
EC3 (Land at Port Lane)	Species considered: Golden plover and lapwing Industrial landscape entirely unsuitable for SPA birds.	Negligible
EC3 (East Bay Mill)	Species considered: Golden plover and lapwing Small site (0.4Ha) comprised of tall ruderal, scrub, scattered trees and a mill adjacent a river. The site is located in an urban environment and bound by housing, allotments and a road, creating a lack of openness favoured by golden plover and lapwing.	Negligible

Site Allocation Name	Review of Site Parameters	Assessment of Suitability for SPA Qualifying birds
EC3 (Barrington Road/Bourne Road vacant site)	Species considered: Golden plover and lapwing Small site (1Ha) comprised of grassland, scrub and trees bound by dense urban housing. Surrounding housing and lack of openness make this site unsuitable for golden plover and lapwing.	Negligible
EC3 (Magdalen Street sites)	Species considered: Golden plover and lapwing Industrial landscape entirely unsuitable for SPA birds.	Negligible
EC3 (Place Farm)	c.3.2km from Colne Estuary (Mid-Essex Coast Phase 2) SPA and Ramsar c.4.0km from Abberton Reservoir SPA and Ramsar c.7.1km from Blackwater Estuary (Mid-Essex Coast Phase 4) SPA and Ramsar c.11.4km from Stour and Orwell Estuaries SPA and Ramsar Area 1.2Ha Species considered: Golden plover and lapwing Small area of pasture (0.7Ha), scrub, wooded belts and hedgerows bound by pasture to the east and urban housing to the west. The pasture lacks openness due to the surrounding hedgerows and wooded belts reducing the suitability for SPA birds. There is more extensive pasture within the adjacent land to the southeast.	Low
EC3 (Employment Sites)	Species considered: Golden plover and lapwing Industrial landscapes entirely unsuitable for SPA birds.	Negligible
SC1 (Employment Land at Gosbecks)	Species considered: Golden plover and lapwing Existing employment land with small undeveloped area of amenity grassland, trees and hedgerow.	Negligible
SC1 (Land at Gosbecks Phase 2)	c.2.7km from Abberton Reservoir SPA and Ramsar c.6.5km from Colne Estuary (Mid-Essex Coast Phase 2) SPA and Ramsar c.7km from Blackwater Estuary (Mid-Essex Coast Phase 4) SPA and Ramsar c.14.3km from Stour and Orwell Estuaries SPA and Ramsar Area: 6.0Ha Species considered: Golden plover and lapwing Southern parcel comprises a large arable field (5.1Ha) with south boundary mostly lined by hedgerow which adjoins further arable fields. Northern parcel comprises a smaller arable field (0.9Ha) bound by lines of trees and hedgerow but separated from south parcel by a road.	n/a - site has planning consent

Site Allocation Name	Review of Site Parameters	Assessment of Suitability for SPA Qualifying birds
SC1 (South of Berechurch Hall Road)	<p>c.1.9km from Abberton Reservoir SPA and Ramsar c.5.6km from Colne Estuary (Mid-Essex Coast Phase 2) SPA and Ramsar c.6.1km from Blackwater Estuary (Mid-Essex Coast Phase 4) SPA and Ramsar c.14.1km from Stour and Orwell Estuaries SPA and Ramsar Area: 7.1Ha</p> <p>Species considered: Golden plover, lapwing and teal</p> <p>Eastern parcel comprises large arable field (5Ha) bound by hedgerows with trees on southern boundary adjoining further arable fields. Western parcel comprises horse pasture with scattered trees, hedgerows and scrub.</p>	Moderate
SC1 (Land at Maldon Road / Shrub End)	<p>Species considered: Golden plover and lapwing Urban landscape entirely unsuitable for SPA birds.</p>	Negligible
SC1 (ABRO site)	<p>Species considered: Golden plover and lapwing Urban landscape entirely unsuitable for SPA birds.</p>	Negligible
SC2 (Middlewick Ranges)	<p>c.2.8km from Abberton Reservoir SPA and Ramsar c.3.3km from Colne Estuary (Mid-Essex Coast Phase 2) SPA and Ramsar c.6.2km from Blackwater Estuary (Mid-Essex Coast Phase 4) SPA and Ramsar c.11.5km from Stour and Orwell Estuaries SPA and Ramsar Area: 76Ha</p> <p>Species considered: Golden plover and lapwing</p> <p>A very large open site bordering a rural landscape to the south. The majority of the site comprises grassland with hedgerows and a wooded corridor following a brook.</p>	Moderate
WC1 (Stanway Economic Area – Zone 1)	<p>c.5.7km from Abberton Reservoir SPA and Ramsar c.9.8km from Blackwater Estuary (Mid-Essex Coast Phase 4) SPA and Ramsar c.10.3km from Colne Estuary (Mid-Essex Coast Phase 2) SPA and Ramsar</p> <p>Species considered: Golden plover and lapwing</p> <p>Mixed site with industrial land comprising building and hardstanding, an arable field (3Ha), and two areas of grassland (7.1Ha and 3.7Ha).</p> <p>The grassland parcels are adjoined by roads, housing and industrial land reducing their suitability for SPA birds. The arable field adjoin a more rural landscape with further arable land to the south and west. It is bound by hedgerow on the north, south and west boundaries</p>	Low

Site Allocation Name	Review of Site Parameters	Assessment of Suitability for SPA Qualifying birds
WC1 (Stanway Economic Area – Zone 2)	Species considered: Golden plover and lapwing Commercial landscape entirely unsuitable for SPA birds.	Negligible
WC2 (Land to the North of London Road)	c.6.4km from Abberton Reservoir SPA and Ramsar c.9.8km from Blackwater Estuary (Mid-Essex Coast Phase 4) SPA and Ramsar c.10.5km from Colne Estuary (Mid-Essex Coast Phase 2) SPA and Ramsar Area: 35Ha Species considered: Golden plover and lapwing Sites comprises one large arable field (20Ha) bound by hedgerows in the north and a series of grassland fields with hedgerows, scattered trees and scrub in the south. This arable field lies adjacent south of the A12, north of which is a rural landscape. A PRoW dissects the large arable field.	Moderate
WC2 (Land off Dyers Road including Fiveways Fruit Farm)	c.4.1km from Abberton Reservoir SPA and Ramsar c.8.3km from Blackwater Estuary (Mid-Essex Coast Phase 4) SPA and Ramsar c.8.4km from Colne Estuary (Mid-Essex Coast Phase 2) SPA and Ramsar Area: 27Ha Species considered: Golden plover and lapwing Large site predominately comprised of arable land with woodland and a complex network of hedgerows. Urban development borders the site to the north, all other aspects are rural landscapes.	Moderate
WC2 (Land to the West of Lakelands)	c.5.5km from Abberton Reservoir SPA and Ramsar c.9.6km from Blackwater Estuary (Mid-Essex Coast Phase 4) SPA and Ramsar c.9.6km from Colne Estuary (Mid-Essex Coast Phase 2) SPA and Ramsar Species considered: Golden plover and lapwing Area: 3.7ha A small parcel of a larger arable field and grassland (recently disturbed). The arable field backs on other arable fields.	Moderate
WC2 (Land at Chitts Hill)	c.6.3km from Abberton Reservoir SPA and Ramsar c.9.9km from Colne Estuary (Mid-Essex Coast Phase 2) SPA and Ramsar c.10.5km from Blackwater Estuary (Mid-Essex Coast Phase 4) SPA and Ramsar Area: 6.7Ha	n/a – site has planning consent

Site Allocation Name	Review of Site Parameters	Assessment of Suitability for SPA Qualifying birds
	<p>Species considered: Golden plover and lapwing</p> <p>Arable field bound by hedgerow and mature tree belt. A railway line is present adjacent north, beyond which there is further arable land. Other bordering land comprises residential housing and amenity grassland.</p>	
<p>WC3 (Colchester Zoo)</p>	<p>c.6.3km from Abberton Reservoir SPA and Ramsar c.9.9km from Colne Estuary (Mid-Essex Coast Phase 2) SPA and Ramsar c.10.5km from Blackwater Estuary (Mid-Essex Coast Phase 4) SPA and Ramsar</p> <p>Species considered: Golden plover and lapwing</p> <p>Area: 63Ha</p> <p>Much of the site is already developed and comprises predominantly hardstanding and buildings. To the east the site is undeveloped and is dominated by two large arable fields (15.2Ha and 8.3Ha). The arable fields have PRow (footpath and bridleway) and are bound largely by woodland and hedgerow. Notably there is a river along the site's southern boundary. The general landscape surrounding the site is rural.</p>	<p>Moderate</p>
<p>WC4 (Essex County Hospital site, Lexden Road)</p>	<p>Species considered: Golden plover and lapwing</p> <p>Urban landscape entirely unsuitable for SPA birds.</p>	<p>Negligible</p>
<p>WC4 (Land at Irvine Road)</p>	<p>Species considered: Golden plover and lapwing</p> <p>A small site (0.6Ha) comprising an orchard and grassland. Surrounded by dense urban development on all aspects.</p>	<p>Negligible</p>
<p>SS1 (Land to the west of Peldon Road)</p>	<p>c.0.6km from Abberton Reservoir SPA and Ramsar c.1.6km from Colne Estuary (Mid-Essex Coast Phase 2) SPA and Ramsar c.2.7km from Blackwater Estuary (Mid-Essex Coast Phase 4) SPA and Ramsar</p> <p>Area: 1.21Ha</p> <p>Species considered: Golden plover, lapwing, teal, hen harrier and dark-bellied brent goose</p> <p>A small arable field to the south bound by hedgerow and bordering further arable land. To the north there is a mostly grassland with scrub and hedgerow. Suitable for all SPA birds considered except teal.</p>	<p>Low</p>
<p>SS1 (Land to the east of Peldon Road)</p>	<p>c.0.7km from Abberton Reservoir SPA and Ramsar c.1.8km from Colne Estuary (Mid-Essex Coast Phase 2) SPA and Ramsar c.2.8km from Blackwater Estuary (Mid-Essex Coast Phase 4) SPA and Ramsar</p> <p>Area: 0.4Ha</p>	<p>Low</p>

Site Allocation Name	Review of Site Parameters	Assessment of Suitability for SPA Qualifying birds
	<p>Species considered: Golden plover, lapwing, teal, hen harrier and dark-bellied brent goose</p> <p>Small area of grassland bound by hedgerow with scattered trees to the south of a residential area.</p>	
SS1 (Pantiles Farm employment land)	<p>Species considered: Golden plover, lapwing, teal, hen harrier and dark-bellied brent goose</p> <p>Existing employment land comprising building and hardstanding.</p>	Negligible
SS2 (Hill Farm, Boxted ³⁰)	<p>Species considered: Golden plover and lapwing</p> <p>The site has already been developed into housing and hardstanding. A small narrow strip of grassland remains.</p>	Negligible
SS2 (Employment Land)	<p>Species considered: Golden plover and lapwing</p> <p>The site is existing employment land dominated by buildings and hardstanding.</p>	Negligible
SS3 (Chappel and Wakes Colne)	<p>c.12.1km from Abberton Reservoir SPA and Ramsar Area: 1.7Ha</p> <p>Species considered: Golden plover and lapwing</p> <p>A small arable field bordered by a wooded railway line to the east and rural housing to the north. The landscape is largely rural with many nearby arable fields.</p>	Low
SS4 (East of Queensberry Avenue)	<p>c.6.7km from Abberton Reservoir SPA and Ramsar c.10.6km from Blackwater Estuary (Mid-Essex Coast Phase 4) SPA and Ramsar c.11.6km from Colne Estuary (Mid-Essex Coast Phase 2) SPA and Ramsar Area: 2.8Ha</p> <p>Species considered: Golden plover and lapwing</p> <p>Small parcel arable and woodland habitat which forms part of a larger arable field. There is residential housing the east, south and west whilst the north comprises an arable/woodland mosaic.</p>	Low
SS4 (West of Hall Road)	<p>c.6.7km from Abberton Reservoir SPA and Ramsar c.10.6km from Blackwater Estuary (Mid-Essex Coast Phase 4) SPA and Ramsar c.11.6km from Colne Estuary (Mid-Essex Coast Phase 2) SPA and Ramsar Area: 1.9Ha</p> <p>Species considered: Golden plover and lapwing</p> <p>Small open area of arable land which forms a parcel of a much arable field. Adjoins further arable land to the south and east.</p>	Low

Site Allocation Name	Review of Site Parameters	Assessment of Suitability for SPA Qualifying birds
SS6 (Fordham)	<p>c.10.5km from Abberton Reservoir SPA and Ramsar c.13.8km from Colne Estuary (Mid-Essex Coast Phase 2) SPA and Ramsar c.15.0km from Stour and Orwell Estuaries SPA and Ramsar Area: 0.6Ha Species considered: Golden plover and lapwing Arable field which has been previously used for horse pasture. Borders a substantial area of pasture to the east.</p>	Low
SS7 (Great Horkesley Manor)	<p>c.9.2km from Abberton Reservoir SPA and Ramsar c.10.1km from Colne Estuary (Mid-Essex Coast Phase 2) SPA and Ramsar c.10.5km from Stour and Orwell Estuaries SPA and Ramsar c.13.3km from Blackwater Estuary (Mid-Essex Coast Phase 4) SPA and Ramsar Area: 7.4Ha Species considered: Golden plover and lapwing Predominately arable habitat surrounding a manor and gardens. Borders a rural landscape to the east but is separated from this by a belt of plantation woodland. The site lacks openness due its layout with the moat central to the arable land.</p>	n/a – site has planning consent
SS7 (School Lane)	<p>Area: 0.6Ha Species considered: Golden plover and lapwing Small enclosed site comprising buildings, hardstanding, hedgerow grassland and scattered trees.</p>	Negligible
SS8 (Land on Brook Road)	<p>c.9.8km from Abberton Reservoir SPA and Ramsar c.13.1km from Blackwater Estuary (Mid-Essex Coast Phase 4) SPA and Ramsar c.14.4km from Colne Estuary (Mid-Essex Coast Phase 2) SPA and Ramsar Area: 0.7 Species considered: Golden plover and lapwing Small narrow arable field enclosed by hedgerow. Borders further arable land to the east and south.</p>	n/a – site has planning consent
SS8 (Land off Greenfield Drive)	<p>c.10.3km from Abberton Reservoir SPA and Ramsar c.13.6km from Blackwater Estuary (Mid-Essex Coast Phase 4) SPA and Ramsar c.14.9km from Colne Estuary (Mid-Essex Coast Phase 2) SPA and Ramsar Area: 1.7Ha Species considered: Golden plover and lapwing</p>	Low

Site Allocation Name	Review of Site Parameters	Assessment of Suitability for SPA Qualifying birds
	Part of a large open arable field which borders further arable/pasture land to the north, south and west.	
SS9 (Wick Road)	<p>c.5.2km from Stour and Orwell Estuaries SPA and Ramsar c.10.0km from Colne Estuary (Mid-Essex Coast Phase 2) SPA and Ramsar c.11.7km from Abberton Reservoir SPA and Ramsar Area: 1.1Ha Species considered: Golden plover and lapwing Small area of pasture alongside Wick Road.</p>	Low
SS9 (School Road)	<p>c.5.1km from Stour and Orwell Estuaries SPA and Ramsar c.10.7km from Colne Estuary (Mid-Essex Coast Phase 2) SPA and Ramsar c.12.2km from Abberton Reservoir SPA and Ramsar Area: 4.0Ha Species considered: Golden plover and lapwing The eastern parcel comprises small parcel of pasture (2.2Ha) enclosed by hedgerow. It borders housing to the north and east, arable land to the south and commercial units to the west. The western parcel comprises a small part (1.8Ha) of much larger arable field (17.7Ha) which border further arable land to the east, south and west.</p>	Low
SS9 (Employment Land)	<p>Species considered: Golden plover and lapwing The site is existing employment land dominated by buildings and hardstanding.</p>	Negligible
SS10 (Layer de la Haye)	<p>c.1km from Abberton Reservoir SPA and Ramsar c.4.6km from Colne Estuary (Mid-Essex Coast Phase 2) SPA and Ramsar c.4.9km from Blackwater Estuary (Mid-Essex Coast Phase 4) SPA and Ramsar Area: 3.0Ha Species considered: Golden plover, lapwing and teal Arable land bound by hedgerows and treelines. Borders residential housing the south and west and a more rural landscape, including arable, to the north and east. Suitable for golden plover and lapwing only.</p>	Moderate
SS11 (The Anderson's site, Employment Land)	<p>Species considered: Golden plover and lapwing The site is existing employment land dominated by buildings and hardstanding.</p>	Negligible
SS12A (Dawes Lane)	c.0.9km from Blackwater Estuary (Mid-Essex Coast Phase 4) SPA and Ramsar	n/a – site has planning consent

Site Allocation Name	Review of Site Parameters	Assessment of Suitability for SPA Qualifying birds
	<p>c.1.0km from Colne Estuary (Mid-Essex Coast Phase 2) SPA and Ramsar</p> <p>c.5.2km from Abberton Reservoir SPA and Ramsar</p> <p>Area: 3.9Ha</p> <p>Species considered: Golden plover, lapwing, hen harrier, ruff, dunlin, black-tailed godwit and dark-bellied brent goose</p> <p>Large open arable field bordering further arable land to the north and east. Suitable for all SPA birds considered except dunlin and black-tailed godwit.</p>	
SS12A (Brierley Paddocks)	<p>c.1.0km from Colne Estuary (Mid-Essex Coast Phase 2) SPA and Ramsar</p> <p>c.1.3km from Blackwater Estuary (Mid-Essex Coast Phase 4) SPA and Ramsar</p> <p>c.5.6km from Abberton Reservoir SPA and Ramsar</p> <p>Area: 8.9Ha</p> <p>Species considered: Golden plover, lapwing, hen harrier, ruff, dunlin, black-tailed godwit and dark-bellied brent goose</p> <p>Large open arable field bordering further arable land to the east.</p>	n/a – site has planning consent
SS12A (Employment Land)	<p>Species considered: Golden plover, lapwing, hen harrier, ruff, dunlin, black-tailed godwit and dark-bellied brent goose</p> <p>The site is existing employment land dominated by buildings and hardstanding.</p>	Negligible
SS12B (Coast Road, West Mersea ³¹)	<p>Within Blackwater Estuary (Mid-Essex Coast Phase 4) SPA and Ramsar</p> <p>c.2.2km from Colne Estuary (Mid-Essex Coast Phase 2) SPA and Ramsar</p> <p>c.4.5km from Abberton Reservoir SPA and Ramsar</p> <p>Species considered: Golden plover, lapwing, hen harrier, ruff, dunlin, black-tailed godwit and dark-bellied brent goose</p> <p>Dense coastal development unsuitable for SPA birds.</p>	Negligible
SS12C (Mersea Island Caravan Parks)	<p>Species considered: Golden plover, lapwing, hen harrier, ruff, dunlin, black-tailed godwit and dark-bellied brent goose</p> <p>The sites are all existing caravan parks. The caravans are present at a high density with amenity grassland between them. Recreational disturbance at these sites is likely to be very high.</p>	Negligible
SS13 (Rowhedge Business Centre)	<p>c.2.2km from Colne Estuary (Mid-Essex Coast Phase 2) SPA and Ramsar</p> <p>c.3.3km from Abberton Reservoir SPA and Ramsar</p> <p>c.6.1km from Blackwater Estuary (Mid-Essex Coast Phase 4) SPA and Ramsar</p> <p>c. 12.2km from Stour and Orwell Estuaries SPA and Ramsar</p> <p>Area: 5.0Ha</p>	Low

Site Allocation Name	Review of Site Parameters	Assessment of Suitability for SPA Qualifying birds
	<p>Species considered: Golden plover and lapwing</p> <p>Mixed site with building, hardstanding, woodland, hedgerows and three small grassland fields. The grassland fields are small, enclosed by hedgerows and appear intensively managed which reduces their suitability for SPA birds.</p>	
SS14 (Tiptree)	<p>400 dwellings to be allocated in in the Tiptree Neighbourhood Plan³⁸ and not the Local Plan.</p> <p>c.5km from Abberton Reservoir SPA and Ramsar</p> <p>c.7km from Blackwater Estuary (Mid-Essex Coast Phase 4) SPA and Ramsar</p> <p>c.12km from Colne Estuary (Mid-Essex Coast Phase 2) SPA and Ramsar</p> <p>Species to be considered: Golden plover and lapwing</p>	To be determined when allocated sites are published in the emerging Tiptree Neighbourhood Plan.
SS15 (West Bergholt, Site A)	<p>Allocations designated in the West Bergholt Neighbourhood Plan³⁹.</p> <p>c.8.5km from Abberton Reservoir SPA and Ramsar</p> <p>c.10.9km from Colne Estuary (Mid-Essex Coast Phase 2) SPA and Ramsar</p> <p>c.12.3km from Stour and Orwell Estuaries SPA and Ramsar</p> <p>c.12.7km from Blackwater Estuary (Mid-Essex Coast Phase 4) SPA and Ramsar</p> <p>Area: 2.3Ha</p> <p>Species considered: Golden plover and lapwing</p> <p>Large private garden and a part of a small enclosed arable field, borders further arable land to the north-east. Borders housing to the south and west.</p>	Low
SS15 (West Bergholt, Site B)	<p>Allocations designated in the West Bergholt Neighbourhood Plan³⁹.</p> <p>c.8.2km from Abberton Reservoir SPA and Ramsar</p> <p>c.10.6km from Colne Estuary (Mid-Essex Coast Phase 2) SPA and Ramsar</p> <p>c.12.2km from Stour and Orwell Estuaries SPA and Ramsar</p> <p>c.12.4km from Blackwater Estuary (Mid-Essex Coast Phase 4) SPA and Ramsar</p> <p>Area: 2.3Ha</p> <p>Species considered: Golden plover and lapwing</p> <p>One small enclosed arable field and part of a larger, more open arable field. Borders housing to the east, south and west but arable land to the north.</p>	Low

⁴⁰ All allocations in Wivenhoe (Policy SS16) were made in the adopted Wivenhoe Neighbourhood Plan.

⁴¹ <https://wivenhoeneighbourhoodplan.org.uk/>

⁴² This site was allocated within the Wivenhoe Neighbourhood Plan. Therefore, the requirement for wintering bird surveys and mitigation (if required) for SPA birds should mandating within the Wivenhoe Neighbourhood Plan rather than the Colchester Borough Local Plan.

Site Allocation Name	Review of Site Parameters	Assessment of Suitability for SPA Qualifying birds
	Small area of large open arable field (8.8Ha). Borders expanse of large open arable fields to the north, east and west.	

5.17 The desk-based review of site allocations identified that the majority of site allocations were considered to have low or negligible potential to support significant numbers of SPA/Ramsar qualifying bird species, either alone or cumulatively with other allocations, and were therefore discounted from further consideration in terms of offsite functional land.

5.18 No sites were identified as having high potential to support notable numbers of SPA birds. Several sites were identified as having moderate potential to provide suitable offsite foraging habitat for notable numbers of SPA birds. In isolation the importance of such sites for these species is likely to be low when compared with the extensive areas of habitat of greater suitability both within the Borough and the wider region. As a result, the potential for the loss of offsite habitat to adversely affect these species relates primarily to the cumulative effect of reducing the extent of feeding areas. The likelihood of this occurring is low considering the small amount of habitat affected as a proportion of that available around each of the Habitats sites.

5.19 Despite the above, a low level of uncertainty remains under the precautionary principle as to whether the cumulative loss of habitats within these site allocations will combine to adversely affect the integrity of the SPA/Ramsar sites. Given the dependency of these species on offsite arable fields and grasslands, inclusion and implementation of appropriate safeguards and mitigation is recommended.

Mitigation

5.20 Given the extent of suitable offsite foraging habitat for qualifying bird species within Colchester and the wider region, it is unlikely that site allocations would combine to affect significant numbers of birds. Nevertheless, in accordance with the precautionary principle, the following safeguards could be provided to ensure a level of absolute certainty in the unlikely event that significant numbers are forecast to be affected:

- Wintering bird surveys for sites with high and moderate suitability to support these qualifying bird species to determine their cumulative importance for these species and inform mitigation proposals in advance if required.
- A commitment to mitigation and phasing of development dependent on the findings of bird surveys. This will need to take into account the cumulative numbers of SPA

birds affected by the allocations as they come forward for development. In the unlikely event that cumulative numbers of SPA birds affected are likely to exceed thresholds of significance (i.e. >1% of the associated Habitats Site), appropriate mitigation in the form of habitat creation and management in perpetuity, either on-site or through provision of strategic sites for these species elsewhere within Colchester Borough, would be required. If required, mitigation will need to create and manage suitably located habitat which maximises feeding productivity for these SPA species, and such mitigatory habitat would need to be provided and fully functional prior to development which would affect significant numbers of SPA birds.

5.21 The amount of land required would be proportional to the number of birds affected, therefore in the unlikely event that significant cumulative numbers of birds are predicted to be affected, the area required would be expected to be relatively small and more than capable of being accommodated within the Borough.

5.22 In addition to this, Policy ENV1 within the Local Plan will provide safeguards and mitigation measures from physical damage and loss of habitats.

In-Combination Effects

5.23 Loss of offsite functionally linked land is by its very nature an in-combination effect because no single allocation or policy is sufficient to result in an adverse effect on integrity of a Habitats site. Indeed, it is the cumulative loss of such land that poses a risk to bird populations that depend upon them. The avoidance and mitigation safeguards above will ensure that individual allocation will be surveyed for qualifying bird species if necessary. If these surveys identify that a significant population of qualifying birds are likely to be affected, it will trigger a requirement for alternative areas of land of equal or greater suitability for the species affected. This land would be provided and functional prior to habitat loss, and therefore there is no mechanism by which in-combination effects could occur.

Conclusion

5.24 Providing the above mitigation measures are incorporated into the Local Plan, and implemented

successfully, adverse effects on the integrity of the Stour and Orwell SPA/Ramsar, Colne Estuary SPA/Ramsar, Blackwater Estuary SPA/Ramsar, and Abberton Reservoir SPA/Ramsar, as a result of damage and loss of habitat will be avoided either alone or in-combination with other plans and projects.

Recreation

Outer Thames Estuary SPA

5.25 The qualifying species (red throated diver and tern species) of the Outer Thames Estuary SPA are susceptible to disturbance. However, it is necessary to consider the likelihood of population growth resulting from the Local Plan resulting in an adverse effect on the integrity of the qualifying features of the SPA. The SPA comprises an area of open sea covering c.3924km², extending over 40km from the coastline, and reaching as far north as Great Yarmouth. The boundary of this SPA is based on the foraging area of the qualifying species, and notably excludes most of the coastal water in close proximity to Tendring and Colchester.

5.26 Whilst feeding in the open sea, red throated diver and tern species are highly mobile, covering vast distances, whereas recreational boats would be expected to remain relatively close to the coast. Given the mobility of these species and the visibility afforded to them while feeding and loafing at sea they are unlikely to be disturbed by watercraft to any level approaching a risk of adverse effect on integrity, being able to easily maintain a distance they are comfortable with. Furthermore, the increase in usage of watercraft is unlikely to result in any discernible increase in the numbers, distribution or frequency of watercraft navigating these waters, particularly when considered in light of their existing usage and importance as established commercial fishing and shipping importance.

5.27 Therefore, the Local Plan will not result in adverse effects on the integrity of the Outer Thames Estuary SPA either alone or in-combination.

Abberton Reservoir SPA and Ramsar

5.28 Abberton Reservoir SPA is located to the south of Colchester in Colchester Borough. The key threats are from ground-based recreational activities, including walking, bird watching and occasional trespassing, and air-based activities from low-flying civilian and military aircraft. It is expected that any increases in recreational pressure to the qualifying bird species of the SPA as a result of the Local Plan are only likely to occur in relation to ground-based activities.

5.29 Following a review of management at the site, it was found that the SPA is subject to a strong visitor management

regime and the Site Improvement Plan for Abberton Reservoir states that disturbance at ground level is well controlled by Essex & Suffolk Water. In addition, the site is well managed by the Essex Wildlife Trust which implements measures to reduce and manage disturbance, such as provision of an education visitor centre, paths, screens, hides and areas which are not accessible to the public, all of which are overseen by the presence of on-sight wardening. Furthermore, Natural England has advised that recreational impacts on Abberton Reservoir can be ruled out.

5.30 Based on this information, increased population growth as a result of the Local Plan is not predicted to result in adverse effects in the integrity of the SPA as a result of recreational pressure, either alone or in-combination with other plans or projects.

Colne Estuary SPA and Ramsar

5.31 The Colne Estuary SPA and Ramsar site is located along the southeast of Colchester Borough. The key threat to this site relates primarily to disturbance of water birds from people and dogs, in addition to water sports such as use of jet skis and motorboats.

5.32 In general, the majority of housing allocations, which are likely to represent the main source of increases in recreational visits to the SPA/Ramsar, are located several kilometres away from the Colne Estuary. As a result, the majority of additional visitors as a result of the Local Plan are likely to arrive by car, and therefore the provision of alternative open space close to home may represent a useful measure in helping to mitigate recreational impacts. This is discussed in more detail in the mitigation section below.

5.33 Visitor monitoring by Colchester Borough Council between 2010 and 2013 was undertaken at Cudmore Grove and Brightlingsea Marshes parts of the SPA, located to the west and east of the estuary respectively. The information gained from these visitor surveys and their relevance in informing this assessment are discussed and interpreted below. Natural England agreed that these visitor surveys could be used as evidence for the Essex Coast RAMS. Further summer visitor surveys at Cudmore Grove were undertaken as part of the Essex Coast RAMS.

5.34 Many of the key areas of importance within the SPA/Ramsar are currently managed by Natural England and Essex Wildlife Trust to protect and benefit the qualifying bird species of the Colne Estuary, including taking measures to protect key areas from recreational disturbance such as through restricting access to permit holders only, erection of fencing and signage and provision of on-site wardening. Recreational impacts are more likely to occur where

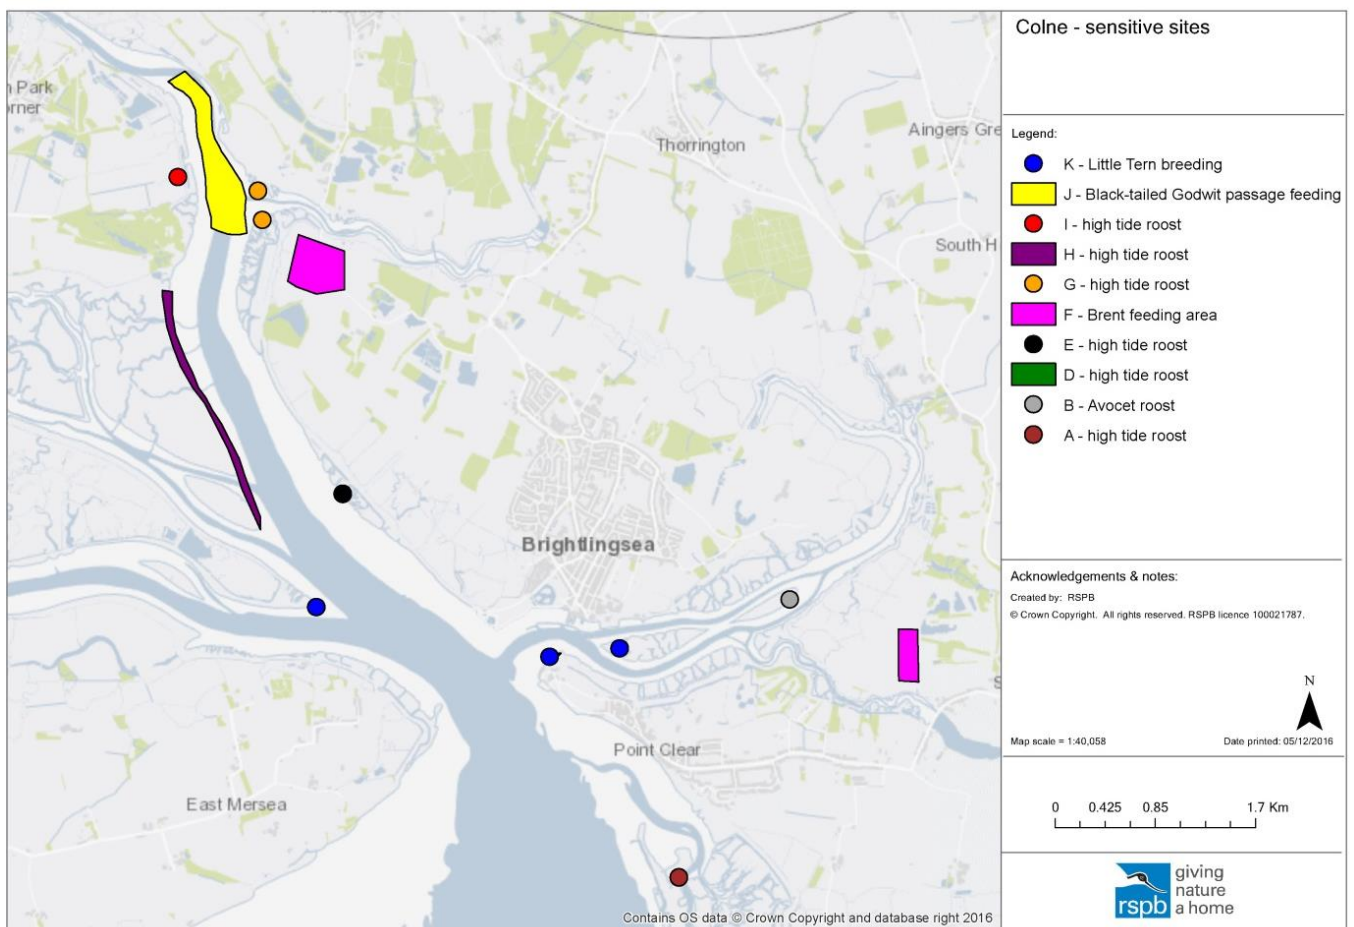

unmanaged recreational activity occurs in close proximity to sensitive areas of high importance for birds, such as high tide roosts, nesting sites (e.g. for little tern) and important feeding areas. Such locations tend to be where public access, for example via provision of car parks and Public Rights of Way occur in close proximity to sensitive locations.

5.35 In order to broadly identify areas of the Colne Estuary SPA/Ramsar which are likely to be of increased risk of impacts associated with recreational disturbance, a review of

existing management regimes and accessibility has been undertaken.

5.36 Figure 5.1 below, has been produced by the RSPB. It is indicative and identifies sensitive areas of the Colne Estuary in terms of nesting, roosting and feeding for qualifying bird species. This information will continue to be updated as part of the Essex Coast RAMS to reflect monitoring and survey results, and consultation with key stakeholders, including Natural England, the RSPB, the BTO, the Wildlife Trust and other land managers.

Figure 5.1: Colne Estuary sensitive bird sites identified by RSPB

5.37 The Colne Estuary National Nature Reserve (NNR) comprises much of the SPA in areas sensitive to disturbance. This site covers an area of 576Ha and includes component sites to the south west of St Osyth at 'Colne Point', west of Brightlingsea at 'Brightlingsea Marshes', and on the western side of the estuary at the 'East Mersea Marshes'. The NNR also incorporates the Colne Point Essex Wildlife Trust reserve, which is managed by both Essex Wildlife Trust and Natural England. The wider NNR is managed by Natural England.

5.38 The 'Colne Point' compartment of the NNR is wardened and only accessible to permit holders. Important nesting areas for little terns are fenced off, and informative signage is provided. In addition, public access in the vicinity of the site is restricted to the south east corner where a public footpath runs along the sea wall at the site boundary. Much of the salt marsh, mudflats and beach are physically separated from the public footpath via a series of creeks, including Ray Creek. As a result, it is likely that the existing infrastructure and management regime at Colne Point is likely to be resilient, at least to some extent, to population growth and associated recreational increases in Tendring.

5.39 The East Mersea Flats area of the NNR is located on the western side of the Estuary, along the eastern edge of Mersea Island. Official parking is available at Cudmore Grove Country Park. In addition, a ferry operates between the eastern edge of Mersea Island at Mersea Stone in Colchester Borough and St Osyth Point across the channel in Tendring District. A public footpath runs along the entire northern edge of the SPA. The key findings of the visitor surveys completed at Cudmore Grove indicated that the majority of visitors travelled by car (194 of 230 groups interviewed) with a small proportion (30 of the 230) arriving on foot. The majority (134 of 230) lived in Colchester, with 16 from Braintree and 8 from Tendring, and 70% of visitors travelled 15 miles or less to visit the site. Cudmore Grove is an important destination for dog walking with 52% of visitors surveyed confirming this as the main reason for their visit and 64% of visitors visited all year round, including regular dog walkers.

5.40 A review of the BTO WeBS low tide count data for this area suggests that the northeast coastline where sandflats and mudflats meet a fringe of saltmarsh to the north of Mersea Stone is particularly important for SPA birds. Nevertheless, the visitor monitoring undertaken here confirmed that very few visitors walked in this direction with the majority of visitors using Cudmore Grove and heading west towards West Mersea. As a result, whilst the increased contribution of visitors as a result of population increases associated with the Local Plan, may contribute to increases in recreational pressures at this location, such increases would be expected

to be small and not to result in adverse effects on the sites integrity.

5.41 The Brightlingsea Marshes NNR part of the SPA is also only accessible to permit holders and birds utilising the site, for example for feeding, are therefore also likely to be resilient to the effects of recreational disturbance. However, public access in this area is provided by a public footpath which runs along the seawall between the southwest edge of the NNR and the eastern edge of the saltmarsh, and also by the presence of the Promenade Way Car Park, which incorporates public toilets. The footpath extends from the car park northwards to Wivenhoe and lies within or adjacent to the SPA, passing close to high tide roosts opposite Rat Island and at AldBorough Point. The key findings of the visitor surveys undertaken at this location concluded that there was no significant difference in visitor numbers between winter and spring periods; that 45% of visitors were locals living in Brightlingsea, after which Colchester was the next most frequent place of origin; and that of a total of 310 visitors surveyed, 91 had travelled more than five miles. In addition, the survey revealed that dog walking and walking were the most popular reasons for visiting the site, and 30% of those surveyed stated that they visited the site daily. In light of the current infrastructure at the site, and its appeal of regular dog walkers during winter, the area is likely to be of increased susceptibility to recreational disturbance and increases in visitors associated with housing allocations proposed in the Local Plan. As a result the Local Plan, and in particular the Tendring and Colchester Borders Garden Community, has the potential to result in adverse effects on the integrity SPA/Ramsar as a result of in-combination effects between allocations specified in adjacent authority Local Plans.

5.42 A sensitive area for SPA birds has been identified by the RSPB along the western edge of the Colne channel stretching from Rat Island in the south to Fingringhoe Wick in the north. This area is located within Ministry of Defence land and is not publicly accessible. As a result the potential for recreational disturbance at this location as a result of terrestrial activities is unlikely. Potential effects associated with water-based activities are discussed below.

5.43 The St Osyth Stone Point peninsular and shoreline of Brightlingsea Creek is another location where sensitive bird areas occur in close proximity to areas with high levels of existing visitor pressures. Public Rights of Way (PRoW) occur along both the north and south shore of Brightlingsea Creek and little tern nesting sites and avocet roosts occur within this area, albeit these important features are in locations which are restricted from public access (e.g. Cindery Island and another unnamed island immediately to the east of Cindery Island).

Nevertheless, the accessibility provided by existing PRoW's are likely to result in potentially high levels of existing visitor pressure in areas of importance for SPA/Ramsar birds. As a result, this location is likely to be of increased susceptibility to recreational disturbance and increases in visitors associated with housing allocations, and therefore the Local Plan has the potential to result in adverse effects on the Colne Estuary SPA/Ramsar as a result of additional recreational pressures at this location in the absence of mitigation and avoidance.

5.44 Water based recreational activities including sailing, motorboats, and jet skis have also been identified as resulting in disturbance to SPA/Ramsar bird species. Within the Colne Estuary, the primary marina's and launch sites are located at Brightlingsea and Wivenhoe but impacts are likely to occur at locations where such activities occur in proximity to areas of sand and mudflats where birds are feeding, and high tide roosts associated with salt marshes.

5.45 The effect of water-based recreation and powered paragliding on SPA/Ramsar birds is difficult to predict and manage but studies from elsewhere in the UK suggest that people will travel relatively far to partake in such activities and that they are more prevalent in the summer months. Given the specialist nature of these activities and that their prevalence is greater in the summer months when impacts to the wintering and passage bird features are unlikely, the increase in such activities as a result of the Local Plan is considered likely to be small. Nevertheless, to enable a sufficient level of certainty that the policies contained in the Local Plan do not result in adverse effects on the Colne Estuary SPA/Ramsar, appropriate mitigation will be required. The most effective means of control is likely to be through the promotion of a code of conduct targeted to marinas and leisure operators. This is considered in more specific detail in the mitigation section below.

5.46 Workshops with local experts as part of the discussion on potential mitigation solutions for the Essex Coast RAMS, identified that powered paragliders currently take off from a field on Mersea Island. The power gliders occasionally fly low and fly over the Colne and Blackwater SPAs with potential to disturb qualifying bird species.

5.47 In terms of in-combination effects, the Zone of Influence for the Colne Estuary SPA/Ramsar includes the Braintree District and Tendring District and in-combination effects with the Shared Strategic Section 1 Local Plan and Section 2 Local Plans for these Districts have been identified. The HRA's of the Braintree and Tendring Section 2 Local Plans both concluded that they will need to be part of a Recreational Avoidance and Mitigation Strategy (RAMS) for this SPA/Ramsar in partnership with Colchester, and other Essex

Authorities to ensure adverse effects are mitigated, and this is discussed in more detail in the mitigation section below.

5.48 In summary, population growth and increased coastal visitation from new residents as a result of the Local Plan is likely to contribute to increases in both land-based and water-based recreational pressures at the Colne Estuary SPA and Ramsar sites, which have the potential, in the absence of mitigation and avoidance measures, to adversely affect the integrity of the bird qualifying features as a result of the effects of disturbance. Mitigation will be required to ensure adverse effects can be avoided, and this is described in detailed below.

Essex Estuaries SAC

5.49 Essex Estuaries SAC is designated for the presence of coastal and inter-tidal habitats and the area of coverage in North Essex is largely shared with the Colne Estuary SPA and Ramsar. The habitats for which the SAC is designated are resilient to the disturbance impacts described above for the Colne Estuary SPA/Ramsar but this site is vulnerable to the physical damage which can be caused by trampling and erosion associated with terrestrial recreation and wave damage caused by water based recreation. The SAC is also vulnerable to the effects of localised nutrient enrichment and other negative factors associated with recreation such as littering, fire and vandalism, albeit the qualifying habitats, which are regularly inundated by tidal waters are not particularly sensitive to such factors. Areas of particular susceptibility to the effects of recreational activities are likely to be as described above for the Colne Estuary.

5.50 In terms of in-combination effects, the Zone of Influence for the section of Essex Estuaries SAC along this part of the UK coastline includes Braintree District and Tendring District and in-combination effects with Section 2 Local Plans for these Districts and the Shared Strategic Section 1 Local Plans have been identified. The HRA's of the Braintree and Tendring Section 2 Local Plans both concluded that they will need to be part of a RAMS for this SPA/Ramsar in partnership with Tendring and other Essex Authorities to ensure adverse effects are mitigated.

5.51 In the absence of mitigation and avoidance measures, the predicted increases in recreational activities as a result of the Local Plan, would be expected to increase the prevalence and occurrence of negative activities occurring within the SAC, and could lead to adverse effects on site integrity. As a result, adequate avoidance and mitigation measures will be required as detailed in the mitigation section below.

Stour and Orwell Estuaries SPA and Ramsar

5.52 The Stour and Orwell Estuaries SPA and Ramsar sites are located along the northern edge of Tendring, with a very small part of the SPA falling within Colchester borough. The HRA Screening assessment identified that the Local Plan is likely to result in significant effects on the SPA/Ramsar as a result of increases in recreational disturbance. The Site Improvement Plan (SIP) indicates that breeding and overwintering waterbirds are susceptible to human disturbance from a range of land and water-based activities, including boating and watersports, walking, bait-digging, fishing; wildfowling, and military overflight training, whilst some activities, such as powerboating, may produce physical disturbance to habitats.

5.53 The SIP indicates that moderate levels of disturbance in less sensitive locations may have no significant effect on the numbers of birds, but the types, levels and locations of potentially disturbing activities are constantly changing and a better understanding is required of: which species and habitats are most susceptible; which types of activity are most disturbing; and which locations and times of year are most sensitive in order to manage change, with intervention as necessary in order to minimise the risks of disturbance impacts.

5.54 In general, significant housing allocations, which are likely to represent the main source of additional recreational visits to the SPA/Ramsar as a result of the Local Plan, are located several kilometres away from the Stour and Orwell Estuaries SPA/Ramsar. No site allocations are considered to be located within walking distance of the SPA and Ramsar. As a result, the majority of additional visitors originating from the Local Plan are likely to arrive by car, and therefore the provision of alternative open space close to home may represent a useful component measure in helping to mitigate recreational impacts. This is discussed in more detail in the mitigation section below.

5.55 Visitor surveys of the Stour Estuary were completed by Colchester Borough Council between 2010 and 2013 at the Stour Estuary RSPB reserve, and at The Walls in Manningtree. This information is useful in understanding the patterns and purposes of recreational visits to enable accurate predictions of the key sources of impact, and to enable any mitigation and avoidance measures to be suitably focused. As a result, the mitigation and avoidance measures recommended below have been largely based on the visitor monitoring data available for this assessment.

5.56 At the Stour Estuary, the number of visitors varied considerably over the course of the 3 year survey period. In total 217 visitor groups were surveyed and the highest number

of visitors was recorded in winter 2012 (63 groups). There were significantly higher numbers of visitors at the weekend, and over the three years, twice the number of groups visited at the weekend than during the week. A large proportion of visitors to the site travelled from the Harwich area (48%), and the majority of visitors had travelled less than five miles to visit the site. Of the 217 groups surveyed, 35 had travelled over 11 miles to visit, with most of these being at the weekend. Dog walking and walking were the predominant activities and during the week there were more people dog walking and at the weekend the numbers walking and dog walking were virtually the same.

5.57 When asked how frequently people visited the most common answer was less than once a month (54 out of 217), whilst the second most common answer given was 2-6 times a week (44 groups). 34% of visitors said that they do not visit alternative sites regularly and of those that do visit alternative sites regularly, Tendring coastal sites were the most common site visited (57 out of 124) with many visitors citing the beach as the preferred location. 16% of visitors said that they did not have good access to open space close to home. During the spring 2012 survey almost half of people surveyed said that they do not have good access to open space.

5.58 The visitor surveys at The Walls in Manningtree identified that the number of visitors at The Walls varied considerably over the course of the three year survey period. In total 278 groups were surveyed over the three years and there were higher numbers of visitors at the weekend during winter. During all of the spring survey periods the number of weekend and week day visitors was similar. Over the three year survey period a low proportion (12 of the 278) of the groups surveyed said that they were on holiday in the area. Visitors came from a wide range of locations to visit The Walls, principally Tendring District, Colchester Borough and Suffolk. A large number of visitors (114/278) lived in Lawford, Manningtree and Mistley (14, 29 and 71 respectively). 25 were from Colchester, 12 were from Ipswich with the remaining visitors spread around a number of towns and villages. The majority of visitors had travelled less than five miles to visit the site.

5.59 Walking was the predominant activity at The Walls (61% of visitors). Exercise was the second most popular activity (21% of visitors). Dog walking was not as popular here as at other sites in North Essex, with 20% of visitors dog walking. The number of dog walkers was evenly split between the weekday and weekend. Of the 278, 113 visitors cited proximity to home as a reason for visiting. The frequency people visited the site was similar across daily, 2-6 times a week, once a week and less than once a month visitation frequencies.

5.60 The above information, demonstrates that, the majority of visitors to the Stour Estuary, and those visiting regularly live in

close proximity. The results of a Footprint Ecology Study as described above in the Screening stage, resulted in a 13km Zone of Influence being recommended for the Stour and Orwell, within which proposed housing allocations were considered likely to contribute to Likely Significant Effects. This distance incorporates many of the site allocations within Colchester, most notably including the Tendring / Colchester Borders Garden Community where 1,100 homes are proposed in the plan period.

5.61 Walking and dog walking were the primary activities at the site and both of these activities have been recorded as disturbing birds. As a result, they are likely to contribute the greatest proportional source of disturbance to bird species, particularly where such activities occur close to important feeding or roosting areas in locations which are not subject to daily management and wardening. As a result any mitigation and avoidance measures proposed (see below), will need to give particular consideration to mitigating the effects of these sources of disturbance.

5.62 In terms of public access and existing management along the Tendring part of the Stour Estuary (also the part of SPA/Ramsar closest to Colchester), the Essex Way long distance public footpath extends along the majority of the coastline, from Manningtree in the west to Harwich in the East. However, a notable area where public access is restricted by the absence of public rights of way, and via severance and screening from the railway line and industrial zones, occurs between Harwich International Port/Parkeston Quay and the western edge of the Stour Estuary RSPB reserve to the west. This incorporates an extensive area of saltmarsh of key importance for SPA/Ramsar birds including Deep Fleet, Bramble Creek and Copperas Creeks. In addition, much of this area is located within the RSPB's Stour Estuary reserve, which is managed to protect the birds from disturbance, including a ban on dogs within most of the reserve, provision of on-site wardening, and use of barriers, screens and bird hides to manage visitor movements. As a result, disturbance of SPA/Ramsar qualifying birds is less likely at these locations.

5.63 In addition to the above, Essex Wildlife Trust manages the Wrabness Nature Reserve which overlooks the saltmarsh and mudflats at Jacques Bay. Again, this site is managed to minimise potential disturbance to birds, including dogs being permitted only when under close control, wardening on site and provision of screening along the sea wall including through maintenance of scrub and tree lines.

5.64 The area between Mistley and Nether Hall, which includes Landooze Rill and Ballister Creek is also relatively well protected from terrestrial recreational disturbance due to the absence of PROW's, private land and the railway.

5.65 A review of WeBS data indicates areas of particular importance for SPA/Ramsar birds in locations close to areas where recreational access is high and unmanaged includes in the vicinity of Mistley and Manningtree, which is particularly important for feeding knot, black-tailed godwit, redshank and shelduck. Elsewhere along the Tendring coastline of the Stour Estuary, important bird locations are primarily located adjacent to the locations described above where the probability of recreational disturbance is lower.

5.66 In light of the above, it is likely that the impacts of terrestrial recreation as a result of the Local Plan would be expected to be relatively localised and focused in the vicinity of Mistley and Manningtree and these are likely to be key locations in providing mitigation and avoidance measures. Any mitigation and avoidance proposals will need to be based on latest visitor and bird monitoring data, and align with the Recreational disturbance Avoidance and Mitigation Strategy (RAMS) being produced by the Suffolk authorities of Ipswich, East Suffolk and Babergh.

5.67 The Suffolk Authorities have identified, as part of the HRAs of their Local Plans, similar recreational impacts on the north shore of the Stour and Orwell SPA/Ramsar as those identified in this Appropriate Assessment. In order to comply with the requirements of the Habitat Regulations, and to prepare sound plans they have produced a RAMS which has been informed by visitor monitoring work undertaken by Footprint Ecology. It is expected that these studies will provide a detailed baseline of current visitor patterns, hotspots where disturbance is, or is predicted to be, a key issue, and quantified data which can be used to aid future monitoring, and will set out detailed information relating to the existing recreational pressures on the north shore of the SPA/Ramsar, and will set out mitigation and avoidance proposals including locations, methods and funding mechanisms. As a result, this information will be crucial in informing the preparation and delivery of similar mitigation and avoidance measures required as part of the Shared Strategic Section 1 Local Plan and Section 2 Local Plans to ensure adverse effects on integrity associated with recreation are avoided.

5.68 Water based recreational activities including sailing, motorboats, and jet skis have also been identified as resulting in disturbance to SPA/Ramsar bird species. Within the Stour Estuary, marinas and launch sites within or closest to Colchester borough occur at Manningtree and Mistley. Additional tidal boat moorings are scattered throughout the estuary and the primary recreational marinas are located in the northern part of the SPA, associated with the Orwell Estuary at sites including Ipswich, Suffolk Yacht Harbour at Stratton Hall, Shotley Gate, and Wolverston Marina's where visitors from Colchester borough are less likely due to the

travel distance involved. These marinas are located a considerable distance from the site allocations proposed in the Local Plan and the plan is therefore considered unlikely to result in noticeable increases in the use of these facilities.

5.69 The effect of water based recreation on SPA/Ramsar birds is difficult to predict and manage but studies from elsewhere in the UK suggest that people will travel relatively far to partake in such activities and that they are more prevalent in the summer months. Given the specialist nature of these activities and that their prevalence is greater in the summer months when impacts to the wintering and passage bird features are unlikely, the increase in such activities as a result of the Local Plan is considered likely to be small. Nevertheless, to enable a sufficient level of certainty that the Local Plan will not result in adverse effects on the Stour and Orwell Estuaries SPA/Ramsar, appropriate mitigation will be required. The most effective means of control is likely to be through the promotion of a code of conduct delivered primarily by marinas and leisure operators. This should be incorporated in any Recreation Avoidance and Mitigation Strategy and is considered in more specific detail in the mitigation section below.

5.70 In terms of in-combination effects, a 13km Zone of Influence for the Stour and Orwell Estuary has been identified, which includes the Suffolk authorities, Tendring District and Colchester Borough. The Suffolk authorities are mitigating for in-combination effects via the Suffolk RAMS described above and are therefore not predicted to result in in-combination effects on the SPA/Ramsar as a result of recreational effects. Visitor monitoring at the SPA/Ramsar concluded that significant proportions of visitors originated from Tendring District, and to a lesser extent from Colchester Borough. As a result it is concluded that these authorities will be required to prepare and implement a RAMS to mitigate for the impacts described above.

5.71 In summary, population growth and increased coastal visitation from new residents as a result of the Local Plan is likely to contribute to increases in both land-based and water-based recreational pressures at the Stour and Orwell Estuaries SPA/Ramsar sites, which have the potential, in the absence of mitigation and avoidance measures, to adversely affect the integrity of the site's bird qualifying features as a result of the effects of disturbance. Mitigation will be required in the form of a RAMS to ensure adverse effects can be avoided, and this is described in detail below.

Blackwater Estuary (Mid-Essex Coast Phase 4) SPA and Ramsar

5.72 The Blackwater Estuary SPA and Ramsar stretches from Maldon in the west to the northwest of Mersea Island in Colchester Borough where it meets the western extent of the Colne Estuary SPA/Ramsar. Much of the site is located along the coastline of Colchester. The key threat to this site relates primarily to disturbance of water birds from people and dogs, in addition to water sports such as use of jet skis and motorboats.

5.73 All allocations in the Local plan are within the 22km Zone of Influence for this SPA and Ramsar. The Tendring and Braintree Section 2 Local Plans identified no potential adverse effects on Habitats sites in isolation, however there is potential for adverse effects on site integrity as a result of the in-combination effects between site allocations within the Zone of Influence, particularly those in closer proximity such as at West Mersea and Abberton.

5.74 Water based recreational activities including sailing, motorboats, and jet skis have also been identified as resulting in disturbance to SPA/Ramsar bird species. Within the Blackwater Estuary, the primary marina's and launch sites are located at Maldon, Heybridge, Tollesbury and West Mersea, which provide opportunities for residents of the borough to partake in activities with potential to disturb birds.

5.75 The effect of water based recreation on SPA/Ramsar birds is difficult to predict and manage but studies from elsewhere in the UK suggest that people will travel relatively far to partake in such activities and that they are more prevalent in the summer months. Given the specialist nature of these activities and that their prevalence is greater in the summer months when impacts to the wintering and passage bird features are unlikely, the increase in such activities as a result of the Local Plan is considered likely to be small.

5.76 Workshops with local experts as part of the discussion on potential mitigation solutions for the Essex Coast RAMS, identified that powered paragliders currently take off from a field on Mersea Island. The power gliders occasionally fly low and fly over the Colne and Blackwater SPAs with potential to disturb qualifying bird species.

5.77 To enable a sufficient level of certainty that the policies contained in the Local Plan do not result in adverse effects on the Blackwater Estuary SPA/Ramsar, appropriate mitigation will be required. The most effective means of control is likely to be through the promotion of a code of conduct targeted to marinas and leisure operators. This is considered in more specific detail in the mitigation section below.

5.78 Given the relatively low numbers of visitors recorded during the surveys, and the presence of significant areas which are not accessible to the public, such as Old Hall Marshes, the potential for increases in recreational visits as a result of the Local Plan to result in significant increases in recreational pressures at the Blackwater Estuary is considered low. Nevertheless, there is uncertainty as to whether the cumulative impact of increases in population associated with site allocations within the Zone of Influence, including at West Mersea and Abberton could result in adverse effects on site integrity, and therefore mitigation will be required to provide a suitable level of certainty that impacts will be avoided, and these are discussed below.

5.79 In terms of in-combination effects, the Zone of Influence for the Blackwater Estuary SPA/Ramsar includes the North Essex Authorities of Braintree District and Colchester Borough. The HRA of the Braintree Section 2 Local Plan concluded that they will need to be part of a RAMS for this SPA/Ramsar in partnership with Colchester to ensure adverse effects are mitigated, and this is discussed in more detail in the mitigation section below.

5.80 In summary, population growth and increased coastal visitation from new residents as a result of the Local Plan is likely to contribute to increases in both land-based and water-based recreational pressures at the Blackwater Estuary SPA and Ramsar sites, which have the potential, in the absence of mitigation and avoidance measures, to adversely affect the integrity of the bird qualifying features as a result of the effects of disturbance. Mitigation will be required to ensure adverse effects can be avoided, and this is described in detailed below.

Dengie SPA and Ramsar

5.81 Whilst the Zol for these Sites extends in Colchester, the potential for the Local Plan to contribute to potential adverse effects on integrity through recreational impacts is considered unlikely because the Habitats sites are separated from the Borough by the River Blackwater and the distance that visitors would need to travel to visit the SPA and Ramsar would be considerably greater than 20.8km.

5.82 In summary, population growth and increased coastal visitation from new residents as a result of the Local Plan is unlikely to contribute to increases in both land-based and water-based recreational pressures at these Habitats Sites and therefore no adverse effects on integrity are predicted either alone or in-combination.

Consideration of the England Coastal Path

5.83 Consideration of the England Coastal Path project is pertinent in considering the accuracy of the key locations and impacts identified herein. The new National Trail, which is being led by Natural England, will give people right of access around our entire open coastline. This includes, where appropriate, any land, other than the trail itself, which forms part of the coastal margin and which has public rights of access along the way. Natural England expects to complete work on the England Coast Path in 2020 and it is understood that sections of the trail within Essex are underway and are at the 'determine' stage. It is reasonable to assume that it will further increase accessibility to sensitive areas and therefore the interpretation of key areas within this assessment may be subject to change in the near future.

5.84 The specific impacts associated with the England Coastal Path will need to be carefully considered by Natural England and appropriate mitigation and avoidance measures will be required to ensure that the project does not adversely affect Habitats sites. It is likely that the mitigation required in respect of recreational impacts, as described below, will need to carefully align with those proposed by Natural England, and ideally a coordinated approach to mitigation is likely to be the most effective approach to avoiding impacts on Habitats sites. As a result, the Recreational disturbance Avoidance and Mitigation Strategy outlined below will require close consultation and agreement with Natural England.

Mitigation

Bird Aware Essex Coast (Essex Coast Recreational disturbance Avoidance & Mitigation Strategy (RAMS))

5.85 This assessment has identified that recreational impacts to the Colne Estuary SPA/Ramsar, Essex Estuaries SAC, the Stour and Orwell Estuaries SPA/Ramsar and Blackwater Estuary SPA/Ramsar would, in the absence of mitigation and avoidance measures, be expected to result in adverse effects on the integrity of these sites, either alone, or in-combination with other plans and projects. As a result, at an early stage in the iterative HRA process it was recommended that additional mitigation and avoidance measures in the form of a Recreational disturbance and Avoidance and Mitigation Strategy (RAMS) would be needed and agreed with Natural England prior to adoption of the Local Plan to ensure adverse effects on integrity (AEOI) are avoided. A commitment to the successful delivery and implementation of a RAMS was made by Colchester Borough Council in 2017 and included within the Local Plan to ensure that the plan is sound.

5.86 The need for a Recreational disturbance Avoidance and Mitigation Strategy (RAMS) was identified at an early stage in

the iterative HRA process. Further consideration was given to this at the appropriate assessment stage, partly to reflect that mitigation measures must be considered at the appropriate assessment stage and also as examples of mitigation strategies elsewhere have continued to emerge and the conservation community continue to share good practice.

5.87 The Essex Coast RAMS Strategy Document, which will ensure that the RAMS is delivered in perpetuity, was finalised in January 2019 and adopted by the twelve local authority partners, including Colchester Borough Council. As already detailed in this report, Natural England were involved in the preparation of the Essex Coast RAMS and endorse the RAMS Strategy Document.

5.88 A RAMS SPD was consulted on in January-February 2020. The SPD has now been finalised and Natural England have confirmed that they endorse the SPD. Colchester Borough Council have now adopted the SPD.

5.89 The additional measures required to avoid AEOI are applicable to each of the Habitats Sites listed above, and therefore the recommended approach to mitigation and avoidance detailed herein in the form of a RAMS is applicable to each of them. Albeit, where site-specific measures are required, this is made clear below.

5.90 The effects of recreational disturbance on coastal Habitats sites, and/or those with sensitive bird populations have been studied and recognised throughout the UK. In light of an emerging body of research, the preferred approach to mitigation and avoidance of such impacts via the delivery of mitigation strategies has received a growing consensus of support by Natural England and other key stakeholders such as the RSPB and the Wildlife Trusts.

5.91 Relevant examples include the Recreation Avoidance and Mitigation Strategy which is currently being prepared as a strategic document by the Suffolk Authorities of Ipswich, East Suffolk and Babergh Authorities to mitigate recreational impacts of their Local Plans on the Stour and Orwell Estuaries SPA/Ramsar; the production of a joint Sustainable Access Strategy which is being prepared by Shepway and Rother Districts to mitigate recreational impacts of their Local Plans on the Dungeness SAC/SPA/Ramsar; Bird Aware Solent to mitigate recreational impacts of Local Plans on Habitats sites around the Solent and the Thames Basin Heaths Delivery Framework, which sets out the mitigation requirements to enable development within a Zone of Influence around the Thames Basin Heaths SPA.

5.92 A key component of the above examples is the adoption of a strategic approach to mitigation which involves more than one Authority. The sources of recreational impacts on Habitats sites, typically originate from more than one Authority, as is

the case in Essex. As a result, it is typically the effect of multiple and widespread sources of recreational impact which may result in adverse effects on site integrity in-combination. In light of the above, the approach to mitigation detailed herein is considered a robust and appropriate means of ensuring impacts are successfully avoided and mitigated, which has been endorsed by Local Plan Inspectors.

5.93 The multiple, widespread, and cross-boundary origins of recreational impacts reflect the unique attraction that these sites have for visitors. The experience that they offer cannot be easily replicated, and as a result, whilst a multi-faceted approach is required, including the promotion of local education initiatives, and provision of alternative opportunities for recreation for those regular local visitors, the primary component of a successful RAMS will primarily involve providing appropriate management at the Habitats sites to avoid and minimise impacts and that such management continues to be informed by regular monitoring of people and birds.

5.94 In light of the above, and through close liaison with Natural England during the preparation of their Section 2 Local Plans and the Shared Strategic Section 1 Local Plan, the North Essex Authorities together with other Essex Authorities have adopted a joint strategic approach to ensuring impacts associated with recreation will be adequately addressed and mitigated. Through a series of meetings, Essex LPAs agreed to prepare and implement RAMS for all Essex coastal Habitats sites. The broad principles of what is required as part of the RAMS is set out in this section.

Mechanisms of funding and delivery

5.95 The Essex Coast RAMS Strategy Document, which will ensure that the RAMS is delivered in perpetuity, was finalised in January 2019 and adopted by the twelve local authority partners, including Colchester Borough Council. As already detailed in this report, Natural England were involved in the preparation of the Essex Coast RAMS and endorse the RAMS Strategy Document.

5.96 The RAMS will be delivered through an SPD. A RAMS SPD was consulted on in January-February 2020. The SPD has now been finalised and Natural England have confirmed that they endorse the SPD which has now been adopted by Colchester Borough Council.

5.97 The RAMS approach follows a meeting between the North Essex Authorities, LUC and Natural England (8th February 2017), at which Natural England recommended that the NEAs prepare and deliver a RAMS for the relevant Habitats sites. This was widened to include all Essex coastal sites and 12 Greater Essex LPAs and work commenced on the Essex Coast RAMS in 2017. This approach has been

used successfully elsewhere such as the Thames Basin Heaths SPA Avoidance and Mitigation SPD (TBH SPD), which was developed to provide guidance to ensure that new development does not have adverse effects on this SPA which is designated for heathland birds susceptible to recreational pressures.

5.98 The TBH SPD has been adopted by eleven local authorities which incorporate the SPA's Zone of Influence and involves an approach to mitigation which includes i) provision of Suitable Alternative Natural Greenspace (SANGs), and ii) Access Management. The TBH SPD provides a specific approach to access management and it is recommended that the RAMS produced by the North Essex Authorities should adopt a similar approach to delivery. The TBH SPD specifies that existing landowners and managers should deliver access management and funding should come from developer contributions, with funding provided in perpetuity. Access management is coordinated strategically by Natural England working with Local Authorities in line with an overarching strategy.

5.99 As per the TBH SPD, it was recommended that RAMS for the above Habitats sites include access management which is funded by a charge levied on developer contributions which includes an allowance for the cost of this service, and that the charge collected in relation to access management measures are pooled for strategic allocation.

5.100 To ensure that there is a sufficient level of certainty that the RAMS will successfully mitigate the recreational impacts identified in this HRA, and will continue to do so for lifetime of the plan, the Essex Coast RAMS has been prepared, adopted by Colchester Borough Council and approved by Natural England prior to adoption of the Local Plan.

Provision of Visitor Surveys

5.101 To ensure that RAMS continues to be based upon up-to-date information, it is recommended that regular visitor monitoring is undertaken as part of the RAMS. The initiation and frequency of such monitoring should be agreed with Natural England in preparing the RAMS. This will ensure that the RAMS provides an up to date baseline against which to measure the status, extent and effect of recreational pressures going forward, and will ensure that the specifications committed to in the RAMS continue to be based upon up to date information and in agreement with Natural England. It will also be important to ensure that up to date bird data is also available to inform mitigation measures. This is regularly undertaken at each of the Habitats sites as part of the BTO's WeBS Core Counts and Low Tide Counts. It is therefore predicted that such information will be available but, to ensure certainty, a commitment will be required by the

Essex Coast RAMS partner authorities that in the event that suitably up to date bird survey data is not available, albeit unlikely, they will undertake equivalent survey work to inform the RAMS.

Provision of open space and green infrastructure

5.102 During a meeting on 8th February 2017 between the North Essex Authorities, LUC and Natural England, it was broadly agreed by all parties that given the unique nature and attraction of these coastal Habitats sites, the focus of the RAMS should primarily be on access management and monitoring as described below.

5.103 Nevertheless, the provision of alternative natural green space and green infrastructure (GI) represents an important aspect of the overall mitigation required. The provision of alternative greenspace in mitigating the effect of recreational pressures on sensitive Habitats sites is actively encouraged by Natural England elsewhere, for example it forms a key component of the Thames Basin Heaths Delivery Framework. And therefore the strategic approach to incorporating protective measures specified in the Shared Strategic Section 1 Local Plan is considered likely to provide an effective contribution in mitigating significant effects associated with recreation.

5.104 To maximise the effectiveness of its role in mitigation recreational impacts on the coastal Habitats sites, the design and management of open space and green infrastructure has focused towards attracting those groups of visitors who regularly visit the Habitats Sites. This primarily includes walkers and dog walkers.

5.105 The Local Plan includes requirements to meet open space and GI standards including Policy DM18 which requires at least 10% of gross site areas to be delivered as useable public open space. The Local Plan also includes Policy ENV3 which promotes the Colchester orbital route which comprises both the inner and outer orbital which is an interlinked multi-user access route around urban Colchester and also links into existing green corridors such as the Wivenhoe Trail and Rowhedge Trails and link with nature reserves etc.

5.106 Despite the commitment of minimum standards for open space and protection and enhancement of GI, in order for such measures to effectively contribute towards mitigating recreational impacts at Habitats sites, the design and management of GI and open space will need to be specifically designed and managed to provide a desirable alternative location for the regular daily activities typically undertaken by local residents at Habitats sites, including most notably walking and dog walking. This can be achieved by ensuring that the management of such sites is specifically targeted towards ensuring that these target groups are provided for.

For example, sites which provide a range of walking routes including short and long distance options, and which encompass a range of habitat types, are perceived as being safe, and provide areas which are safe for dogs to exercise off of leads and which provide dog bins are likely to be particularly appealing.

5.107 As discussed previously, the attraction of the coastline is strong and therefore provision of alternative open space is likely to be less effective for those allocations located in close proximity to accessible parts of the Habitats sites. No such site allocations occur within Colchester, and therefore it is recommended that strategic provision of GI and high quality open space is targeted towards the larger strategic housing allocations including the Tendring and Colchester Borders Garden Community and Middlewick Ranges, where their distance is such that visits to the Habitats Sites will typically involve driving. As a result, if well designed, there is likely to be an opportunity for open space at such sites to attract regular dog walkers and walkers instead of visiting the Habitats sites.

5.108 The size of these sites will also enable greater flexibility in their design and masterplanning at the project stage will enable these sites to provide the range of features required to maximise attractiveness to the target groups described above.

5.109 Policy DM18: Provision of Public Open Space states:

"The provision of open space helps to alleviate recreational pressure on sites of high nature conservation value (e.g. Habitats sites) and also increases opportunities for participation in healthy lifestyles".

Watercraft and Powered Paragliding disturbance - Code of Conduct

5.110 Water-based and powered paragliding recreational activities are likely to be more prevalent during summer months when disturbance to bird populations for which the Habitats sites are designated is less likely. The nesting sites of little terns are located on shallow sandy areas above the high tide mark and are therefore not especially vulnerable to such activities. Nevertheless, both air and water recreation does occur during the winter and passage months, and where such activities occur in close proximity to bird areas, there is a high probability of disturbance to birds while feeding or roosting in otherwise undisturbed locations.

5.111 It is difficult to manage and monitor the location and frequency of such activities because they are less predictable and take place in inaccessible locations. As a result, it is recommended that the most appropriate means of reducing the frequency and severity of such activities is by promoting a Code of Conduct and encouraging increased self-regulation

from participants. This could be achieved via an education and awareness campaign targeted at the leisure operators, marinas, sailing clubs and holiday parks, in addition to quaysides, jetties and other launch sites. Such an approach could be undertaken via promotional leaflets, posters and signage.

5.112 With regard to powered paragliding, Natural England has confirmed that it has met with paramotor users on the Colne and Blackwater Estuaries to explain the impacts their sport can have if not undertaken responsibly. Guidance was also provided on how they can avoid disturbing birds whilst flying. Natural England confirmed that as a result of this meeting the users were likely to be more aware of their responsibilities and are self-policing the sport locally where possible.

5.113 Natural England is looking to undertake a similar approach with Jet skiers and the Essex Coast RAMS can build on this approach already taken forward by Natural England staff. A code of conduct would form a key aspect of supporting responsible behaviour and reducing the potential effect of powered paragliding and other recreational activities.

5.114 A code of conduct would not guarantee the avoidance of AEoI on its own, but it would certainly provide an important role in encouraging people to undertake recreational activities responsibly, particularly if promoted by RAMS rangers and linked to penalties and enforcement as is intended.

5.115 A code of conduct approach is not intended to mitigate for the small proportion of irresponsible people, but rather to educate and inform the majority of people who are keen to act in responsible and sensitive manner. Indeed, most forms of disturbance to are likely to be a result of ignorance rather than malice, therefore, whilst such measures will never be solely effective at eliminating potential impacts, they have a key role to play in contributing to the effectiveness of overall mitigation and avoidance, and therefore education through a code of conduct should be recognised as a key component to the Essex Coast RAMS.

5.116 Importantly, given the specialist nature of these activities, increases associated with the Local Plans is likely to be minor, and when this is coupled with the current absence of an Essex Coastal RAMS or similar mechanism for education and policing, the mitigation measures proposed are considered likely to represent a significant improvement relative to the current baseline level of impact.

On site management and monitoring

5.117 The Habitats sites are managed by Natural England, Essex Wildlife Trust and the RSPB, and therefore the RAMS was developed in close consultation and agreement with

these key stakeholders to ensure that the measures proposed will be targeted to resolving specific issues and recreational threats and maximise the benefit of the measures proposed in mitigating recreational impacts. This was achieved via workshops for the specific Habitats sites which included appropriate stakeholder representatives such as site managers and area advisers.

5.118 Detailed management measures are provided in the RAMS and have been specifically informed via the workshops and consultation described above. Recommended aspects for inclusion within the RAMS were informed by earlier iterations of this HRA and the Section 1 HRA and included, but were not limited to, the following:

- Provision of physical barriers to movement (fencing, screening, planting and bird hides).
- Provision of wardening, whether part-time, permanent or seasonal.
- Provision of educational resources including promoting self-regulation.
- Education initiatives such as provision of interpretation boards and signage, leaflets, posters, and liaison with local schools and leisure operators.
- Provision of infrastructure to encourage activities to focus on specific areas. E.g. via path upgrades, provision of benches and signage etc.
- Clear route signage.
- Closure and rerouting of paths during sensitive periods.
- Promoting a code of conduct aimed at providers and participants of water based recreation.
- Habitat management and enhancement to provide locations for birds away from disturbance sources (e.g. high tide roosts).

5.119 As described above, to ensure that the RAMS continues to be based upon up-to-date information, regular monitoring will be required. Bird surveys are regularly undertaken at each of the Habitats sites as part of the BTO's WeBS Core Counts and Low Tide Counts and it is therefore predicted that such information will be available but, to ensure certainty, a commitment will be required by the Essex Coast RAMS partner authorities that in the event that suitably up to date bird survey data is not available during each five year period, albeit unlikely, they will undertake equivalent survey work to inform the RAMS.

Update on Bird Aware Essex Coast

5.120 As previously explained in this HRA report, the need for a Recreational disturbance Avoidance and Mitigation Strategy (RAMS) was identified at an early stage in the iterative HRA process. Further consideration was given to this at the appropriate assessment stage, partly to reflect that mitigation measures must be considered at the appropriate assessment stage and also as examples of mitigation strategies elsewhere have continued to emerge and the conservation community continue to share good practice.

5.121 The Essex Coast RAMS Strategy Document, which will ensure that the RAMS is delivered in perpetuity, was finalised in January 2019 and adopted by the twelve local authority partners, including Colchester Borough Council. As already detailed in this report, Natural England initiated and were involved in the preparation of the Essex Coast RAMS and endorse the RAMS Strategy Document.

5.122 A RAMS SPD was consulted on in January-February 2020. The SPD has now been finalised and Natural England have confirmed that they endorse the SPD. Colchester Borough Council have now adopted the SPD. The Essex Coast RAMS has the brand name, Bird Aware Essex Coast, which uses the same branding as the well-established Bird Aware Solent. One of the partner LPAs has become the Accountable Body. They will be responsible for developer contributions and will employ a Delivery Officer to manage the project.

In-combination Effects

5.123 Recreational impacts by their very nature are in-combination effects. The avoidance and mitigation provided by the Bird Aware Essex Coast described above will not only ensure that the Local Plan does not contribute to additional recreational impacts, but will also ensure that Colchester Borough contributes towards reducing the effect of existing recreational pressure on Habitats Sites. Therefore there is no mechanism by which in-combination effects could occur with other plans and projects.

Conclusion

The delivery of the Essex Coast RAMS, or its brand name Bird Aware Essex Coast, is strengthened by the addition of several new paragraphs in the Section 1 Local Plan within the RAMS section which set out measures which will be required prior to effects occurring (MM5), and the new Policy SP2 (MM6) and proposed modifications to the Section 2 Local Plan to include reference to RAMS in Policy ENV1, which sets out how the RAMS will be delivered through contributions secured from development. This ensures certainty of regular monitoring and provides a mechanism which has the flexibility to adapt to

findings and pre-empt and remedy impacts before they have the potential to affect integrity. The Section 1 Local Plan Inspector concluded that the RAMS provision for monitoring its effectiveness, which it is intended will feed back into the mitigation measures in an iterative fashion, enabling adjustments and improvements to be made in response to evidence of how successful the measures are is a strength of the RAMS approach.

5.124 The RAMS is considered to provide an effective form of mitigation and avoidance for recreational pressures arising from the Local Plan.

5.125 Given that the Colchester Borough Council have prepared and adopted the Essex Coast RAMS in close consultation with Natural England and other key stakeholders, and have embedded the delivery and monitoring of the RAMS in specific policy commitments **there is sufficient certainty that the Local Plan, incorporating the proposed Main Modifications, will not result in adverse effects on the integrity of the Stour and Orwell Estuaries SPA/Ramsar, Essex Estuaries SAC, Colne Estuary SPA/Ramsar, or Blackwater Estuary SPA/Ramsar, either alone or in combination with other plans and projects as a result of recreation.**

Water Quantity and Quality

Stour and Orwell Estuaries SPA / Ramsar

5.126 The HRA Screening identified that the Local Plan has potential to result in significant adverse effects on the Stour and Orwell Estuaries SPA and Ramsar as a result of changes in water quality.

5.127 The Water Cycle Study (WCS) for Colchester (2016) identified Langham Water Recycling Centre (WRC) as being over capacity and there may be subsequent implications for receiving water bodies in terms of water quality, including the Stour Estuary. This WCS concluded that solutions are required in order to accommodate the growth to ensure that the increased wastewater flow discharged does not impact on the current quality of the receiving watercourses, their associated ecological sites and also to ensure that the watercourses can still meet with legislative requirements.

Mitigation

5.128 The Local Plan includes the following wording in relation to Policy SS9 (Langham): "*Development should not*

commence until adequate waste water and sewage treatment capacity is available to serve the new housing".

5.129 In addition, Policy PP1 in the Local Plan includes the following commitment to avoiding water quality/quantity impacts: "*proposals must, as relevant, address all of the following Borough wide requirements: Adequate wastewater treatment and sewage infrastructure enhancements for the relevant catchment area; and Appropriate SuDS for managing surface water runoff within the overall design and layout of the site*". In their representation to the Section 2 Local Plan, the Environment Agency said: "*We are supportive of the thrust of this policy and the supporting text.*" Anglian Water Services said in their representation: "*Policy PP1 refers to proposals demonstrating that adequate wastewater treatment and sewerage enhancements are provided where necessary which is supported.*"

5.130 Additional safeguards are also provided by the Strategic Section 1 Local Plan including a new paragraph to policy SP5 on Water and Waste water (mod reference 15) and additions to policies SP7 and SP8 (mod reference 22, 36 & 37). These provide an appropriate policy framework to ensure that proposed development will not have an adverse effect on the integrity of Habitats sites as a result of changes in water quantity and quality.

In-combination Effects

5.131 The overall quantum of proposed housing growth on North Essex was also assessed as part of the Strategic Section 1 Local Plan. The Integrated Water Management Strategy (IWMS), considered the maximum potential growth of all three proposed garden communities (43,720 dwellings at NEAGC1, NEAGC2 and NEAGC3, 2017 estimate), and identified that additional water demand from proposed growth could be accommodated beyond the plan period through a combination of strategic supply options, demand reduction and water efficiency measures. As a result, the HRA of the Section 1 Local Plan concluded with certainty a conclusion of no adverse effect on integrity.

5.132 As evidenced in the Statements of Common Ground with Anglian Water Services and the Environment Agency⁴³ and Natural England⁴⁴ for the Section 1 Local Plan, the conclusion was supported by these statutory consultees. The Section 1 Local Plan Inspector concluded that: "*requiring adequate waste water treatment capacity to be provided before dwellings are occupied, will ensure that no adverse*

⁴³ Strategic Section 1 Local Plan Examination – document reference SCG/002a

⁴⁴ Strategic Section 1 Local Plan Examination – document reference SCG/002a

impact on any European site will occur as a result of changes in water quality.”

5.133 Changes in water quality and quantity are by their very nature in-combination effects. The avoidance and mitigation safeguards committed to will ensure that the Local Plan does not contribute to changes in water quantity and quality and there is therefore no mechanism by which in-combination effects could occur with other plans and projects.

Conclusion

5.134 The Local Plan includes a commitment to the mitigation measures recommended above and therefore adverse effects on the integrity of the Stour and Orwell Estuaries SPA and Ramsar as a result of water quantity and quality, either alone or in-combination, will be avoided.

Implications of Main Modifications

5.135 As detailed in **Appendix E**, the main modifications have been reviewed to determine whether they influence the previous findings of the HRA. In conclusion, none of the main modifications alter those conclusions previously reached because the avoidance and mitigation measures described above, and their effectiveness and deliverability remain valid.

Summary of Appropriate Assessment

5.136 Table 5.6 summaries the conclusions of the Appropriate Assessment. The Habitats sites that are shown as screened out with no colour indicate sites that were considered to have no likely significant effect at the screening stage. The Habitats sites highlighted as having no AEoI in grey were found to have no AEoI providing the mitigation measures detailed in Chapter 5 are implemented.

Table 5.6: Summary of the Conclusion of the Appropriate Assessment

Habitats sites	Physical Damage and Loss	Non-physical Disturbance	Air Pollution	Recreation	Water Quantity and Quality
Essex Estuaries SAC	Screened out	Screened out	Screened out	No AEoI	Screened out
Hamford Water SAC	Screened out	Screened out	Screened out	Screened out	Screened out
Hamford SPA and Ramsar	Screened out	Screened out	Screened out	Screened out	Screened out
Abberton Reservoir SPA and Ramsar	No AEoI	Screened out	Screened out	No AEoI	Screened out
Blackwater Estuary (Mid-Essex Coast Phase 4) SPA and Ramsar	No AEoI	Screened out	Screened out	No AEoI	Screened out
Colne Estuary (Mid-Essex Coast Phase 2) SPA and Ramsar	No AEoI	Screened out	Screened out	No AEoI	Screened out
Stour and Orwell Estuaries SPA and Ramsar	No AEoI	Screened out	Screened out	No AEoI	No AEoI
Dengie (Mid-Essex Coast Phase 1) SPA and Ramsar	Screened out	Screened out	Screened out	No AEoI	Screened out

Habitats sites	Physical Damage and Loss	Non-physical Disturbance	Air Pollution	Recreation	Water Quantity and Quality
Outer Thames Estuary SPA	Screened out	Screened out	Screened out	No AEoI	Screened out
Foulness (Mid-Essex Coast Phase 5) SPA and Ramsar	Screened out	Screened out	Screened out	Screened out	Screened out
Crouch and Roach Estuaries (Mid-Essex Coast Phase 3) SPA and Ramsar	Screened out	Screened out	Screened out	Screened out	Screened out

Chapter 6

Conclusions and Next Steps

6.1 At the Screening stage, Likely Significant Effects (LSEs) on Habitats sites, either alone or in combination with other policies and proposals, were identified for Local Plan policies:

- Policy SG2: Housing Delivery
- Policy SG3: Economic Growth Provision
- Policy SG4: Local Economic Areas
- Policy TC3: Town Centre Allocations
- Policy NC1: North Colchester and Severalls Strategic Economic Area
- Policy NC2: North Station Special Policy Area
- Policy SC1: South Colchester Allocations
- Policy SC2: Middlewick Ranges
- Policy EC1: Knowledge Gateway and University of Essex Strategic Economic Area
- Policy EC2: East Colchester / Hythe Special Policy Area
- Policy EC3: East Colchester
- Policy WC1: Stanway Strategic Economic Area
- Policy WC2: Stanway
- Policy WC4: West Colchester
- Policy SS1: Abberton and Langenhoe
- Policy SS2: Boxted
- Policy SS3: Chappel and Wakes Colne
- Policy SS4: Copford
- Policy SS5: Eight Ash Green
- Policy SS6: Fordham
- Policy SS7: Great Horkesley
- Policy SS8: Great Tey
- Policy SS9: Langham
- Policy SS10: Layer de la Haye
- Policy SS11: Marks Tey
- Policy SS12a: West Mersea

- Policy SS12b: Coast Road, West Mersea
- Policy SS12c: Mersea Island Caravan Parks
- Policy SS13: Rowhedge
- Policy SS14: Tiptree
- Policy SS15: West Bergholt
- Policy SS16: Wivenhoe
- Policy OV1: Development in Other Villages
- Policy DM6: Economic Development in Rural Areas and the Countryside

6.2 The findings of the HRA screening determined that impacts from physical damage and loss, recreation and water quantity and quality could result in a likely significant effect in relation to:

- **Physical damage and loss (Offsite)** – in relation to Abberton Reservoir SPA and Ramsar, Blackwater Estuary (Mid-Essex Coast Phase 4) SPA and Ramsar, Colne Estuary (Mid-Essex Coast Phase 2) SPA and Ramsar, Stour and Orwell Estuaries SPA and Ramsar.
- **Recreation** – in relation to Essex Estuaries SAC, Abberton Reservoir SPA and Ramsar, Blackwater Estuary (Mid-Essex Coast Phase 4) SPA and Ramsar, Colne Estuary (Mid-Essex Coast Phase 2) SPA and Ramsar, Dengie SPA and Ramsar, Stour and Orwell Estuaries SPA and Ramsar, Outer Thames Estuary SPA.
- **Water Quantity and Quality** – in relation to Stour and Orwell Estuaries SPA and Ramsar.

6.3 The Appropriate Assessment stage identified whether the above likely significant effect will, in light of mitigation and avoidance measures, result in adverse effects on the integrity (AEol) of the Habitats sites either alone or in-combination with other plans or projects. The findings of the Appropriate Assessment are detailed below.

6.4 It can be concluded that no AEol will occur for the following Habitats sites subject to the provision of safeguarding and mitigation measures as detailed in Chapter 5.

- **Physical Damage and Loss** – the appropriate assessment concluded no AEol as a result of physical damage and loss to all Habitats sites providing the following safeguards and mitigation measures were implemented. Detail of this is provided below.
- **Recreation** – the appropriate assessment concluded no AEol as a result of increased recreational pressure in

relation to all Habitats sites providing the following safeguards and mitigation measures. Detail of this is provided below.

- **Water Quantity and Quality** – the appropriate assessment concluded that given the safeguards provided by policies SS9 and PP1, no AEol is predicted as a result of water quantity and quality in relation to Stour and Orwell Estuaries SPA and Ramsar.

Key Steps and Recommendations

6.5 Following the HRA of the Local Plan, the following key steps and recommended safeguards and mitigation measures were identified:

- **Physical Damage and Loss (Offsite)** – the Local Plan has committed to include the provision of the following mitigation measures:
 - Wintering Bird Surveys for sites identified with high and moderate suitability to support qualifying bird species to inform the importance of the site for these birds and to inform specific mitigation measures.
 - If the bird surveys identify that proposed new development will exceed the threshold of significance mitigation will be required. A commitment in the Local Plan to mitigate development following the completion of wintering bird surveys is therefore required.
- **Recreation** – Colchester Borough Council has signed up to and is a key partner in the Essex Coast RAMS/ Bird Aware Essex Coast recreational mitigation strategy, this mechanism is supported by Natural England as ensuring that AEol to Habitats Sites will be avoided through the Local Plan. The strategy has also been found robust and appropriate through the NEAs Section 1 Local Plan Examination in Public and Chelmsford City Council's Local Plan Examination. It therefore provides certainty that AEol will be avoided.
- **Water Quantity and Quality** – existing avoidance and policy commitments are considered sufficient to avoid AEol on Habitats Sites.

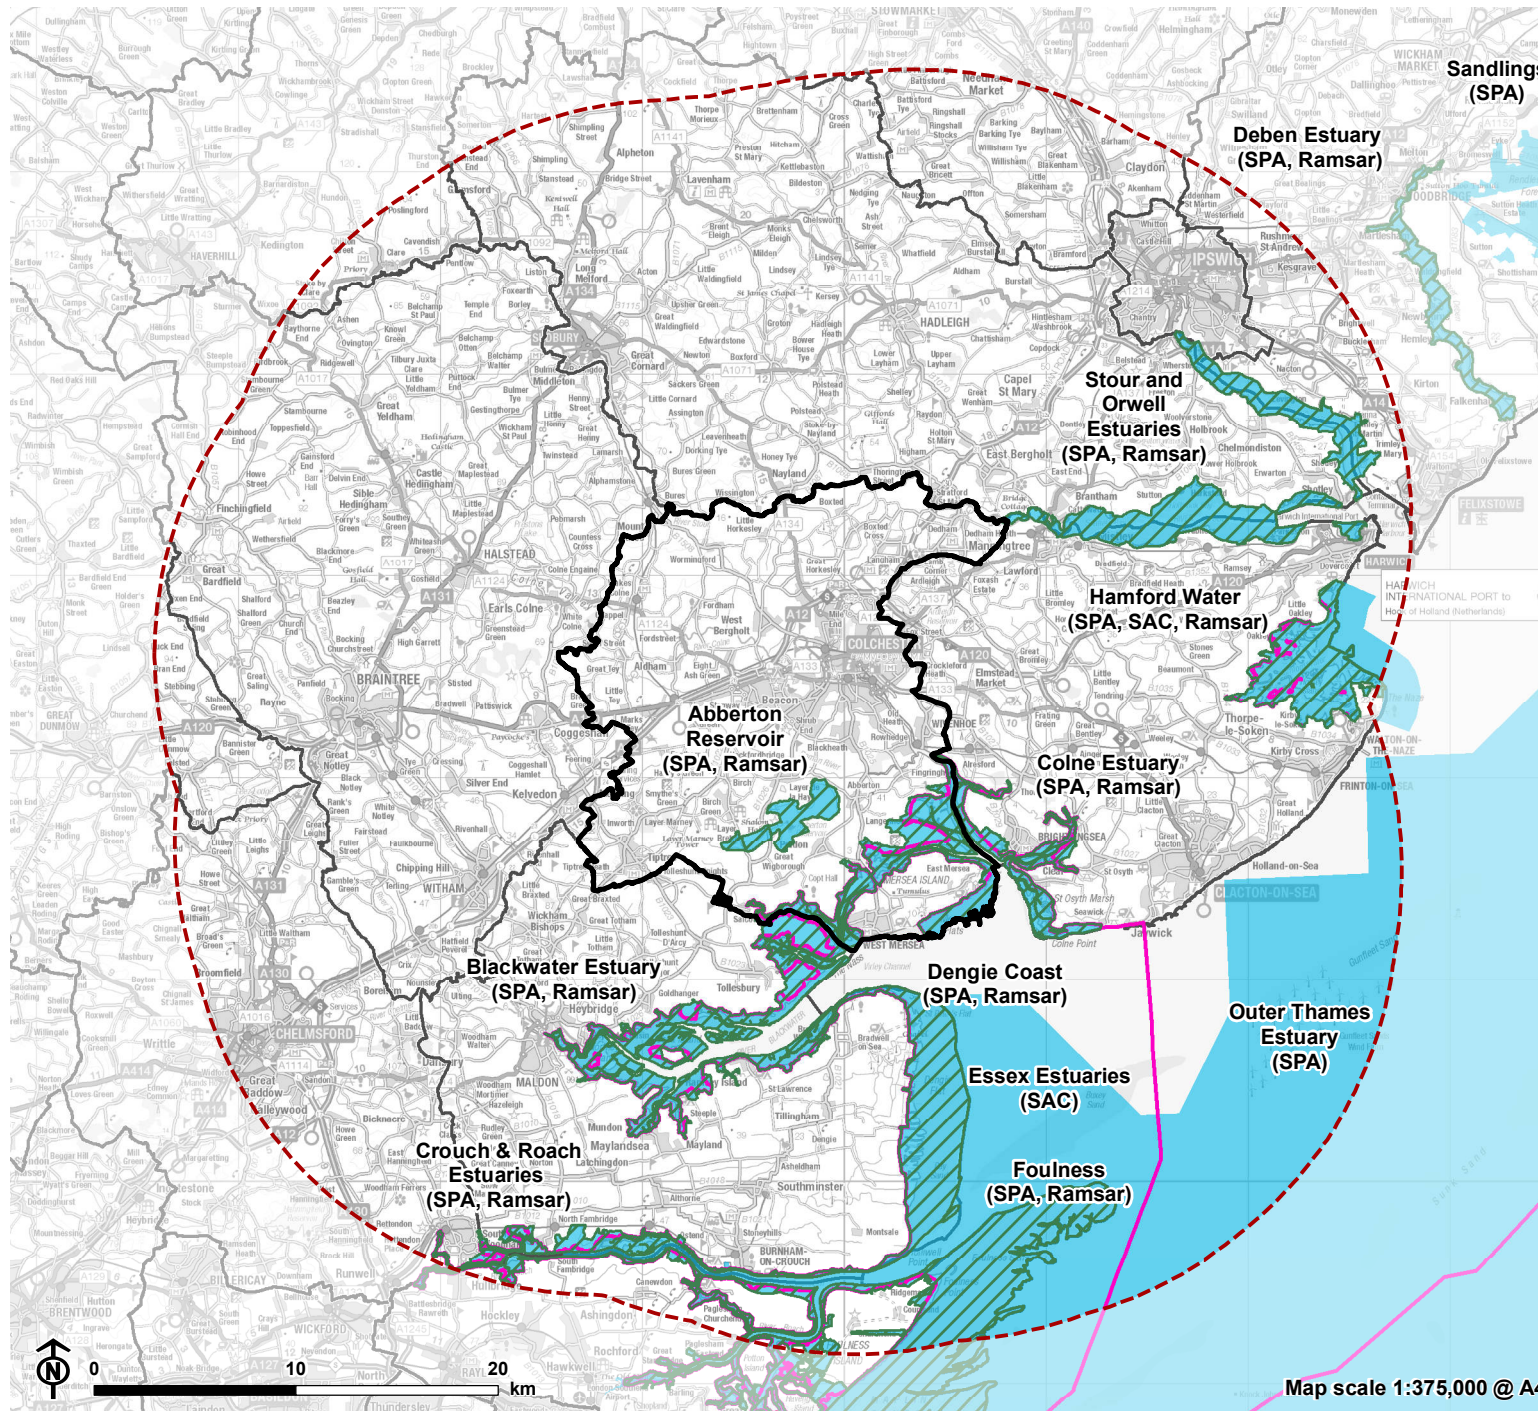

6.6 This report has been subject to consultation with Natural England to confirm continued support of the conclusions reached.

Appendix B
Habitats Site Information

This appendix contains information about the Habitats sites scoped into the HRA. Information about each site's area, the site descriptions, qualifying features and pressures and threats are drawn from Natural England's Site Improvement Plans (SIPs)⁴⁵ and the Standard Data Forms or Ramsar Information Sheets available from the JNCC website⁴⁶. Site conservation objectives are drawn from Natural England's website and are only available for SACs and SPAs.

Site Name	Area (ha)	Qualifying Features	Key vulnerabilities	Conservation Objectives	Non-qualifying habitats and species upon which the qualifying habitats and/or species depend
Large estuarine site in south-east England. The site comprises the major estuaries of the Colne, Blackwater, Crouch and Roach river.					
Essex Estuaries SAC	46140.82	<p>Annex 1 habitats that are a primary reason for selection of this site:</p> <ul style="list-style-type: none"> ■ Estuaries ■ Mudflats and sandflats not covered by seawater at low tide ■ Salicornia and other animals colonising mud and sand ■ Spartina swards (<i>Spartinion maritimae</i>) ■ Atlantic salt meadows (<i>Glauco-Puccinellietalia maritimae</i>) ■ Mediterranean and thermo-Atlantic halophilous scrubs <p>Annex 1 habitats present as a qualifying feature:</p>	<p>Coastal squeeze – Coastal defences along much of the Essex coastline prevent intertidal habitats from shifting landward in response to rising sea levels. As a result, these habitats are being gradually degraded and reduced in extent, 'Managed realignment' schemes and additional intervention measures to create new areas of intertidal habitat and reduce erosion rates are being implemented but more will be needed to offset future losses.</p> <p>Fisheries: Commercial marine and estuarine – Shellfish dredging over subtidal habitats has been identified as an Amber activity and is considered a high priority for assessment and development of possible management for the site.</p> <p>Bottom towed fishing gear has been categorised as a 'Red' for the interest features listed, specifically the seagrass beds <i>Zostera</i> spp, a sub-feature of the SAC.</p> <p>Planning Permission: general – Several of the issues affecting the Essex Estuaries and the management of disturbance effects on the sites are related to each other, and addressing them is likely to require an improved overview of the relative sensitivities of</p>	<p>With regard to the individual species and/or assemblage of species for which the site has been classified:</p> <ul style="list-style-type: none"> ■ Avoid the deterioration of the habitats of the qualifying features, and the significant disturbance of the qualifying features, ensuring the integrity of the site is maintained and the site makes a full contribution to achieving the aims of the Birds Directive. <p>Subject to natural change, to maintain or restore:</p> <ul style="list-style-type: none"> ■ The extent and distribution of the habitats of the qualifying features; 	<p>Habitat -</p> <p>The qualifying habitats of the SAC are reliant a range of coastal factors, including salinity, sedimentation, tide, sea level, turbidity and elevation, which influence the interdependent intertidal, subtidal and terrestrial habitats. These factors influence the complex interdependent intertidal, subtidal and terrestrial habitats present along the coast.</p> <p>Additional factors are provided below for each habitat (where relevant).</p> <p>Sandbanks which are slightly covered by sea water all the time</p> <p>Reef-building species such as <i>Sabellaria spinulosa</i> help to stabilise the sediment, allowing the colonisation of sessile animals.</p>

⁴⁶ JNCC Data Forms <http://jncc.defra.gov.uk/default.aspx?page=4>

Site Name	Area (ha)	Qualifying Features	Key vulnerabilities	Conservation Objectives	Non-qualifying habitats and species upon which the qualifying habitats and/or species depend
		<ul style="list-style-type: none"> Sandbanks which are slightly covered by seawater all the time 	<p>different habitats, species and locations to different types of development.</p> <p>Invasive species – Non-native invasive species such as the American whelk tingle <i>Urosalpinx cinerea</i> and Slipper limpet <i>Crepidula fornicata</i> are known to occupy subtidal muddy habitats, potentially impacting native communities through competition for resources and predation. Invasive common cord grass may adversely affect plant species for which the Essex Estuaries SAC is designated.</p> <p>Fisheries: Recreational marine and estuarine – Recreational bait digging may damage the intertidal mudflats and sandflats and associated sub-features and communities, such as eelgrass beds. The extent of the activity and potential impacts on site features are not currently well understood.</p> <p>Air Pollution: risk of atmospheric nitrogen deposition - Atmospheric nitrogen deposition exceeds the relevant critical loads for coastal dune habitats used by breeding terns and hence there is a risk of harmful effects. However, on the Essex estuaries declines in the numbers of breeding terns appear to be due mainly to erosion of a man-made cockle-shingle bank (at Foulness) and to disturbance (elsewhere), rather than to over-vegetation of breeding areas caused by nitrogen deposition.</p>	<ul style="list-style-type: none"> The structure and function of the habitats of the qualifying features; The supporting processes on which the habitats of the qualifying features rely; The populations of the qualifying features; <p>The distribution of the qualifying features within the site.</p>	
<p>The Stour and Orwell estuaries straddle the eastern part of the Essex/Suffolk border in eastern England. The estuaries include extensive mud-flats, low cliffs, saltmarsh and small areas of vegetated shingle on the lower reaches. The mud-flats hold <i>Enteromorpha</i>, <i>Zostera</i> and <i>Salicornia</i> spp. The site also includes an area of low-lying grazing marsh at Shotley Marshes on the south side of the Orwell. In summer, the site supports important numbers of breeding Avocet <i>Recurvirostra avosetta</i>, while in winter they hold major concentrations of waterbirds, especially geese, ducks and waders. The geese also feed, and waders roost, in surrounding areas of agricultural land outside the SPA.</p> <p>The site has close ecological links with the Hamford Water and Mid-Essex Coast SPAs, lying to the south on the same coast.</p>					

Site Name	Area (ha)	Qualifying Features	Key vulnerabilities	Conservation Objectives	Non-qualifying habitats and species upon which the qualifying habitats and/or species depend
Stour and Orwell Estuaries SPA	3676.92	<ul style="list-style-type: none"> ■ Annex I species: ■ Over winter: Hen Harrier <i>Circus cyaneus</i> <p>This site also qualifies under Article 4.2 of the Directive (79/409/EEC) by supporting populations of Habitats importance of the following migratory species:</p> <p>Over winter:</p> <ul style="list-style-type: none"> ■ Black-tailed Godwit <i>Limosa limosa islandica</i> ■ Dunlin <i>Calidris alpina alpina</i> ■ Grey Plover <i>Pluvialis squatarola</i> ■ Pintail <i>Anas acuta</i> ■ Redshank <i>Tringa totanus</i> ■ Ringed Plover <i>Charadrius hiaticula</i> ■ Shelduck <i>Tadorna tadorna</i> ■ Turnstone <i>Arenaria interpres</i> 	<p>Coastal squeeze – Coastal defences are present along most of the Orwell coastline to mitigate for impacts from climate change, such as rising sea level. Unless changes are made to the management of the coastline, habitats supporting qualifying SPA birds will be lost or degraded through coastal squeeze, sedimentation and reduced exposure.</p> <p>Public access/disturbance – Stour and Orwell Estuaries is subject to land- and water-based activities, including boating and water sports; walking; bait-digging; fishing; wildfowling; and military overflight training. These activities are likely to impact habitats supporting breeding and overwintering water birds. A better understanding of which species and habitats are most susceptible; which types of activity are most disturbing; and which locations and times of year are most sensitive is required to ensure the Estuaries are appropriately managed.</p> <p>Changes in species distribution – Declines in the number of bird species present at Orwell coastline have occurred. This is likely to be the result of changes in population and distribution on an international scale, due to climate change.</p> <p>Invasive species – An increase in <i>Spartina anglica</i> may be affecting the growth of <i>Spartina maritima</i>, a key habitat feature for qualifying bird roosting and feeding areas of saltmarsh and mudflat.</p> <p>Planning permission: General – The issue of development in combination with other factors is not fully understood. To ensure management is appropriate to the SPA a better understanding of the sensitivities relating to each habitat, species and location to different types of development is required. Difficult issues highlighted by the SIP include; a) Assessing the cumulative effects of numerous, small and often 'non-</p>	<p>With regard to the individual species and/or assemblage of species for which the site has been classified ("the Qualifying Features" listed below);</p> <p>Avoid the deterioration of the habitats of the qualifying features, and the significant disturbance of the qualifying features, ensuring the integrity of the site is maintained and the site makes a full contribution to achieving the aims of the Birds Directive.</p> <p>Subject to natural change, to maintain or restore:</p> <ul style="list-style-type: none"> ■ The extent and distribution of the habitats of the qualifying features; ■ The structure and function of the habitats of the qualifying features; ■ The supporting processes on which the habitats of the qualifying features rely; ■ The populations of the qualifying features; 	<p>In general, the qualifying bird species of the SPA rely on:</p> <ul style="list-style-type: none"> ■ The sites ecosystem as a whole (see list of habitats below). ■ Maintenance of populations of species that they feed on (see list of diets below). ■ Off-site habitat, which provide foraging habitat for these species. ■ Open landscape with unobstructed line of sight within nesting, foraging or roosting habitat. <p><i>Limosa limosa islandica</i>: Black-tailed Godwit:</p> <ul style="list-style-type: none"> ■ Habitat Preference – Marshy grassland and steppe, and on migration mudflats. ■ Diet - Insects, worms and snails, but also some plants, beetles, grasshoppers and other small insects during the breeding season. <p><i>Calidris alpina alpina</i>: Dunlin</p> <ul style="list-style-type: none"> ■ Habitat Preference – Tundra, moor, heath, and on migration estuaries and coastal habitat.

Site Name	Area (ha)	Qualifying Features	Key vulnerabilities	Conservation Objectives	Non-qualifying habitats and species upon which the qualifying habitats and/or species depend
		<p>The area qualifies under Article 4.2 of the Directive (79/409/EEC) by regularly supporting at least 20,000 waterfowl including:</p> <ul style="list-style-type: none"> ■ Cormorant <i>Phalacrocorax carbo</i>; ■ Pintail <i>Anas acuta</i>; ■ Ringed Plover <i>Charadrius hiaticula</i>; ■ Grey Plover <i>Pluvialis squatarola</i>; ■ Dunlin <i>Calidris alpina alpina</i>; ■ Black-tailed Godwit <i>Limosa limosa islandica</i>; ■ Redshank <i>Tringa tetanus</i>; ■ Shelduck <i>Tadorna tadorna</i>; ■ Great Crested Grebe <i>Podiceps cristatus</i>; ■ Curlew <i>Numenius arquata</i>; ■ Dark-bellied Brent Goose <i>Branta bernicla bernicla</i>; 	<p>standard' developments. b) Development outside the SPA boundary can have negative impacts, particularly on the estuaries' birds. c) Assessing the indirect, 'knock-on' effects of proposals. d) Pressure to relax planning conditions on existing developments.</p> <p>Air pollution: impact from atmospheric nitrogen deposition – Atmospheric nitrogen deposition exceeds the relevant critical loads for coastal dune habitats used by breeding terns and hence there is a risk of harmful effects.</p> <p>Inappropriate coastal management – Due to the presence of existing hard sea defences, such as sea walls there is little scope for adaptation to rising sea levels. Any freshwater habitats behind failing seawalls are likely to be inundated by seawater, which would result in the loss of this habitat within the SPA.</p> <p>Fisheries: Commercial and estuarine – Commercial fishing activities can be very damaging to inshore marine habitats and the bird species dependent on the communities they support. Any 'amber or green' categorised commercial fishing activities in Habitats Marine Sites are assessed by Kent and Essex Inshore Fisheries Conservation Authority (IFCA). This assessment takes into account any in-combination effects of amber activities and/or appropriate plans or projects.</p>	<ul style="list-style-type: none"> ■ The distribution of the qualifying features within the site. 	<ul style="list-style-type: none"> ■ Diet - Tundra, moor, heath, and on migration estuaries and coastal habitat. <p><i>Pluvialis squatarola</i>: Grey Plover</p> <ul style="list-style-type: none"> ■ Habitat Preference – Tundra, and on migration pasture and estuaries. ■ Diet - In summer, invertebrates and in winter primarily marine worms, crustaceans and molluscs. <p><i>Anas acuta</i>: Pintail</p> <ul style="list-style-type: none"> ■ Habitat Preference – Lakes, rivers, marsh & tundra ■ Diet - A variety of plants and invertebrates. <p><i>Tringa totanus</i>: Redshank</p> <ul style="list-style-type: none"> ■ Habitat Preference – Rivers, wet grassland, moors and estuaries. ■ Diet - Invertebrates, especially earthworms, crane-fly larvae (inland) crustaceans, molluscs, marine worms (estuaries). <p><i>Charadrius hiaticula</i>: Ringed Plover</p>

<p>The Colne Estuary is located on the coast of Essex in eastern England. It is a comparatively short and branching estuary, with five tidal arms that flow into the main channel of the River Colne. The estuary has a narrow intertidal zone predominantly composed of flats of fine silt with mud-flat communities typical of south-eastern English estuaries. The estuary is of importance for a range of wintering wildfowl and waders, in addition to breeding Little Tern <i>Sterna albifrons</i> which nest on shell, sand and shingle spits. There is a wide variety of coastal habitats which include mud-flat, saltmarsh, grazing marsh, sand and shingle spits, disused gravel pits and reedbeds which provide feeding and roosting opportunities for the large numbers of waterbirds that use the site.</p> <p>The Colne Estuary is an integral component of the phased Mid-Essex Coast SPA</p>

Consideration also needs to be given to black-tailed godwit, for which this Ramsar site is designated for;</p> <p>Black-tailed godwit <i>Limosa limosa islandica</i></p> <ul style="list-style-type: none"> ■ Habitat Preference – Marshy grassland and steppe, and on migration mudflats. ■ Diet – Insects, worms and snails, but also some plants, beetles, grasshoppers and other small insects during the breeding season.
<p>Abberton Reservoir is a large water storage reservoir close to the Essex coast. It is one of the most important reservoirs in the country for overwintering waterfowl and also supports substantial aggregations of moulting birds in early autumn and a large colony of tree-nesting cormorants. Causeways divide the reservoir into three sections.</p>					

Site Name	Area (ha)	Qualifying Features	Key vulnerabilities	Conservation Objectives	Non-qualifying habitats and species upon which the qualifying habitats and/or species depend
Abberton Reservoir SPA	726.2	<p>Supports the following internationally important waterbird assemblage:</p> <ul style="list-style-type: none"> ■ <i>Podiceps cristatus</i>; Great crested grebe (Non-breeding) ■ <i>Phalacrocorax carbo</i>; Great cormorant (Breeding) ■ <i>Cygnus olor</i>; Mute swan (Non-breeding) ■ <i>Anas penelope</i>; Eurasian wigeon (Non-breeding) ■ <i>Anas strepera</i>; Gadwall (Non-breeding) ■ <i>Anas crecca</i>; Eurasian teal (Non-breeding) ■ <i>Anas clypeata</i>; Northern shoveler (Non-breeding) ■ <i>Aythya ferina</i>; Common pochard (Non-breeding) ■ <i>Aythya fuligula</i>; Tufted duck (Non-breeding) 	<p>Siltation – high sediment load in reservoir inflow due to agricultural practices within catchment.</p> <p>Public access / disturbance – designated waterbirds are vulnerable to human disturbance but well controlled by Essex & Suffolk Water; occasional trespassing and disturbance by low flying aircraft.</p> <p>Planning permission: general – potential future threat to designated waterbirds if farmland providing supporting habitat close to the SPA were lost to development; requires further study.</p> <p>Changes in species distributions – unexplained decline in designated population of cormorant.</p> <p>Bird strike – death of designated mute swans and possibly other species from collision with overhead powerlines near reservoir.</p> <p>Water pollution – Water stored in the reservoir is high in nutrients (eutrophic) as it comes from intensively farmed catchment areas. Resulting algal blooms may include toxic blue-green algae that can kill wildfowl, though no significant mortality has been recorded.</p> <p>Historically, increased water from the reservoir led to low water levels although no decrease in wildfowl was attributed to this. Currently the water level of the main, eastern section is being raised by 3 metres to increase storage capacity. As part of the level-raising scheme, the original concrete banks have been removed and the shoreline re-profiled, creating extensive new areas of shallow wetland habitat for the site's waterfowl.</p> <p>The Water Company has a consultative committee which addresses conservation issues at all its sites, and the Abberton Reserve Committee (involving Essex Wildlife Trust and EN) addresses local issues.</p>	<p>With regard to the individual species and/or assemblage of species for which the site has been classified:</p> <p>Avoid the deterioration of the habitats of the qualifying features, and the significant disturbance of the qualifying features, ensuring the integrity of the site is maintained and the site makes a full contribution to achieving the aims of the Birds Directive.</p> <p>Subject to natural change, to maintain or restore:</p> <ul style="list-style-type: none"> ■ The extent and distribution of the habitats of the qualifying features; ■ The structure and function of the habitats of the qualifying features; ■ The supporting processes on which the habitats of the qualifying features rely; ■ The populations of the qualifying features; ■ The distribution of the qualifying features within the site. 	<p>In general, the qualifying bird species of the SPA rely on:</p> <ul style="list-style-type: none"> ■ The sites ecosystem as a whole (see list of habitats below). ■ Maintenance of populations of species that they feed on (see list of diets below). ■ Off-site habitat, which provide foraging habitat for these species. ■ Open landscape with unobstructed line of sight within nesting, foraging or roosting habitat. <p><i>Podiceps cristatus</i>; Great crested grebe (Non-breeding)</p> <ul style="list-style-type: none"> ■ Habitat Preference – Reed-bordered lakes, gravel pits, reservoirs and rivers. In the winter, they are also found along the coast. ■ Diet – Mostly fish, some aquatic invertebrates esp in summer. <p><i>Phalacrocorax carbo</i>; Great cormorant (Breeding)</p> <ul style="list-style-type: none"> ■ Habitat Preference – Larger lakes and coastal habitat.

Site Name	Area (ha)	Qualifying Features	Key vulnerabilities	Conservation Objectives	Non-qualifying habitats and species upon which the qualifying habitats and/or species depend
		<ul style="list-style-type: none"> ■ <i>Bucephala clangula</i>; Common goldeneye (Non-breeding) ■ <i>Fulica atra</i>; Common coot (Non-breeding) <p><i>Pluvialis apricaria</i>; European golden plover (Non-breeding)</p>	<p>Air Pollution: risk of atmospheric nitrogen deposition – The site is identified as at risk from air pollution as Nitrogen deposition levels exceed the site-relevant critical load for ecosystem protection. However the site's Nitrogen load is likely to be dominated by levels in the water entering the reservoir (mainly from the distant Ouse catchment) rather than direct deposition.</p>		<ul style="list-style-type: none"> ■ Diet – Fish, mostly by diving from surface. <p><i>Cygnus olor</i>; Mute swan (Non-breeding)</p> <ul style="list-style-type: none"> ■ Habitat Preference – Lakes, ponds & rivers. ■ Diet – Aquatic vegetation (to 1m deep), also grazes on land; occasionally takes insects, molluscs, small amphibians. <p><i>Anas penelope</i>; Eurasian wigeon (Non-breeding)</p> <ul style="list-style-type: none"> ■ Habitat Preference – Marsh, lakes, open moor, and on migration also estuaries. ■ Diet – Mostly leaves, shoots, rhizomes, also some seeds. <p><i>Anas strepera</i>; Gadwall (Non-breeding)</p> <ul style="list-style-type: none"> ■ Habitat Preference – Marshes, lakes, and on migration also rivers and estuaries. ■ Diet – Leaves, shoots, mostly while swimming with head under water. <p><i>Anas crecca</i>; Eurasian teal (Non-breeding)</p> <ul style="list-style-type: none"> ■ Habitat Preference – Lakes, marshes, ponds & shallow streams.

Screening Matrix

Habitat Regulations Assessment
September 2021

Plan Policy	Likely activities (operations) to result as a consequence of the proposal	Likely effect if proposal is implemented	Habitats site/s potentially affected	Could the proposal have likely significant effects
Sustainable Growth Policies				
Policy SG1: Colchester's Spatial Hierarchy	None - The policy sets out the spatial approach to development in the Borough between 2017 – 2033.	N/A	N/A	No
Policy SG2: Housing Delivery	<p>Yes - The policy sets out the overall housing numbers that need to be delivered over the Local Plan period between 2017-2033.</p> <p>This has potential to result in the following impacts:</p> <p>Loss and damage of habitats</p> <p>Increased in vehicle use</p> <p>Increase in recreational activities</p> <p>Increase in demand for water abstraction and treatment</p>	<p>Loss and/or damage of habitats</p> <p>Non-physical disturbance</p> <p>Non-toxic contamination</p> <p>Increased air pollution</p> <p>Disturbance from recreation</p> <p>Change in water quantity and increased water pollution</p>	<p>Essex Estuaries SAC</p> <p>Abberton Reservoir SPA and Ramsar</p> <p>Blackwater Estuary (Mid-Essex Coast Phase 4) SPA and Ramsar</p> <p>Colne Estuary (Mid-Essex Coast Phase 2) SPA and Ramsar</p> <p>Stour and Orwell Estuaries SPA and Ramsar</p> <p>Dengie (Mid-Essex Coast Phase 1) SPA and Ramsar</p> <p>Outer Thames Estuary SPA</p> <p>Hamford Water SAC, SPA and Ramsar</p> <p>Foulness (Mid-Essex Coast Phase 5) SPA and Ramsar</p> <p>Crouch and Roach Estuaries (Mid-Essex Coast Phase 3) SPA and Ramsar</p>	Uncertain

Appendix C
Screening Matrix

Habitat Regulations Assessment
September 2021

Plan Policy	Likely activities (operations) to result as a consequence of the proposal	Likely effect if proposal is implemented	Habitats site/s potentially affected	Could the proposal have likely significant effects
Policy SG3: Economic Growth Provision	<p>Yes - this policy identifies the strategic locations where new economic development will be directed in the Borough between 2017-2033. The policy allocates 39.7 ha of land for delivery of employment land.</p> <p>This has potential to result in the following impacts:</p> <p>Loss and damage of habitats.</p> <p>Increased in vehicle use</p> <p>Increase in demand for water abstraction and treatment</p>	<p>Loss and/or damage of habitats</p> <p>Non-physical disturbance</p> <p>Non-toxic contamination</p> <p>Increased air pollution</p> <p>Change in water quantity and increased water pollution</p>	As above	Uncertain
Policy SG4: Local Economic Areas	<p>Yes - this policy sets out the planning approach for development for Local Economic Areas across the Borough. The policy will lead to the development of land, principally for employment uses.</p> <p>This has potential to result in the following impacts:</p> <p>Loss and damage of habitats.</p> <p>Increased in vehicle use</p> <p>Increase in demand for water abstraction and treatment</p>	As above	As above	Uncertain

Appendix C
Screening Matrix

Habitat Regulations Assessment
September 2021

Plan Policy	Likely activities (operations) to result as a consequence of the proposal	Likely effect if proposal is implemented	Habitats site/s potentially affected	Could the proposal have likely significant effects
Policy SG5: Centre Hierarchy	Yes - this policy identifies a centres hierarchy for the Borough and also proposes two new district centres.	N/A	N/A	No - none of the centres are within close proximity to a Habitats site. Furthermore the policy does not allocate land for development. Therefore this policy will not result in likely significant effect on Habitats sites.
Policy SG6: Town Centre Uses	Yes - this policy seeks to allocate mixed use commercial areas within urban Colchester.	N/A	N/A	No – this policy will lead to the development of land but only within Colchester Town and only for commercial uses. The policy therefore will not result in likely significant effect on Habitats sites.
Policy SG6a Local Centres	None - this policy identifies the local centres in the Borough and sets out criteria for proposals affecting local centres.	N/A	N/A	No
Policy SG7: Infrastructure Delivery and Impact Mitigation	None - this policy identifies the requirement for all new development to deliver necessary infrastructure to make development sustainable.	N/A	N/A	No
Policy SG8: Neighbourhood Plans	None - this policy sets out the Council's position in relation to Neighbourhood Planning. It clarifies the different approaches to be followed for Neighbourhood Plans	N/A	N/A	No

Appendix C
Screening Matrix

September 2021

Plan Policy	Likely activities (operations) to result as a consequence of the proposal	Likely effect if proposal is implemented	Habitats site/s potentially affected	Could the proposal have likely significant effects
	allocating land and those not allocating land.			
Environmental Assets Policies				
Policy ENV1: Environment	None - the purpose of this policy is to protect all designated nature conservation sites and landscapes including internationally designated sites within the Borough.	N/A	N/A	No
Policy ENV2: Coastal Areas	None - this policy seeks to restrict inappropriate development within the Coastal Protection Belt and along undeveloped sections of the Borough's coast where the majority of the Habitats sites are.	N/A	N/A	No
Policy ENV3: Green Infrastructure	None – this policy will result in the delivery of new green and blue infrastructure across the Borough.	N/A	N/A	No
Policy ENV4: Dedham Vale Area of Outstanding Natural Beauty	None – this policy option seeks to protect the Dedham Vale AONB from inappropriate development.	N/A	N/A	No
Policy ENV5: Pollution and Contaminated Land	None - this policy sets out the requirements that developers must comply with regards the use and management of Pollution and Contaminated Land. The key aim of this policy is to ensure that development will not lead to an	N/A	N/A	No

Appendix C
Screening Matrix

Habitat Regulations Assessment
September 2021

Plan Policy	Likely activities (operations) to result as a consequence of the proposal	Likely effect if proposal is implemented	Habitats site/s potentially affected	Could the proposal have likely significant effects
	unacceptable risk to public health or safety, the environment or existing uses due to the potential for air pollution, noise nuisance, surface/ground water sources or land.			
Climate Change Policy				
Policy CC1: Climate Change	This policy encourages the delivery of renewable energy, sustainable technologies, improved energy efficiency. The policy itself will not lead to development.	N/A	N/A	No
Place Policy				
Policy PP1: Generic Infrastructure and Mitigation Requirements	None - this policy identifies general issues around infrastructure provision and developer contributions that affects proposals across the Borough and are essential to ensure that new development adequately mitigates its impacts on the surrounding area and makes a positive contribution to its character and amenity.	N/A	N/A	No
Central Colchester Policies				
TC1: Town Centre Policy and Hierarchy	Yes – this policy will result in the development of retail in main towns centres.	Loss and/or damage of habitats Non-physical disturbance	Essex Estuaries SAC	Uncertain

Appendix C
Screening Matrix

Plan Policy	Likely activities (operations) to result as a consequence of the proposal	Likely effect if proposal is implemented	Habitats site/s potentially affected	Could the proposal have likely significant effects
	not result in any adverse impacts on any Habitats sites as they already exist. Where New facilities are to be delivered, these will be delivered within urban Colchester and across the sustainable settlements at accessible locations to maximise benefits for local communities			
Policy DM4: Sports Provision	Yes - this policy will lead to the development of land to accommodate new sports facilities. The delivery of new strategic sports facilities will be focused at hub sites including the Garden Community; North Colchester; the University of Essex and the Garrison. The policy also supports expanding existing facilities where a need is identified.	N/A	N/A	No - this policy will result in small scale development that will not result in likely significant effect on Habitats sites.
Policy DM5: Tourism, Leisure, Culture and Heritage	Yes – this policy sets out the requirement for additional tourist facilities to meet.	N/A	N/A	No - this policy will result in small scale development that will not result in likely significant effect on Habitats sites. Furthermore, the policy states that proposals that are likely to have an adverse impact on the integrity of Habitats sites or the Dedham Vale AONB will not be supported.

Plan Policy	Likely activities (operations) to result as a consequence of the proposal	Likely effect if proposal is implemented	Habitats site/s potentially affected	Could the proposal have likely significant effects
Policy DM6: Economic Development in Rural Areas and the Countryside	Yes - this policy seeks to protect and manage existing Local Economic Areas across rural Colchester and includes criteria governing the re use conversion and extension of existing rural buildings in the countryside.	Change in water quantity and increased water pollution	N/A	Uncertain - a draft Water Cycle Study has highlighted potential water quality issues due to a lack of capacity at the Langham Water Recycling Centre. Potential impacts on the Stour Estuary needs further investigation.
Policy DM7: Agricultural Development and Diversification	Yes – this policy support and encourage appropriate farm diversification proposals.	N/A	N/A	No - this policy will result in small scale development that will not result in likely significant effect on Habitats sites.
Policy DM8: Affordable Housing	None – this policy sets out the requirement for affordable housing within the plan.	N/A	N/A	No
Policy DM9: Development Density	None - this policy sets out the factors that need to be considered to determine the appropriate housing density and massing of new residential developments.	N/A	N/A	No
Policy DM10: Housing Diversity	None – this policy seeks to ensure that a range of housing types is delivered.	N/A	N/A	No
Policy DM11: Gypsies, Travellers, and Travelling Showpeople	Yes – this policy confirms that gypsy and traveller provision up to 2023 will be delivered at the existing allocated site at Severalls Lane. The policy also states that future need for 9 pitches beyond 2023 will	N/A	N/A	No - the Severalls Lane site is a well-managed ECC Gypsy & Traveller site located in North Colchester well away from any Habitats sites in the Borough.

September 2021

Plan Policy	Likely activities (operations) to result as a consequence of the proposal	Likely effect if proposal is implemented	Habitats site/s potentially affected	Could the proposal have likely significant effects
	be provided in the new Garden Community.			This policy will result in small scale development that will not result in likely significant effect on Habitats sites.
Policy DM12: Housing Standards	None - this policy sets out the standards that all new housing developments will need to meet across the Borough	N/A	N/A	No
Policy DM13: Domestic development	Yes - this policy provides criteria to guide extensions and conversions and alterations to existing dwellings.	N/A	N/A	No - this policy will result in small scale development that will not result in likely significant effect on Habitats sites.
Policy DM14: Rural Workers' Housing	Yes - this policy sets out the planning consideration to manage the provision of rural workers accommodation.	N/A	N/A	No - this policy will result in small scale development that will not result in likely significant effect on Habitats sites.
Policy DM15: Design and Amenity	None - this policy sets out the policy criteria that all developments will be expected to satisfy to achieve good design and protect amenity.	N/A	N/A	No
Policy DM16: Historic Environment	None – this policy seeks to protect the character and appearance of historic assets.	N/A	N/A	No
Policy DM17: Retention of Open Space and Recreation Facilities	None - this policy protects the existing network of green links and open spaces and seeks to secure	N/A	N/A	No

Plan Policy	Likely activities (operations) to result as a consequence of the proposal	Likely effect if proposal is implemented	Habitats site/s potentially affected	Could the proposal have likely significant effects
	additional areas where deficiencies are identified.			
Policy DM18: Provision of Public Open Space	None - this policy sets out a requirement for all new development to provide at least 10% open space.	N/A	N/A	No
Policy DM19: Private Amenity Space	None - this draft policy seeks to increase provisions levels of private amenity space in the Borough.	N/A	N/A	No
Policy DM20: Promoting Sustainable Transport and Changing Travel Behaviour	None - this policy seeks to change travel behaviour and promote a modal shift to walking and cycling at the Borough level. The policy will could result in the development of land to accommodate new cycling/walking infrastructure.	The policy promotes the provision of sustainable modes of transport and as such may provide mitigation for the impacts of other policies in relation to increased car and the associated air pollution.	N/A	No - this policy will result in small scale development that will not result in likely significant effect on Habitats sites.
Policy DM21: Sustainable Access to Development	None - this policy seeks to improve the accessibility of new developments by ensuring that they are well linked to public transport points and walking and cycling networks. The policy will could result in the development of land to accommodate new cycling/walking infrastructure and result in an	The policy promotes the use of sustainable transport and as such may provide mitigation for the impacts of other policies in relation to increased car and the associated air pollution.	N/A	No - this policy will result in small scale development that will not result in likely significant effect on Habitats sites.

Appendix C
Screening Matrix

Habitat Regulations Assessment
September 2021

Plan Policy	Likely activities (operations) to result as a consequence of the proposal	Likely effect if proposal is implemented	Habitats site/s potentially affected	Could the proposal have likely significant effects
	increase in disturbance at designated sites.			
Policy DM22: Parking	None - This policy sets out parking standards to be met as part of new developments across the Borough.	N/A	N/A	No
Policy DM23: Flood Risk and Water Management	None - this policy seeks to reduce flood risk and promotes the provision of sustainable drainage as part of future development across the Borough.	N/A	N/A	No
Policy DM24: Sustainable Urban Drainage Systems	None - this policy seeks to reduce flood risk and promotes the provision of sustainable drainage as part of future development across the Borough.	This policy makes provision for SUDs, which may provide mitigation for impacts relating to water quality and quantity.	N/A	No
Policy DM25: Renewable Energy, Water, Waste and Recycling	None - this policy seeks to improve the efficiency of new developments across the Borough in terms of energy and water, waste and recycling. The policy sets standards for water and energy use but is also clarifies mitigation measures needed as part of any renewable energy schemes.	Seeking improved water efficiency in new development will be beneficial in terms of water supply, while reducing the amount of waste going to landfill will help reduce the risk of pollution in receiving water bodies.	N/A	No

Appendix D

Review of other plans and projects for in-combination effects

North Essex Authorities Shared Strategic Section 1 Local Plan	
Plan Owner/ Competent Authority	Braintree District, Colchester Borough, and Tendring District Councils
Related work HRA/AA	HRA Report for North Essex Authorities Shared Strategic Section 1 Local Plan
Notes on Plan documents	The neighbouring authorities of North Essex agreed to come together because of their shared desire to promote sustainable growth; and the particular need to articulate the strategic priorities within the wider area and how they will be addressed. Central to this is the effective delivery of planned strategic growth, particularly housing and employment development, with the necessary supporting infrastructure.
<p>Conclusions on potential effects of relevance to Habitats sites within scope of HRA of Colchester Local Plan</p> <p>The approach being taken by the North Essex Authorities in addressing the key issues, particularly the strategic and collaborative approach, and working closely with Natural England, is advocated and deemed to be the most appropriate and pragmatic approach in ensuring that the Shared Strategic Section 1 Local Plan is sound.</p> <p>In light of the People Over Wind and Holohan ruling, it can be confirmed that the findings of the HRA rely on avoidance and mitigation measures only at the Appropriate Assessment and that the complex relationships between qualifying and non-qualifying habitats and species for each site are taken into account.</p> <p>In conclusion, providing that key recommendations and mitigation requirements are adopted and implemented, the Shared Strategic Section 1 Local Plan will not result in adverse effects on the integrity of Habitats sites either alone or in-combination.</p>	

Braintree Section 2 Local Plan	
Plan Owner/ Competent Authority	Braintree District Council
Related work HRA/AA	Habitat Regulations Assessment of Braintree Local Plan
Notes on Plan documents	The New Local Plan was submitted to the Planning Inspectorate on 9th October 2017. Section 1 was adopted by Braintree in February 2021.
<p>Conclusions on potential effects of relevance to Habitats sites within scope of HRA of Braintree Local Plan</p> <p>The Braintree Section 2 HRA concluded at the Screening stage that there was potential for Likely Significant Effects on the Colne Estuary SPA/Ramsar, Essex Estuaries SAC, and Blackwater Estuary SPA/Ramsar as a result of the effect of recreational impacts in-combination with the Tendring District Section 2 Local Plan, Colchester Borough Section 2 Local Plan, and the Shared Strategic Section 1 Local Plan.</p> <p>The Appropriate Assessment stage identified whether the above Likely Significant Effects would, in light of mitigation and avoidance measures, result in adverse effects on the integrity of the Habitats sites as a result of the in-combination effects identified. Where necessary, suitable mitigation measures and modified policy wording was provided which would enable a sufficient level of certainty to conclude no Adverse Effect on Integrity (AEoI).</p>	

Braintree Section 2 Local Plan	
<p>The key recommendation made in the HRA report was for a Recreational disturbance Avoidance and Mitigation Strategy (RAMS) to be prepared jointly by the North Essex Authorities to mitigate the effect of recreational pressures on the above Habitats Sites. As detailed in Section 6, an Essex Coast RAMS has now been prepared. The Braintree Section 2 HRA concluded that, providing the key recommendations and mitigation requirements were implemented there would be no adverse effect on the Colne Estuary SPA/Ramsar, Essex Estuaries SAC, and Blackwater Estuary SPA/Ramsar, either alone or in-combination with other plans and projects.</p>	

Tendring Section 2 Local Plan	
Plan Owner/ Competent Authority	Tendring District Council
Related work HRA/AA	Habitat Regulations Assessment of Tendring Local Plan
Notes on Plan documents	On 9 October 2017 Tendring District Council, along with Braintree and Colchester Councils, submitted their Local Plans and accompanying documents to the Planning Inspectorate. Section 1 Local Plan was adopted in January 2021.
<p>Conclusions on potential effects of relevance to Habitats sites within scope of HRA of Tendring Local Plan</p> <p>The Tendring Draft Local Plan Section 2 HRA concluded at the Screening stage, that Likely Significant Effects on Habitats sites, either alone or in combination with other policies and proposals, could not be ruled out in relation to:</p> <p>Physical loss/damage on Abberton Reservoir SPA/Ramsar (offsite only), Blackwater Estuary SPA/Ramsar (offsite only), Hamford Water SAC (offsite only), Hamford Water SPA/Ramsar (offsite only), Stour and Orwell Estuaries SPA/Ramsar (direct and offsite habitat loss), and Colne Estuaries SPA and Ramsar (offsite only).</p> <p>Recreational Impacts – Essex Estuaries SAC, Hamford Water SAC, Hamford Water SPA/Ramsar, Stour and Orwell Estuaries SPA and Ramsar, and Colne Estuary SPA/Ramsar.</p> <p>Water quality – Essex Estuaries SAC, Stour and Orwell Estuaries SPA/Ramsar, Colne Estuary SPA/Ramsar.</p> <p>Non-toxic contamination – Stour and Orwell Estuaries SPA/Ramsar.</p> <p>Non-physical disturbance – Stour and Orwell Estuaries SPA/Ramsar.</p> <p>The HRA advocated the approach to avoidance and mitigation being taken by Tendring District Council in addressing the key issues, particularly with regards to working alongside the other North Essex Authorities in relation to strategic growth. The HRA concluded that subject to specific policy safeguards and providing that additional mitigation measures and safeguards in relation to policies SAE5 and SAE6 were adopted and successfully implemented, it was concluded that there would be no adverse effects on Habitats sites either alone or in-combination. Natural England in its role as the Statutory Consultee for the HRA, has confirmed that it supports these conclusions.</p>	

Babergh Core Strategy & Policies (2011-2031) Local Plan ⁴⁷	
Plan Owner/ Competent Authority:	Babergh District Council
Related work HRA/AA:	Core Strategy Submission Draft HRA Screening Report September 2011 ⁴⁸

⁴⁷ <http://www.babergh.gov.uk/planning-and-building/planning-policy/local-babergh-development-framework/core-strategy-and-policies-dpd/>

⁴⁸ <http://www.babergh.gov.uk/planning-and-building/planning-policy/local-babergh-development-framework/core-strategy-and-policies-dpd/core-strategy-consultations/>

Babergh Core Strategy & Policies (2011-2031) Local Plan⁴⁷	
Notes on Plan documents:	<p>Local Plan was adopted in February 2014.</p> <p>Provision for 5,975 new dwellings and employment space to accommodate 9,700 new jobs during 2011-2031.</p> <p>Employment and housing growth will be accommodated within Babergh's existing settlement pattern and in new mixed and balanced communities on the edges of the towns and the Babergh Ipswich Fringe.</p>
<p>Conclusions on potential effects of relevance to Habitats sites within scope of HRA of Babergh Local Plan</p> <p>The HRA screening suggests that Babergh will primarily need to ensure the impacts on the Stour and Orwell estuaries are monitored, as other Habitats sites which could potentially be affected will be monitored by other councils</p> <p>The following types of potential Likely Significant Effect were identified:</p> <p>Water resources and quality: Provided the recommendations of the Water Cycle Study are incorporated into the Core Strategy, Likely Significant Effects as a result of changes in water resources or quality are not predicted.</p> <p>Wind turbines: Provided the recommendations are followed to make it clear that development supported by Policy CS9 must still meet other requirements for sustainability, including protection of Habitats sites, Likely Significant Effects are not predicted.</p> <p>Coastal processes: Coastal squeeze has been identified as an issue at some locations along the Stour and Orwell Estuaries SPA / Ramsar site in Natural England monitoring records; however development close to the coast is not suggested outside existing built up areas. Therefore indirect effects through increased coastal squeeze are not predicted as a result of the Core Strategy.</p> <p>Recreational pressure: Recreational use of the estuaries can result in disturbance of wintering birds. Babergh District Council is contributing to the wider mitigation strategy under the Haven Gateway Green Infrastructure Strategy and has made provision for new public open space at key sites close to the estuaries. As a precautionary approach is proposed this provides Babergh Council with the opportunity to take additional action if unexpected increases in disturbance occur. Therefore, subject to the mitigation strategy Likely Significant Effects would not be predicted.</p>	

Core Strategy of the Suffolk Coastal District Local Plan⁴⁹	
Plan Owner/ Competent Authority:	East Suffolk Council
Related work HRA/AA:	Appropriate Assessment of Suffolk Coastal District Council Core Strategy and Development Management Policies ⁵⁰
Notes on Plan documents:	<p>On the 1st April 2019, East Suffolk Council was created, covering former districts Suffolk Coastal District Council and Waveney District Council. The Local Plan from the former council still applies and covers the area of Suffolk Coastal District Council.</p> <p>Development provided for includes up to 11,000 new houses between 2001 and 2021 and 8000 new jobs between 2001 and 2027.</p>
<p>Conclusions on potential effects of relevance to Habitats sites within scope of HRA of Suffolk Coastal District Local Plan</p> <p>The HRA concluded that policy SP2: Housing Numbers would have an adverse effect upon the integrity of a number of Habitats sites along the Suffolk Coast and Heath alone and in-combination as a result of increased visitor pressure in-combination with the Ipswich Borough Core Strategy and Policies. Mitigation is proposed which, if implemented, would reduce the adverse effect to an insignificant level and would enable a conclusion that it can be ascertained that there will be no adverse effect upon the integrity of any Habitats site.</p>	

Maldon District Local Development Plan	
Plan Owner/ Competent Authority:	Maldon District Council
Related work HRA/AA:	Maldon District Council Pre-Submission Local Development Plan 2014 - 2029 Sustainability Appraisal Report incorporating Strategic Environmental Assessment and Habitats Regulations Assessment
Notes on Plan documents:	<p>The Maldon District Local Development Plan was approved by the Secretary of State in July 2017.</p> <p>Development provided for in the Plan includes at least 4,650 dwellings during 2014-2029.</p>

⁴⁹ <https://www.eastsuffolk.gov.uk/assets/Planning/Suffolk-Coastal-Local-Plan/Core-Strategy-and-DMP/SCDC-Local-Plan-July-2013.pdf>

⁵⁰ <https://www.eastsuffolk.gov.uk/assets/Planning/Suffolk-Coastal-Local-Plan/Core-Strategy-and-DMP/AA-Report-Nov-2011.pdf>

Maldon District Local Development Plan	
Conclusions on potential effects of relevance to Habitats sites within scope of HRA of Maldon Local Plan	
The HRA Screening Assessment on the potential for likely significant effects on the Blackwater Estuary SPA and Ramsar; Colne Estuary SPA and Ramsar; Crouch and Roach Estuaries SPA and Ramsar; Dengie SPA and Ramsar, and Essex Estuaries SAC, for the Maldon District Post Examination Local Development Plan policies concluded that there will be no significant adverse effects on the integrity of these international sites alone or in-combination.	

South Cambridgeshire Local Plan	
Plan Owner/ Competent Authority:	South Cambridgeshire District Council
Related work HRA/AA:	South Cambridgeshire Local Plan Submission Habitats Regulations Assessment ⁵¹
Notes on Plan documents:	The South Cambridgeshire Local Plan was adopted on 27 September 2018. Development provided for in the Plan includes 19,000 new homes and 22,000 additional jobs between 2011 to 2031.
Conclusions on potential effects of relevance to Habitats sites within scope of HRA of South Cambridgeshire Local Plan	
The following types of potential Likely Significant Effect were identified:	
Water Quantity and Quality: increased demand for water supply, sewage discharge and surface run-off were identified as potential impacts to Habitats sites including Ouse Washes SPA, Breckland SAC / SPA, Fenland SAC and Portholme SAC. Negotiations between Anglian Water and Environment Agency, along with investigations by the Environment Agency and existing infrastructure it is considered sufficient to prevent Likely Significant Effects to these Habitats sites. In addition to this, the promotion of Northstowe greenfield site as an Eco-town is likely to minimise impacts in relation to Ouse Washes SPA and provision of a Water Level Management Plan will provide appropriate mitigation for Portholme SAC.	
Recreational pressure: Numbers were not considered to significantly change at Eversden and Wimpole Woods SAC, Devils Dyke SAC as a result of increased housing in the District. For Fenland SAC, the HRA highlighted the potential need restrict access to this site, and any recreational activities within, may need to be controlled Overall, no Likely Significant Effects were identified.	
In addition to this, the modification of housing policy H/1 to include three small-scale Parish-led residential allocations in Great Abington and Little Abington, and one small scale Parishled residential allocation in Graveley was found to have no Likely Significant Effects.	
The HRA concluded no Likely Significant Effects either alone or in combination with other plans and projects on Habitats sites identified in the assessment.	

Core Strategy Development Plan ⁵² and Joint development management policies ⁵³	
Plan Owner/ Competent Authority	St Edmundsbury Borough Council (now forms part of the West Suffolk Council)
Related work HRA/AA	Habitats Regulations Assessment of St Edmundsbury Core Strategy ⁵⁴ Habitats Regulations Assessment of Development Management Policies Document ⁵⁵
Notes on Plan documents	Core Strategy was adopted in December 2010. Following this, a Joint Development Management Policies Document was produced with Forest Heath District Council in February 2015. The Core Strategy makes provision for the construction of at least 9,000 new homes in St Edmundsbury between 2008 and 2031.

Core Strategy Development Plan⁵² and Joint development management policies⁵³

Conclusions on potential effects of relevance to Habitats sites within scope of HRA of St Edmundsbury Local Plan

Core Strategy Development Plan

Four policies were identified in the Core Strategy with potential to impact Habitats sites. This included CS1: St Edmundsbury Spatial Strategy, CS9: Employment and the Local Economy, CS11: Bury St Edmunds Strategic Growth and CS12: Haverhill Strategic Growth. These policies were found to have potential to affect Breckland SAC/SPA and Waveney and Little Ouse Valley Fens SAC in relation to recreational pressure and air pollution.

The policies within the Plan are at a strategic level with exact details on location, design and/or when (or if) these sites will be constructed upon was not known. Follow on lower tier Development Plan Documents (DPDs) for Policies CS1, CS9, CS11 and CS12 including Bury St Edmunds Area Action Plan (AAP), Haverhill AAP and Site Allocations DPDs (including Rural Allocation Sites and the Gypsy and Travellers sites), which will provide more detail. The plan commits to an HRA being carried out at the development control stage/lower tier development plan stage for any development arising out of these policies.

Development Management Policies

The HRA identified 24 of the 50 policies with potential for development. Overall, it concluded no Likely Significant Effects on the Breckland SAC or the Breckland SPA, Waveney and Little Ouse SAC, Devils Dyke SAC, Rex Graham Reserve SAC alone or in-combination with other plans and policies.

Chelmsford Local Plan 2013-2036⁵⁶

Plan Owner/ Competent Authority	Chelmsford City Council
Related work HRA/AA	Chelmsford Local Plan Habitats Regulations Assessment (HRA)
Notes on Plan documents	Chelmsford City Council adopted the Chelmsford Local Plan 2013-2036 in May 2020. Development provided for includes 18,515 new houses during 2013-2036.

Conclusions on potential effects of relevance to Habitats sites within scope of HRA of Chelmsford Local Plan

A 'screening assessment' determined that significant effects on 15 European sites or sites treated as such as a matter of Government policy could not be self-evidently excluded (the sites associated with the Essex estuaries, specifically Essex Estuaries SAC, Crouch and Roach Estuaries (Mid-Essex Coast Phase 3) SPA, Crouch and Roach Estuaries (Mid-Essex Coast Phase 3) Ramsar, Blackwater Estuary (Mid-Essex Coast Phase 4) SPA, Blackwater Estuary (Mid-Essex Coast Phase 4) Ramsar, Benfleet and Southend Marshes SPA, Benfleet and Southend Marshes Ramsar, Foulness (Mid-Essex Coast Phase 5) SPA, Foulness (Mid-Essex Coast Phase 5) Ramsar, Thames Estuary and Marshes SPA, Thames Estuary and Marshes Ramsar, Dengie (Mid-Essex Coast Phase 1) SPA, Dengie (Mid-Essex Coast Phase 1) Ramsar, and Outer Thames Estuary SPA; and in Epping Forest SAC).

Consequently, an 'appropriate assessment' was completed in accordance with the Regulations to determine the implications of the Local Plan for the qualifying features of those sites with reference to their Conservation Objectives. This assessment took into account mitigation measures included within the Local Plan and hence concluded that either the effects would not be significant, or that no adverse effects on European site integrity would occur.

The Council has therefore concluded that the Local Plan will have no adverse effects on the integrity of any European site, alone or in combination with other plans or projects. This conclusion has been accepted by Natural England following formal consultation and Examination in Public and the Council has adopted the Local Plan on this basis.

Ipswich Local Plan 2011-2031 ⁵⁷	
Plan Owner /Competent Authority	Ipswich District Council
Related work HRA/AA	Habitat Regulation Assessment of Pre-Submission modifications to the Ipswich Borough Council Core Strategy and Policies DPD Review (Proposed Submission stage) ⁵⁸ Habitats Regulations Assessment of Pre-Submission modifications to the Ipswich Borough Council Site Allocations and Policies (incorporating IP-One Area Action Plan) DPD – (Proposed Submission) ⁵⁹
Notes on Plan documents	The Ipswich Local Plan, which comprises Core Strategy and Policies Development Plan Document (DPD) Review and Site Allocations and Policies was submitted to the Secretary of State for examination. The revised Local Development Scheme was approved by the Council on 27th February 2019 and came into effect on 19 th March 2019. Development provided for includes 13,550 new houses and 12,500 new jobs by 2031.
Conclusions on potential effects of relevance to Habitats sites within scope of HRA of Ipswich Local Plan	
<i>HRA of Pre-Submission modifications to the Ipswich Borough Council Core Strategy and Policies DPD Review</i>	
Policy CS7: The Amount of Housing Required was identified with potential to result in Likely Significant Effects as a result of an amendment to the policy, which could potentially change the amount and location of housing required and therefore change the impact of housing growth on Habitats sites. The policy however was amended and found to have no Likely Significant Effect on Habitats sites.	
No plans with exception to Ipswich Borough Site Allocations and Policies were found to have Likely Significant Effect, which was submitted for consultation alongside the Proposed Submission Core Strategy and Policies Development Plan Document Review consultation.	
<i>Habitats Regulations Assessment of Pre-Submission modifications to the Ipswich Borough Council Site Allocations and Policies DPD</i>	
Policy SP2: Land allocated for housing and policies map was identified with potential for Likely Significant Effects, due to planning permission, which have lapsed and, which were at the time of consultation of the Proposed Submission DPD included in policy SP3 have been moved to policy SP2. A review of all sites moved to policy SP2 as a Pre-Submission Main Modification were identified outside the area within which residents of housing walk to Orwell Country Park, which could affect the Stour and Orwell SPA/Ramsar and was therefore found to have no Likely Significant Effect and remained in line with conclusions of the December 2014 Appropriate Assessment.	
All Pre-Submission Main Modifications and Pre-Submission Additional Modifications to the Ipswich Borough Council Site Allocations and Policies DPD were found not likely to have a significant effect on any Habitats site and it was concluded that there is no change to the conclusions of the Appropriate Assessment (December 2014) submitted for consultation alongside the Development Plan Document consultation.	

Wivenhoe Neighbourhood Plan 2019-2033 ⁶⁰	
Plan Owner /Competent Authority	The Wivenhoe Neighbourhood Plan Group
Related work HRA/AA	HRA Screening Assessment of Wivenhoe Neighbourhood Plan & Appropriate Assessment of the Wivenhoe Neighbourhood Plan
Notes on Plan documents	The Neighbourhood Plan was approved in a Referendum held on 2 May 2019. The Neighbourhood Plan will now be made part of Colchester Borough Council's local development plan.
Conclusions on potential effects of relevance to Habitats sites within scope of HRA of Wivenhoe Neighbourhood Plan

Wivenhoe Neighbourhood Plan 2019-2033 ⁶⁰	
The HRA considered the potential impacts on recreation, loss of agricultural land and impacts to water courses. Following a detailed assessment, it was concluded that there were no likely significant effects on any Habitats sites alone or in-combination.	

Essex Minerals Local Plan	
Plan Owner/ Competent Authority	Essex County Council
Related work HRA/AA	Essex County Council Replacement Minerals Local Plan: Pre Submission Draft Habitats Regulations Assessment Report November 2012
Notes on Plan documents	The Essex Minerals Local Plan was adopted on 8 July 2014. The plan sets out the broad locations where future mineral extraction and associated development will be preferred, and the areas where mineral extraction is discouraged, preferred sites and development management policies. The Essex Minerals Local Plan 2014 Review Consultation was undertaken in in Spring 2021.
<p>Conclusions on potential effects of relevance to Habitats sites within scope of HRA of Essex Minerals Local Plan</p> <p>Air quality: Likely significant effects from increased heavy goods vehicle traffic on roads in proximity to Habitats sites ruled out following amendment of the Plan to include supporting text requiring an air quality analysis where any proposal would result in an increase of more than 200 HGV movements per day within 200 m of a Habitats site.</p> <p>Predation: Following completion of mineral extraction it is common for minerals sites to be used for landfill. Landfill sites can attract large number of birds such as gulls or crows which can have an adverse predation effect on nesting birds at wildlife sites within 5 km of the landfill (particularly ground nesting species). Preferred minerals sites allocated by the Plan include ones within 5 km of Abberton Reservoir SPA and Ramsar site (wintering and passage waterfowl and cormorant populations sensitive to predation) and Colne Estuary (Mid-Essex Coast Phase 2) SPA and Ramsar site (little tern population particularly sensitive to predation). Likely significant predation effects were ruled out on the basis that the Plan adopt recommendations to prevent putrescible waste being sent for landfill at the relevant, preferred minerals sites.</p>	

The Essex and Southend-on-Sea Waste Local Plan	
Plan Owner/ Competent Authority	Essex County Council
Related work HRA/AA	Essex County Council and Southend-on-Sea Borough Council Replacement Waste Local Plan: Pre-submission – Habitat Regulations Assessment Screening Report (January 2016)
Notes on Plan documents	The Essex and Southend-on-Sea Waste Local Plan was adopted by Essex County Council on 11 July and by Southend-on-Sea Borough Council on 19 October 2017.
<p>Conclusions on potential effects of relevance to Habitats sites within scope of HRA of Essex Local Transport Plan</p> <p>The HRA concluded that the main potential for adverse effects caused by the allocated sites is likely to be from air pollution, water pollution or disturbance to birds. It stated that it should be possible to mitigate the effects identified.</p> <p>Air pollution and bird disturbance not related to recreational actions have been ruled out of the Basildon Local Plan HRA and the Essex Waste Local Plan will therefore not contribute to likely significant effects or greater as a result of in-combination effects. In combination effects are therefore limited to water pollution, however the HRA concludes that such measures can be avoided through the implementation of control measures and as a result, the potential for in-combination effects between the plans as a result of water pollution is also considered negligible.</p>	

Essex Local Transport Plan 3 2011-2026 (LTP3)	
Plan Owner/ Competent Authority	Essex County Council
Related work HRA/AA	HRA Screening Report June 2011
Notes on Plan documents	<p>Essex Transport Strategy: the Local Transport Plan for Essex, June 2011</p> <p>Transport priorities for the Thames Gateway, the part of Essex in which Basildon is located, are:</p> <ul style="list-style-type: none"> • Providing for and promoting access by sustainable modes of travel to new development areas; • Improving public transport links within and between the Thames Gateway towns (including the A13 Passenger Transport Corridor and South Essex Rapid Transport (SERT) schemes); • Improving the availability of sustainable travel choices and raising public awareness of these through travel planning; • Addressing maintenance, signing and broken links in the cycle network to improve conditions for cyclists and create a safer atmosphere for cycling. • Improving the attractiveness and ease of use of public spaces to support regeneration; • Improving journey time reliability on strategic inter-urban routes including the A127, A129, A130 and the A13; <p>Improving access to London Gateway port and Southend Airport.</p>
<p>Conclusions on potential effects of relevance to Habitats sites within scope of HRA of Essex Local Transport Plan</p> <p>The protective approach specified by Policy 9 of the LTP3, the provision of policies which promote a modal shift away from private car use (Policies 4, 7, 8, 14 and 15), and the flexibility inherent in the Essex LTP3 which allows for manipulation of future plans and projects to avoid impacts on N2K sites, means that the ecological integrity of all Natura 2000 sites located within the zone of influence of the Essex LTP3 would not be adversely affected by the LTP3 or its policies.</p>	

Appendix E

Review of Main Modifications

Mod. Number	Policy / Para	Modifications: Bold new text Strikethrough deleted text	Reason	Implications for HRA findings previously reported
MM1	Whole plan	Correct all references to 'Garden Community' to reflect Section 1 plan now provides for one Garden Community rather than three. Additionally, delete all references to Colchester Braintree Borders Garden Community.	Conformity with adopted Section 1.	No change to findings: This proposed Main Modification will not alter the findings of the HRA as it is a minor wording change that amends references from multiple Garden Communities to one Garden Community.
MM2	Whole plan	Amend all references to international sites, European sites and Natura 2000 sites to habitats sites .	To ensure consistent wording throughout the plan. The glossary of NPPF 2019 defines habitats sites.	No change to findings: This proposed Main Modification will not alter the findings of the previous HRA as it is a minor wording change that amends references to international sites, European sites and Natura 2000 sites to 'habitats sites'.
MM3	Policy SG1: Colchester's Spatial Strategy	<p>Throughout the Borough, growth will be located at the most accessible and sustainable locations in accordance with the spatial strategy for North Essex set forth in Policy SP36 in Section One and with the spatial hierarchy set out in Table SG1. The spatial hierarchy ranks areas of the Borough in order of their sustainability merits and the size, function and services provided in each area. The centres hierarchy is set out in policy SG3.</p> <p>Development will be focused on highly accessible locations to reduce the need to travel. Development will be supported where a real travel choice is provided and sustainable travel for different purposes is promoted throughout the day.</p> <p>This spatial hierarchy focuses growth on the urban area of Colchester, reflecting its position as the main location for jobs,</p>	<p>Correct policy reference to Section 1 Plan;</p> <p>In response to Mersea Homes representation. 'The word 'highly' is not necessary given the relative accessibility of locations within the various tiers of the Spatial Strategy.';</p> <p>Correct Garden Community reference; and</p>	<p>No change to findings: likely significant effects from this policy were screened out during the previous HRA as the policy does not propose any development.</p> <p>The proposed Main Modification does not alter this screening decision.</p>

Mod. Number	Policy / Para	Modifications: Bold new text Strikethrough deleted text	Reason	Implications for HRA findings previously reported
		<p>housing, services and transport. Within this urban area, the Central Area of Colchester including the Town Centre is the most sustainable location for new development given that it can accommodate higher densities reliant on its good access to public transport and concentrated mix of uses which minimise the need to travel. The surrounding built up, North, South, East and West (including Stanway) urban areas of Colchester provide the next sub-level of well connected, sustainable locations for growth. The next tier of preferred growth includes a Garden Communities straddling the boundaries with Tendring District Council adjacent authorities and providing a new greenfield sites in sustainable communities which will grow gradually, over time, extending beyond the plan period. The second tier also includes existing Sustainable Settlements within the Borough most of which are planned for appropriate growth.</p> <p>In the remaining Other Villages and Countryside of Colchester, new development in the open countryside will only be permitted in exceptional circumstances to preserve be required to respect the character and appearance of landscapes and the built environment and preserve or enhance the historic environment and biodiversity to safeguard the rural character of the Borough.</p>	Update to reflect the approach to rural development.	
MM4	Policy SG2: Housing Delivery	<p>Update policy as follows:</p> <p>The overall distribution of new housing, as shown in Table SG2, is guided by the settlement hierarchy set out in the Spatial Strategy</p>	Addresses deletion of Colchester Braintree Borders Garden Community	No change to findings: The proposed Main Modification has revised the policy and its supporting table to update the housing provision for the Colchester

Mod. Number	Policy / Para	Modifications: Bold new text Strikethrough deleted text	Reason	Implications for HRA findings previously reported
		<p>and Policy SG1. New housing development will be focused on the following key areas:</p> <ul style="list-style-type: none"> ■ Colchester urban area (Place policies for Central, North, South, East and West Colchester) ■ Tendring/Colchester Borders Garden Community (Section 1 Policy SP98) ■ Colchester/Braintree Borders Garden Community (Section 4 Policy SP9) <p>Detailed decisions on the location, type and level of development to be carried out in the Garden Communities will be made through a joint plans to be agreed with Tendring District Council the relevant local planning authority, either Braintree (west) or Tendring (east), as outlined in Section 1 of this plan.</p>		<p>Urban Area, Stanway, Tiptree, the sustainable settlements, and 'other areas', including the removal of the housing provision proposed at Colchester/Braintree Borders Garden Community, 19,699 dwellings will be delivered, exceeding the supply requirement of 18,400 dwellings (920 dwellings per annum). The removal of Colchester/Braintree Borders Garden Community was already considered in the HRA for the Section 2 Local Plan prior to the Main Modifications</p> <p>The number of units for several allocations has been updated in line with these modifications.</p>
MM5	Table: Colchester's Housing Provision	<p>Add Table Number SG2</p> <p>Amend Table SG2 as follows– see Appendix 1</p> <p>Amend Tendring Colchester Borders housing figure from 1,250 to 1,100 to 1,250 to reflect the range in the approved Section 1. Delete 1,350 homes for Colchester/Braintree Borders Garden Community.</p> <p>Add 100 units to Stanway New Allocations total to reflect modification to WC2 increasing Lakelands West from 150 to 250.</p>	<p>Correct formatting error</p> <p>Addresses modification of Tendring Colchester Borders figure and deletion of Colchester Braintree Borders Garden Community</p> <p>Reflect Statements of Common Ground with O&H on Lakelands West and Tollgate Partnership on Layer de la Haye</p>	<p>However, these modifications do not alter the overall conclusions of the HRA.</p>

Mod. Number	Policy / Para	Modifications: Bold new text Strikethrough deleted text	Reason	Implications for HRA findings previously reported
		<p>Remove 200 units from Stanway New Allocations following modification to remove former Sainsburys Site following granting of planning permission.</p> <p>Update Colchester Urban Area New Allocations to be consistent with other main modifications relating to Vineyard Gate, ABRO Site and Place Farm.</p> <p>Include Extra Care Housing figure noted separately in the table within the Colchester Urban Area New Allocations</p> <p>Tiptree shown as 326 existing commitments and 400 allocations required</p> <p>Layer de la Haye new allocations figure updated to reflect additional allowance for affordable housing as outlined in Statement of Common Ground with Tollgate Partnership</p> <p>Existing commitments figures updated to reflect latest available data regarding planning permissions following completion of 2020/21 monitoring period which has a consequential change for some of the new allocations numbers (amended to avoid double counting)</p> <p>Add note to the Table:</p> <p>Note SP3 in Section One refers to the housing supply period of 2013-2033 therefore refers to a higher supply total of 18,400. There have been 7,804 new dwellings completed since</p>	<p>Provides a factual update to include the most up to date housing figures upon adoption (Main)</p> <p>Additional note to the table provides consistency with 2013-33 time period of the plan agreed through adoption of the Section One plan and agreed in Statement of Common Ground with Essex County Council</p>	

Mod. Number	Policy / Para	Modifications: Bold new text Strikethrough deleted text	Reason	Implications for HRA findings previously reported
		2013/14 which when added to the supply of 12,214 11,895 results in a total of 20,045 19,699 units. 4,075 dwellings have been completed since the Local Plan was submitted in 2017.		
MM6	Policy SG3: Economic Growth Provision	The Local Planning Authority will encourage economic development and have allocated 39.7 32 hectares of land to plan for the delivery of B-use class employment land (principally Class B2, B8 uses, supporting Class E uses and any associated employment generating sui generis uses) in Colchester Borough up to 2033. An additional 4.5 3.5 hectares of employment land is expected to come forward in Colchester within the Tendring Colchester Borders Garden Communities with a further 25 hectares to be allocated in the overall Garden Community for development post-2033.	Update to reflect revised employment land allocations; Changes to use class terminology Correct Garden Community reference.	No change to findings: The proposed Main Modification has revised the policy and its supporting table to update the employment land provision for the Strategic Economic Areas, Local Economic Areas, and Tendring/Colchester Borders Garden Community, including the removal of employment land proposed at Colchester/Braintree Borders Garden Community.
MM7	Table SG3: Colchester Employment Land Supply 2017-2033	See Appendix 2 which updates the figures the change reflect: <ul style="list-style-type: none"> - Reductions of Stanway allocations - Deletion of Colchester Braintree Borders Garden Community - Reinstatement of employment land at Marks Tey 	Figures updated for accuracy to reflect latest planning permissions and Statement of Common Ground with O&H.	Overall, there has been a reduction in the amount of employment land to be delivered over the plan period since the Publication Draft Section 2 Local Plan. Changes in terminology in relation to Use Classes will not affect HRA conclusions. The area of allocated employment land will be updated in line with these modifications. However, these modifications do not alter the overall conclusions of the HRA.

Mod. Number	Policy / Para	Modifications: Bold new text Strikethrough deleted text	Reason	Implications for HRA findings previously reported
MM8	SG4: Local Economic Areas	<p>The Local Economic Areas as defined on the policies maps and listed in policy tables SG3 and SG4, will be safeguarded primarily for B class uses and office use within E class where appropriate to provide, protect and enhance employment provision in a range of locations across the borough to enable balanced job and housing growth. Planning permission will be granted for the redevelopment or change of use for non-Class B uses where:</p> <p>i) it can be demonstrated that there is no reasonable prospect of the site concerned being used for Class B purposes; and</p> <p>ii) The supply, availability and variety of B use class employment land is sufficient to meet Borough and local needs; and</p>	Update in light of changes to Use Classes terminology	No change to findings: This proposed Main Modification will not alter the findings of the HRA as it is a minor addition to include reference to office use within class E (previously use class B).
MM9	Paras 12.49 and 12.50	<p>12.49 Tollgate competes with Colchester Town Centre for comparison goods expenditure. This is likely to be further exacerbated intensified by two as work has commenced to implement a schemes for additional development of town centre uses allowed on appeal. Another proposal for a large retail led expansion is currently the subject of an appeal. Accordingly it is important that planning policy for Tollgate District Centre ensures that it enables it to fulfil it plays a subsidiary position to the Town Centre in the centre hierarchy as set out in Policy SG5 and Table SG5a. Its role and function as a district centre would be enhanced through the introduction of new services and/or community facilities. as opposed to further new retail development.</p>	Modify explanatory text related to the deletion of text in SG6 requiring impact assessments at Tollgate District Centre.	No change to findings: The modification to the explanatory text for Policy SG5: Centre Hierarchy to clarify that Tollgate District Centre plays a subsidiary role to the Town Centre and the removal of the requirement for a Retail Impact Assessment specifically for proposals within the Tollgate District Centre. The proposed Main Modification does not alter the conclusions of the HRA.

Mod. Number	Policy / Para	Modifications: Bold new text Strikethrough deleted text	Reason	Implications for HRA findings previously reported
		<p>12.50 To help protect the Centre Hierarchy with Colchester Town Centre at the apex and to manage the potential impacts of any further retail and leisure growth at Tollgate on the Town Centre, the local impact thresholds set out in the 'Impact Assessments Thresholds' table below and the requirement for a Retail Impact Assessment will also apply to proposals within the Tollgate District Centre (including changing of use or variation of conditions). This will need to demonstrate that there will not be any significant adverse impacts on the Town Centre (and /or any other defined centre) as a result of proposals within the Tollgate District Centre.</p>		
MM10	Policy SG6: Town Centre Uses	<p>Proposals for town centre uses that are not within a defined centre and are not in accordance with the Local this Plan, including proposals for a change or intensification of use, or variation of a planning condition, will need to demonstrate that a sequential approach has been undertaken to site selection as required by national policy.</p> <p>Applicants should demonstrate flexibility on issues such as format and scale. Sites should be assessed in terms of their availability, suitability and viability for the broad scale and type of development proposed; and only when alternative sites have been discounted should less sequentially preferable sites be considered. Only when in-centre sites are not suitable and/or available should edge and then out of centre sites be considered.</p> <p>In cases where the Local Planning Authority are satisfied that the sequential test has been met, proposals will be supported where</p>	<p>Clarify reference to Local Plan</p> <p>Cross reference to national policy</p> <p>Paragraph re-worded for clarity and to ensure consistency with terms in the NPPF 2012.</p> <p>Clarify that criteria i and ii relate specifically to proposals in and on the edge of the Town and District Centres</p> <p>Clarify that the centres referred to in criteria iv and v are 'defined' centres</p>	<p>No change to findings: likely significant effects from this policy were screened out during the previous HRA as the policy does not propose any development.</p> <p>The proposed Main Modification does not alter this screening decision.</p>

Mod. Number	Policy / Para	Modifications: Bold new text Strikethrough deleted text	Reason	Implications for HRA findings previously reported
		<p>they also comply with the requirements set out in criteria (i- vi below).</p> <p>i) The pProposals for main town centre uses in or on the edge of centres are of a type, proportion and scale appropriate to the role and function of the centre and would not threaten the primacy of Colchester Town Centre at the apex of the centre hierarchy, either individually or cumulatively with other committed proposals, and;</p> <p>ii) The pProposals for main town centre uses in or on the edge of centres are suitable to the town / district centre function and maintains or adds to its viability and vitality and enhances the diversity of the centre without changing the position of the centre within the overall hierarchy and;</p> <p>iii) Proposals would not give rise to a detrimental effect, individually or cumulatively, on the character or amenity of the area through smell, litter, noise or traffic problems and</p> <p>iv) The proposal would not have a significant adverse impact on the vitality and viability of Colchester Town Centre and/or any other defined centre either individually or cumulatively with other committed proposals and;</p> <p>v) The proposal would not have a significant adverse impact on committed and / planned public or private investment in Colchester Town Centre and /or any other defined centre</p>	<p>Impact thresholds modified to provide greater flexibility in accordance with national policy</p> <p>Deletion of distinctive treatment of Tollgate Centre which is not in accordance with national policy on centres</p>	

Mod. Number	Policy / Para	Modifications: Bold new text Strikethrough deleted text	Reason	Implications for HRA findings previously reported
		<p>either individually or cumulatively with other committed proposals and;</p> <p>vi) In relation to criteria (iv) and (v) above an Impact Assessment must be provided where the proposal;</p> <p>a. In any centre orExceeds the thresholds set out in table SG6 below,;</p> <p>Where the proposal is within Tollgate District Centre and exceeds the thresholds set out in table SG6 below or.</p>		
MM11	Table SG6: Impact Assessment Thresholds	Impact Assessments Thresholds – see Appendix 3	Updated to increase clarity	
MM12	Policy SG7: Infrastructure Delivery and Impact Mitigation	<p>Add the following after the paragraph that begins “Developers will be expected to contribute towards the delivery of relevant infrastructure.”:</p> <p>Measures required to mitigate the impacts of recreational disturbance on habitats sites will be delivered as detailed in the adopted Essex Coast Recreational disturbance Avoidance and Mitigation Strategy.</p>	Update to reflect the adopted Essex Coast RAMS & Statement of Common Ground with Natural England (SCG1).	No change to findings: The proposed Main Modification reinforces the adopted Essex Coast Recreational disturbance Avoidance and Mitigation Strategy which was already considered in the HRA.

Mod. Number	Policy / Para	Modifications: Bold new text Strikethrough deleted text	Reason	Implications for HRA findings previously reported
MM13	Policy SG8: Neighbourhood Plans	<p>Revise wording of Policy:</p> <p>Neighbourhood Plans are being prepared for Eight Ash Green, Marks Tey, Stanway, Tiptree, West Bergholt, Wivenhoe and West Mersea.</p> <p>Once a Neighbourhood Plan is made, this becomes part of the Development Plan. In cases where a Neighbourhood Plan fails at any time prior to being made, responsibility for all planning matters within that plan area will revert back to the Local Planning Authority.</p> <p>Neighbourhood Plans have been made for Boxted, and Myland and Braiswick, Wivenhoe, West Bergholt and Eight Ash Green and these now form part of the Development Plan for Colchester.</p> <p>Neighbourhood Plans are required to be compliant with the following Strategic Policies in this Plan: Section 1 Policies SP1-9 and Section 2 Policies SG1-8, ENV1-5, CC1 and PP1.</p>	<p>Corrections for clarity and to ensure Policy remains up to date for life of plan.</p>	<p>No change to findings: likely significant effects from this policy were screened out during the previous HRA as the policy does not propose any development.</p> <p>The proposed Main Modification refers to the Council's position in relation to Neighbourhood Planning which does not alter this screening decision.</p>
MM14	Para 13.3	<p>Plans or projects, not assessed through the Local Plan, but which after screening, may have a likely significant effect on a European site will require appropriate assessment under Regulation 61 of the Conservation of Habitats and Species Regulations 2010 (as amended) ('the Habitats Regulations'). Accordingly,</p> <p>Where a proposal is likely to have a significant effect on a habitats site (alone or in-combination) the local planning authority will make an appropriate assessment of the</p>	<p>Clarification of terminology</p>	<p>No change to findings: The proposed Main Modification reinforces the adopted Essex Coast Recreational disturbance Avoidance and Mitigation Strategy which was already considered in the HRA.</p>

Mod. Number	Policy / Para	Modifications: Bold new text Strikethrough deleted text	Reason	Implications for HRA findings previously reported
		<p>implications of the proposal for the habitats site(s) in view of the site(s) conservation objectives. Applicants will be expected to provide information for the purposes of the Habitat Regulations Assessment. The Local Planning Authority will only grant planning consent plans or projects where it can be ascertained that the proposal will not adversely affect that they will have no adverse effects on the integrity of a habitats European site, unless the exceptional requirements of Regulations 62 and 66 of the Habitats Regulations relating to the absence of alternative solutions, imperative reasons of overriding public interest and provision of compensation have been met.</p>		
MM15	Para 13.5	<p>Insert following paragraph to replace paragraph 13.5:</p> <p>The Essex Coast Recreational disturbance Avoidance and Mitigation Strategy (RAMS) Strategy Document was adopted in 2019 and SPD was adopted in 2020. The Essex Coast RAMS, which has the brand name Bird Aware Essex Coast, aims to deliver the mitigation necessary to avoid adverse effects on the integrity of habitats sites from the in-combination impacts of residential development in Essex. The Essex Coast RAMS identifies a detailed programme of strategic avoidance and mitigation measures which are to be funded by developer contributions from all qualifying residential development within the Zones of Influence as defined in the adopted RAMS.</p>	To update the plan on progress with the Essex Coast RAMS and as agreed with Natural England (SCG1).	No change to findings: The proposed Main Modification reinforces the adopted Essex Coast Recreational disturbance Avoidance and Mitigation Strategy which was already considered in the HRA.

Mod. Number	Policy / Para	Modifications: Bold new text Strikethrough deleted text	Reason	Implications for HRA findings previously reported
MM16	Para 13.7	<p>All development proposals should initially be assessed to establish the likely presence or absence of Protected Species or Species /Habitats of Principal Importance on the development site. This may be through a Phase 1 Habitat Assessment combined with site visits. Where there is a confirmed presence, or reasonable likelihood, of a legally protected species or Species of Principal Importance, on an application site (or where present on adjacent land) and where the species is likely to be affected then detailed ecological surveys should be carried out at the appropriate time of year in accordance with current best practice. Applicants will be required to follow the mitigation hierarchy and demonstrate that adverse impacts upon the species have been avoided. Where impacts cannot be avoided a detailed Ecological Enhancement and Mitigation Plan should be prepared and submitted and agreed with the Local Planning Authority. Where ecological assessments are required, a biosecurity protocol method statement should be included to ensure the introduction of invasive non-native species is prevented. Where district licensing schemes exist, applicants can fulfil their legal obligations regarding protected species by participating in the district licensing scheme. Mitigation must provide net gains for biodiversity and conform to the requirements of relevant legislation and Government Standing Advice.</p>	<p>To provide further clarity, as shown in the SoCG with Environment Agency (SCG2).</p>	
MM17	Para 13.8	<p>Where Priority Habitats are likely to be adversely impacted by a proposal, the developer must demonstrate that adverse impacts will be avoided and impacts that cannot be avoided are mitigated on-site and supplemented with measurable net gains for biodiversity. Where residual impacts remain, off-site compensation and enhancement may be required so that there is a measurable</p>	<p>Update on biodiversity net gain. Modification agreed with Environment Agency (SCG2).</p>	<p>No change to findings: This proposed Main Modification strengthens the conclusions of the HRA as it clarifies that biodiversity net gain requirement must not undermine protections of protected sites.</p>

Mod. Number	Policy / Para	Modifications: Bold new text Strikethrough deleted text	Reason	Implications for HRA findings previously reported
		<p>net gain and no net loss in quantity and quality of Priority Habitat in the Borough.</p> <p>All development proposals must comply with current requirements and best practice for measurable biodiversity net gain and Nature Recovery Strategies and Networks. As a minimum, 10% biodiversity net gain is required or as otherwise indicated in policy and legislation. This is in addition to the requirement to follow the mitigation hierarchy. Biodiversity net gain requirements must not undermine the existing range of protections, in planning policy and legislation, for irreplaceable habitats and protected sites. As part of the planning process a calculation in line with the latest Natural England Biodiversity Metric should be submitted and strict adherence to the mitigation hierarchy should be used to ensure harm is avoided in the first instance, that provision for a minimum 10% measurable net gain in biodiversity is made onsite wherever possible and that offsite compensation with a long term management plan is used as a last resort. All projects should have regard to reducing the impacts of climate change and delivering multiple benefits in terms of but not exclusive to habitats, carbon storage and Natural Flood Management.</p>		
MM18	Para 13.9	13.9 Protected Hedgerows must be assessed by the Local Planning Authority's Landscape Officer against criteria in the Hedgerow Regulations 1997. Where a hedgerow is deemed to be 'Important' under the Hedgerow Regulations, the developer must demonstrate that adverse impacts upon the important hedgerow will be avoided. This is necessary as the loss of both 'Important' and other significant hedgerows protected important hedgerows	Statement of Common Ground with Environment Agency (SCG2).	No change to findings: This proposed Main Modification strengthens the protection of waterbodies. Better protected waterbodies are likely to benefit qualifying species of Habitats Sites. Therefore, the proposed Main

Mod. Number	Policy / Para	Modifications: Bold new text Strikethrough deleted text	Reason	Implications for HRA findings previously reported
		<p>is difficult to mitigate against as they cannot easily be recreated as either a landscape or ecological feature.</p> <p>Add the following as a new paragraph to follow paragraph 13.9:</p> <p>The European Water Framework Directive imposes legal requirements to improve the water environment. All waterbodies must achieve 'good ecological status' by 2027, prevent deterioration of surface water and groundwater and seek enhancements where rivers, lakes and estuaries are not achieving good ecological status or potential. The local planning authority supports the directive and proposals which seek to further these aims where it is possible to do so. In pursuit of this aim, proposals should seek to minimise disturbance to riverbeds. Proposals are encouraged to be in compliance with the Anglian River Basin Management Plan (2015) or its successor, which addresses pressures on the water environment and whose environmental objectives are legally binding on all public bodies whose decisions affect the quality of the water environment.</p>		Modification reinforces the conclusions of the HRA.
MM19	Para 13.13	<p>Policy ENV1 aims to control development outside of settlements to protect open stretches of countryside around and between existing settlements, to protect landscape character, to prevent coalescence and retain settlement identity. Any development in the countryside, i.e. land outside of settlement boundaries, must be compatible with local landscape character and setting. Development will be supported provided it does not adversely impact on the intrinsic character and beauty of the countryside, the relationship between and the separate</p>	To provide further clarity.	No change to findings: This proposed Main Modification will not alter the findings of the HRA as it provides clarity on landscape issues only.

Mod. Number	Policy / Para	Modifications: Bold new text Strikethrough deleted text	Reason	Implications for HRA findings previously reported
		<p>identities of settlements, visual amenity, or the factors that contribute to valued landscapes, whilst also complying with other relevant policies of the Local Plan. Proposals are required to have regard to Colchester's Landscape Character Assessment and the Council's adopted Landscape Guidance for Developers alongside any other relevant or updated evidence, in order to identify and evaluate the effect of a proposed development on the character, value and sensitivity to change of a proposed site and its setting to help conserve the borough's landscape character.</p>		
MM20	Policy ENV1: Environment	<p>The Local Planning Authority will conserve and enhance Colchester's natural and historic environment, countryside and coastline. The Local Planning Authority will safeguard the Borough's biodiversity, geology, history and archaeology, which help define the landscape character of the Borough, through the protection and enhancement of sites of international, national, regional and local importance. The Local Planning Authority will require development to be in compliance with, and contribute positively towards, delivering the aims and objectives of the Anglian River Basin Management Plan.</p> <p>A. Designated sites</p> <p>In particular, development proposals that have an adverse effects impact Development proposals that have an adverse effects impact on the integrity of European habitats European habitats sites, Sites of Special Scientific Interest or significant adverse impacts on the special qualities of the Dedham Vale Area of Outstanding Natural Beauty (including its setting) (either alone or in-combination) will not be</p>	<p>Update to the policy to address representation from the Environment Agency, see SCG2</p> <p>Clarification of text to introduce alphabetic ordering of criteria</p> <p>Update to the policy to address representations to ENV1 (including representations from Natural England and the Environment Agency – see SCG1 & SCG2</p>	<p>No change to findings: The proposed Main Modification reinforces the adopted Essex Coast Recreational disturbance Avoidance and Mitigation Strategy which was already considered in the HRA.</p>

		<p>supported. Development proposals within designated areas or within the Coastal Protection Belt will need to comply with policies ENV2 and ENV4.</p> <p>B. Essex Coast RAMS</p> <p>A Recreational disturbance Avoidance and Mitigation Strategy has been completed in compliance with the Habitats Directive and Habitats Regulations. Further to Section 1 Policy SP2, contributions will be secured from qualifying residential development, within the Zones of Influence as defined in the adopted RAMS, towards mitigation measures identified in the Essex Coast Recreational disturbance Avoidance and Mitigation Strategy (RAMS).</p> <p>C. Biodiversity and geodiversity</p> <p>Development proposals where the principal objective is to conserve or enhance biodiversity and geodiversity interests will be supported in principle.</p> <p>For all proposals, development will only be supported where it:</p> <p>(i) Is supported with appropriate ecological surveys where necessary; and</p> <p>(ii) Where there is reason to suspect the presence of a protected species (and impact to), or Species/Habitats of Principal Importance, applications should be accompanied by an</p>	<p>Update it in terms of the Essex Coast RAMS.</p> <p>Clarify biodiversity and ecology requirements to reflect relevant guidance.</p> <p>Add wording on irreplaceable habitats.</p> <p>Provide further clarification on the planning balance to be struck on countryside development proposals.</p>	

Mod. Number	Policy / Para	Modifications: Bold new text Strikethrough deleted text	Reason	Implications for HRA findings previously reported
		<p>ecological survey assessing their presence and, if present, the proposal must be sensitive to, and make provision for their needs and demonstrate the mitigation hierarchy has been followed; and</p> <p>(iii) Will conserve or enhance the biodiversity value of greenfield and brownfield sites and minimise fragmentation of habitats; and</p> <p>(iv) Maximises opportunities for the preservation, restoration, enhancement and connection of natural habitats in accordance with the UK and Essex Biodiversity Action Plans or future replacements; and</p> <p>(v) Incorporates beneficial biodiversity conservation features, measurable biodiversity net gain of at least 10% in line with the principles outlined in the Natural England Biodiversity Metric, and habitat creation, where appropriate.</p> <p>Plans or projects, which may have a likely significant effect on a European site which have not been screened or considered in the Borough's Habitat Regulations Assessment or Appropriate Assessment, will be required to prepare a separate HRA screening and if necessary to complete a separate appropriate assessment to ensure compliance with the Habitat Regulations 2010.</p> <p>Proposals for development that would cause significant direct or indirect adverse harm to nationally designated sites or other designated areas, protected species, Habitats and Species of Principle Importance or result in the loss of irreplaceable habitats,</p>		

Mod. Number	Policy / Para	Modifications: Bold new text Strikethrough deleted text	Reason	Implications for HRA findings previously reported
		<p>such as ancient woodland, Important Hedgerows and veteran trees, will not be permitted unless:</p> <p>(i) They cannot be located on alternative sites that would cause less harm; and</p> <p>(ii) The benefits of the development clearly outweigh the impacts on the features of the site and the wider network of natural habitats; and</p> <p>(iii) Satisfactory biodiversity net gain, mitigation, or as a last resort, and compensation measures, are provided.</p> <p>The Local Planning Authority will take a precautionary approach where insufficient information is provided about avoidance, mitigation and compensation measures and secure mitigation and compensation through planning conditions/obligations where necessary.</p> <p>D. Irreplaceable habitats</p> <p>Proposals that would result in the loss of irreplaceable habitats, such as ancient woodland, Important Hedgerows and veteran trees will not be permitted unless there are wholly exceptional reasons and a suitable compensation strategy, to the satisfaction of the local planning authority, exists.</p> <p>E. Countryside</p>		

Mod. Number	Policy / Para	Modifications: Bold new text Strikethrough deleted text	Reason	Implications for HRA findings previously reported
		<p>The local planning authority will carefully balance the requirement for new development within the countryside to meet identified development needs in accordance with Colchester's spatial strategy, and to support the vitality of rural communities, whilst ensuring that development does not have an adverse impact on the different roles, the relationship between and separate identities of settlements, valued landscapes, the intrinsic character and beauty of the countryside and visual amenity.</p> <p>The intrinsic character and beauty of the countryside will be recognised and assessed, and development will only be permitted where it would not adversely affect the intrinsic character and beauty of the countryside and complies with other relevant policies. Within valued landscapes, development will only be permitted where it would not impact upon and would protect and enhance the factors that contribute to valued landscapes.</p>		
MM21	Policy ENV2: Coastal Areas	Include ' and seascape ' in criterion (iii), after the word landscape (page 99).	Natural England Representation and SCG1.	<p>No change to findings: likely significant effects from this policy were screened out during the previous HRA as the policy does not propose any development.</p> <p>The Main Modification does not alter this screening decision.</p>

Mod. Number	Policy / Para	Modifications: Bold new text Strikethrough deleted text	Reason	Implications for HRA findings previously reported
MM22	Policy ENV3: Green Infrastructure	Add new paragraph to policy ENV3: Green infrastructure that contributes to the protection and enhancement of water bodies will be supported, including de-culverting, creation and management of ecological buffer strips and new wetland areas to help manage flood risk and reduce diffuse pollution.	Environment Agency representation and SCG2.	No change to findings: likely significant effects from this policy were screened out during the previous HRA as the policy does not propose any development. The Main Modification do not alter this screening decision.
MM23	Policy ENV5: Pollution and Contaminated Land	...Permission will only be granted where the Council is satisfied that after selection of appropriate mitigation the development, alone and cumulatively , will not have an unacceptable significant impact on air quality, health and well - being....	Further clarification.	No change to findings: likely significant effects from this policy were screened out during the previous HRA as the policy does not propose any development. The Main Modification does not alter this screening decision.
MM24	Para 13.49 and additional footnote	Insert the following after the first sentence: “Where possible, connections should be made to the Colchester Orbital.” Add the following to the end of the paragraph: “The benefits for the natural and local environment and climate change of tree canopy cover are widely recognised. A study (The Canopy Cover of England’s Towns and Cities:	Update to reflect Council’s work on the Climate Emergency and the Colchester Orbital. Further explanation provided following consideration at the EiP and issues raised at the Hearing	No change to findings: the proposed Main Modification does not introduce any development. Therefore, the Main Modification does not impact the HRA findings.

Mod. Number	Policy / Para	Modifications: Bold new text Strikethrough deleted text	Reason	Implications for HRA findings previously reported
		<p>baselining and setting targets to improve human health and well-being) carried out in 2017, concluded the following;</p> <ul style="list-style-type: none"> • an average TCC of 20% should be set as the minimum standard for most UK towns and cities, with a lower target of 15% for coastal towns; • towns and cities with at least 20% cover should set targets to increase cover by at least 5% (i.e. above the $\pm 2\%$ tolerance of i-Tree Canopy) within ten to 20 years (depending on what is achievable against their baseline); and, • targets and strategies for increasing tree cover should be set according to the species, size and age composition of the existing urban forest, based upon a ward/district level and land-use assessment. <p>The tree canopy coverage for Colchester Borough is currently 18% varying between wards / locations there are some areas with larger and better canopy cover and others with significantly less. As per the recommendation above, the long term aim should be to increase the canopy cover of the borough to 20% and then 25%. It is recognised that this is an aspirational target, but that new development should seek to contribute to increase tree canopy cover where appropriate. It is considered that 10% as a target on development sites where appropriate would help to mitigate the likely losses of trees over the plan period whilst steadily increasing the overall canopy cover of the borough.</p>		

Mod. Number	Policy / Para	Modifications: Bold new text Strikethrough deleted text	Reason	Implications for HRA findings previously reported
		<p>A Canopy Cover Assessment will be required for all major applications¹. Development proposals should seek where appropriate to increase the level of canopy cover on site by a minimum of 10%. In circumstances, where this is not possible or desirable, compensatory provision should be identified and secured through a legal obligation. This will increase the overall canopy cover of the borough, enable sites to mitigate and adapt to climate change and deliver biodiversity net gain.”</p> <p>¹ Major applications are defined as per Article 2 of the Town and Country Planning (Development Management) Procedure (England) Order 2015 as: Development involving any one or more of the following—</p> <p>(a) the winning and working of minerals or the use of land for mineral-working deposits;</p> <p>(b) waste development;</p> <p>(c) the provision of dwellinghouses where—</p> <p>(i) the number of dwellinghouses to be provided is 10 or more; or</p> <p>(ii) the development is to be carried out on a site having an area of 0.5 hectares or more and it is not known whether the development falls within sub-paragraph;</p>

		<p>Scheduled Ancient Monument (M) extends over the 0.46 hectare southern part of the site and is allocated for open space. A development brief been prepared for the site and was subject to public consultation 2020/21. The requirements and quantum of development on the site will be set out in the final Development Brief.</p>		<p>However, these modifications do not alter the overall conclusions of the HRA.</p>
MM34	Policy SC1: South Colchester Allocations	<p>Add additional text in policy before 'The following Local Economic':</p> <p>ABRO site</p> <p>The 4.26 hectare will provide 3.80 hectares for residential development and 0.46 hectares for open space. Development of this site will be supported where it accords with the ABRO Development Brief.</p> <p>Any proposals will also take into account the Essex Minerals Local Plan and the developer will be required to submit a Minerals Resource Assessment as part of any planning application. Should the viability of extraction be proven, the mineral shall be worked in accordance with a scheme/masterplan as part of the phased delivery of the non-mineral development.</p>	<p>Omission from carry forward from Adopted Local Plan (Garrison Masterplan)</p> <p>To provide a requirement for a Minerals Resource Assessment for both SC1 allocations which has previously not been included in error.</p>	<p>No changes to findings: The proposed Main Modifications have revised the policy text and explanatory text to include reference to a new residential development site.</p> <p>The ABRO site has now been added to the updated HRA in line with these modifications.</p> <p>However, these modifications do not alter the overall conclusions of the HRA.</p>

Mod. Number	Policy / Para	Modifications: Bold new text Strikethrough deleted text	Reason	Implications for HRA findings previously reported
MM35	Para 14.54	<p>The Defence Infrastructure Organisation is disposing of a number of sites nationally including Middlewick Ranges. The site was originally proposed for the allocation of 2000 dwellings, however as there are a number of constraints at the site which will restrict the final number of dwellings that can be delivered at this location, the allocation is for up to 1000 dwellings. Given the potential constraints and opportunities associated with the site, there will be a requirement for a masterplanning approach working together with the MOD, and any future landowners to inform the best opportunities for delivering housing and supporting infrastructure, as well as ensuring the delivery of a development appropriate to its setting. More guidance in respect of the approach, scope and requirements for masterplanning for this site are set out in paragraph 14.62 below.</p>	<p>Updating required on background and additional guidance</p>	<p>No changes to findings:</p> <p>The proposed Main Modification mandates the need for wintering bird surveys and mitigation, if required, for SPA birds.</p> <p>It also strengthens the requirement to deliver a new open space and strategic green infrastructure to minimise subsequent footfall on the Essex coastal sites.</p> <p>The proposed Main Modifications do not alter the overall conclusions of the HRA.</p>
MM36	Para 14.55	<p>Vehicular access to the site, the impact of any development on the local road network and necessary mitigation, will need to be determined prior to any detailed scheme being submitted. The development would need to be supported by a Transport Assessment that stresses the importance of sustainable transport as the primary means of access and movement to, from and within the site. The Transport Assessment should set out that where impacts would occur and the necessary mitigation to address those impacts; any mitigation which would need to be agreed with CBC and ECC and secured as part of the planning permission. As a minimum, the Transport Assessment would need to include details regarding:</p>	<p>Clarification of transport assessment and mitigation measures reflecting Statement of Common Ground between CBC, ECC and DIO</p> <p>Clarification of link between transport issues and housing numbers for site</p>	

Mod. Number	Policy / Para	Modifications: Bold new text Strikethrough deleted text	Reason	Implications for HRA findings previously reported
		<ul style="list-style-type: none"> - Support for local bus services to traverse the site and provide frequent and regular connections to the town centre, railway stations and any other identified and agreed destinations; - Provision of bus stops within the site and upgrade of existing bus stops in the vicinity of the site (specification to ECC standards); - Bus priority measures at key junctions; - Demonstration of an extensive network of footpaths and cycleways within the site and connections at the site boundaries into the external network. Improvements to the external network of footpaths and cycleways in the vicinity of the site as agreed; - Provision of a distributor road across the site with dedicated footpath and cycleways alongside it over its entire length; - Provision of new sections of footway, cycleway and uncontrolled and controlled crossings in the vicinity of the site as agreed; - Improvements to the Public Right of Way Network across and in the vicinity of the site; and - Delivery of a bespoke Travel Plan for the development of the site, with the appointment of a Travel Plan Co-ordinator and commitment to provision of tailored Residential Travel Information Packs for each household. <p>In the event that the detailed transport assessment work indicates that the traffic constraints cannot be adequately</p>		

Mod. Number	Policy / Para	Modifications: Bold new text Strikethrough deleted text	Reason	Implications for HRA findings previously reported
		addressed, the number of homes permitted will be reduced to reflect this with support for up to 1,000 once the traffic impacts can be adequately resolved.		
MM37	Para 14.56	Middlewick Ranges is a designated Local Wildlife Site (reference Co122). The site was reviewed as part of a wider Local Sites Review in 2015 and as a result of the review the area designated has been extended. The Ecological Evidence Report confirms that the habitats within the site are of high biodiversity value, including 53 Ha of acid grassland. The site supports a range of protected species such as invertebrates, breeding birds and bats. Council is aware that the site supports at least one Protected Species, therefore given the site's ecological sensitivity, full ecological assessments will need to be undertaken as part of any planning application including for all Protected Species, and Species of Principal Importance during the appropriate survey season. The Council will also be seeking a minimum 10% biodiversity net gain on the development site, following application of the mitigation hierarchy, in line with emerging legislation (Environment Bill 2020). The Council will require a developer to commit to a suitable legal mechanism to ensure the long-term establishment, management and maintenance of the mitigation / compensation land for a minimum of 30 years and a strategy for the monitoring of key mitigation and/or compensation as part of the grant of any planning permission.	Clarification of biodiversity net gain requirements	

Mod. Number	Policy / Para	Modifications: Bold new text Strikethrough deleted text	Reason	Implications for HRA findings previously reported
MM38	Para 14.57	<p>The area is a well-used recreational space, particularly with dog walkers. Any future development proposal will be expected to deliver new open space as well as strategic green infrastructure to meet the needs of existing and new residents in this part of Colchester, to minimise subsequent footfall on the Essex coastal sites and nearby Roman River SSSI, and provide substantial buffers to existing sensitive habitats. The range of typologies may include accessible natural greenspace, formal playing pitches, parks and playspace, green corridors and land for future cemetery use (including potential for a woodland cemetery), if suitable and required. The master planning process will need to inform further consideration in respect of the type, layout and configuration of open space and green infrastructure. A key requirement will be to ensure connectivity between green walking routes across the site and the existing Colchester Orbital, a circular walking and cycling route around the town's perimeter, which runs through the north-west of the Middlewick Ranges linking some of the town's key open spaces, heritage sites and PRoW. The Council will seek to retain and enhance PRoW within the development along with the route and character of the Colchester Orbital.</p>	<p>Ensure evidence base and masterplanning work adequately reflects full range of environmental considerations.</p>	
MM39	Para 14.58	<p>The site has archaeological interest due to the potential for the presence of buried archaeological remains, in particular, relating to prehistoric, Roman and civil war and World War II defences. The WW2 pill boxes, and tank line form an important landscape opportunity. The Council believes they</p>	<p>Ensure evidence base and masterplanning work adequately reflects full range of heritage assets</p>	

Mod. Number	Policy / Para	Modifications: Bold new text Strikethrough deleted text	Reason	Implications for HRA findings previously reported
		<p>also represent an important heritage interpretation and visitor opportunity. Further investigations will be required at a planning application stage, prior to the commencement of any development. Policy PP1 (vi) will apply in this respect to any planning application on this site. It is also possible that a future management plan for the redoubt may be required as part of the planning permission, which will need to be agreed with the Council.</p>		
MM40	New Para to be added	<p>In terms of local character, the site sits in an area of gently sloping open landscape bordered by Colchester to the north and the wooded Roman River to the south. It currently provides some physical and visual separation between the existing urban area and the Roman River Valley. The site has the potential to contain archaeological finds therefore it will be necessary to complete archaeological investigations. Any development will need to minimise and mitigate potential impacts on the wider landscape, on adjoining minor roads and recreational pressure on the landscape and biodiversity assets. New development should respond to the existing settlement pattern, screen any existing visual intrusions, conserve and manage existing woodland and hedgerows, and use materials appropriate to local character. An LVIA will be required to inform the proposed masterplan and any subsequent planning application. Extra High Voltage electricity pylons lie at the north of the site. There would be visual benefits to these being undergrounded but in the event</p>	Ensure evidence base and masterplanning work adequately reflects full range of landscape considerations	

Mod. Number	Policy / Para	Modifications: Bold new text Strikethrough deleted text	Reason	Implications for HRA findings previously reported
		that this is not feasible they would act as a constraint on the layout of development.		
MM41	Para 14.59	Development of Middlewick Ranges may be further constrained by pockets of contamination therefore an investigation into all potential sources of contamination will need to be carried out as part of any future development proposals and submitted as part of any planning application. Any investigation will need to include assessment of areas inaccessible during the 2018 site visit, together with any activity since the date of reporting including detail of any fly tipping, and continued MoD uses. Policy ENV5 will be relevant to any planning application in respect of this matter.	Clarification on matters in respect of requirements regarding contamination	
MM42	Para 14.60 and Para 14.62	Delete para 14.60 and renumber para 14.62 The Middlewick Ranges site falls within Critical Drainage Area 01 (Old Heath Area) as defined in Colchester's Surface Water Management Plan (SWMP). Contributions will be sought towards the costs of delivering flood defence/flood management solutions within CDA 01 as set out in the SWMP. Given the array of identified constraints, all requested surveys should be commissioned as soon as possible. This is necessary to help determine final housing numbers that can be delivered at Middlewick Ranges and to define the most suitable developable	Clarification of approach / timing to master planning and agreement with the Council	

Mod. Number	Policy / Para	Modifications: Bold new text Strikethrough deleted text	Reason	Implications for HRA findings previously reported
		areas and land uses within the Middlewick Ranges site. As well as housing and open space, other suitable uses could include a cemetery extension or green cemetery		
MM43	New Para to be added	A Masterplan must be agreed with the Local Planning Authority prior to the submission of any planning application, in order to inform the detailed definition and mix of uses within the site. The masterplan process should include engagement of the local community, use of design advice and review where available, and assessment frameworks such as Building for a Healthy Life or similar. The masterplan will be supported, as appropriate, with site wide parameter plans, design codes or design guidance.	Clarification of approach / timing to master planning and agreement with the Council	
MM44	Para 14.61	Developer contributions will be sought where required towards the cost of ecological mitigation including; the provision of compensatory habitat to replace habitat lost to development. ecological mitigation, remediation of any on site contamination as part of the development of the site; community infrastructure including education provision; traffic and highways mitigation including enhancements to the public transport, walking and cycling infrastructure; accessible natural green space and public open space.	Clarification in respect of requirements for developer contributions	
MM45	Para 14.63	Development at Middlewick Ranges will be phased to start towards the middle of the plan period. This is necessary to enable further detailed work to be carried out to inform a comprehensive	Clarification regarding phasing in relation to Bio-diversity net gain	

Mod. Number	Policy / Para	Modifications: Bold new text Strikethrough deleted text	Reason	Implications for HRA findings previously reported
		<p>masterplan process as described above and to allow for appropriate engagement with all relevant parties including the local residents. This will also allow for the commencement of soil preparation for the required biodiversity mitigation, compensation and net gain allowing for the soil conditions to respond to changes in pH. which is imperative to the practical use of turves from the ranges to create new areas of acid grassland. This will help inform or refine the later stages of the net gain strategy. The masterplan will inform any subsequent planning application. all the studies to be completed and any mitigation measures i.e. compensatory habitat to be provided prior to the start of development</p>		
MM46	New Para to be added	<p>Due to the high distinctiveness of the biodiversity of the site and the complexity of recreating and managing protected habitats for the long term, both onsite and in the mitigation lands, the Council will require the appointment, by the developer, of a suitably qualified and experienced nature conservation management organisation as a partner to take forward this element of the development. The Council will require the developer to enter into an appropriate legal agreement to secure the long term (minimum 30-year) management and monitoring of retained protected habitats, the biodiversity mitigation, compensation and net gain land, by the nature conservation organisation, including a mechanism for funding and governance that ensures both the nature conservation value and local community interest. The landowner of the mitigation land will need to be party to such an agreement.</p>	Clarification of the approach / requirements for long term management of the ecological areas / habitats and mitigation land	

Mod. Number	Policy / Para	Modifications: Bold new text Strikethrough deleted text	Reason	Implications for HRA findings previously reported
MM47	Policy SC2: Middlewick Ranges	<p>The allocation shown on the Policies Map is expected to deliver approximately up to 1000 new dwellings. The final number of dwellings will only be confirmed through masterplanning, when full details of constraints are known. In addition to the infrastructure and mitigation requirements identified in policy PP1, development will be supported on land within the area identified on the policies map where it: which provides:</p> <p>(i) Delivers up to 1000 new houses of a mix and type of housing to be compatible with surrounding development; and</p> <p>(ii) Is supported by a Transport Assessment which sets out where impacts would occur and any mitigation to address those impacts, as well as measures proposed to ensure sustainable transport is the primary means of access and movement to from and within the site. The Transport Assessment and mitigation measures are to be agreed with the Highway Authority and The Council as part of any planning permission; and</p> <p>(iii) Delivers access and highway works on the local road network, including new junctions, to be agreed with the Highway Authority and delivered at the appropriate time commensurate with the development; and</p> <p>(iv) Delivers Delivers of enhancements to sustainable travel connectivity including public transport, cycling and walking infrastructure, including connection and enhancement to the Colchester Orbital; and</p>	<p>Add ref to masterplanning for clarification and consistency</p> <p>Clarification regarding requirements for a transport assessment (CBC/ ECC and DIO SOCG)</p> <p>Consistency and clarification re sustainable connectivity</p> <p>Clarification regarding reference to the Orbital route</p> <p>Clarification regarding protection of habitats</p> <p>Clarification regarding Bio-diversity net gain requirements and mitigation</p> <p>Clarification regarding the management of the habitat creation and conservation</p> <p>Clarification of requirements for long term management of the biodiversity / mitigation land</p>	<p>No changes to findings:</p> <p>The proposed Main Modification mandates the need for wintering bird surveys and mitigation, if required, for SPA birds.</p> <p>It also strengthens the requirement to deliver a new open space and strategic green infrastructure to minimise subsequent footfall on the Essex coastal sites.</p> <p>The proposed Main Modifications do not alter the overall conclusions of the HRA.</p>

		development takes place which would affect significant numbers of SPA birds.		
MM57	Policy SS1: Abberton and Langenhoe	<p>Include the following after the criteria for Land east of Peldon Road:</p> <p>Development must conserve, and where appropriate, enhance the significance of heritage assets (including any contribution made by their settings). Designated heritage assets close to the sites include the Grade II Pete Tye Hill and Old Cottage.</p>	To ensure that the policy gives appropriate protection to the historic environment.	No change to findings: No change has been made to the site allocation in relation to ecology, and consequently the previous HRA findings also remain unchanged.
MM58	Policy SS4: Copford	<p>Include the following at the beginning of the policy:</p> <p>Development must conserve, and where appropriate, enhance the significance of heritage assets (including any contribution made by their settings). Designated heritage assets close to the two allocated sites include the Grade II Copford Place and stable, Brewers Cottage, Stanway Bridge and Brook Cottage.</p> <p>The above sentence replaces criteria (v) for West of Hall Road. A design and layout which complements the listed buildings and their setting as well as any archaeological assets.</p>	To ensure that the policy gives appropriate protection to the historic environment.	No change to findings: No change has been made to the site allocation in relation to ecology, and consequently the previous HRA findings also remain unchanged.
MM59	Policy SS5: Eight Ash Green	Replace entire policy with the following: All development proposals in Eight Ash Green parish will be determined against and be required to comply with policies in the Eight	Correction to update the plan to reflect the adoption of the Eight Ash Green Neighbourhood Plan. New policy wording is consistent with the policy wording for the	No change to findings: Policy SS5 was assessed in the previous HRA of the Section 2 Local Plan.

Mod. Number	Policy / Para	Modifications: Bold new text Strikethrough deleted text	Reason	Implications for HRA findings previously reported
		Ash Green Neighbourhood Plan and any relevant Local Plan policies.	Boxted Neighbourhood Plan and other adopted neighbourhood plans.	The entire policy has been replaced with new text but this will have no implications on the findings of the HRA.
MM60	Policy SS6: Fordham	Add criteria (iv): Conserve, and where appropriate, enhance the significance of heritage assets (including any contribution made by their settings). Designated heritage assets close to the site include the Grade II Plummers Farmhouse, Grade II Thrifts Cottage and Plummers Green Monument.	To ensure that the policy gives appropriate protection to the historic environment.	No change to findings: No change has been made to the site allocation in relation to ecology, and consequently the previous HRA findings also remain unchanged.
MM61	Policy SS7: Great Horkesley	Revise text under School Lane (ii): development will facilitate access to the old village hall and either contribute to the replacement of the scout hut or to the enhancement of community buildings other than the old village hall. Amend School Lane criterion (iv): Development will safeguard the setting of the Church of England School building as a grade 2 listed building and other heritage assets on The Causeway must conserve, and where appropriate, enhance the significance of heritage assets (including any contribution made by their settings). Designated heritage assets close to the site include the Grade II Church of England School, School House and Oak Cottage.	To clarify requirements for community facilities. To ensure that the policy gives appropriate protection to the historic environment.	No change to findings: No change has been made to the site allocation in relation to ecology, and consequently the previous HRA findings also remain unchanged.

Mod. Number	Policy / Para	Modifications: Bold new text Strikethrough deleted text	Reason	Implications for HRA findings previously reported
MM62	Policy SS8: Great Tey	<p>Amend criteria (ii) (in relation to Land on Brook Road) as follows: Suitable design and screening/landscaping to maintain and, where possible, enhance the character and setting of minimise and negative impact on the adjacent Conservation Area and listed building (Rectory Cottage).</p> <p>Amend the policy in relation to Greenfield Drive as follows:</p> <p>In addition to the infrastructure and mitigation requirements identified in policy PP1, development will be supported on land within the policy area identified on the policies map which provides:</p> <p>(i) 30 new dwellings with pedestrian and cycle access off Greenfield Drive (Harvesters' Way and/or Farmfield Road) and vehicle access from Newbarn Road; and</p> <p>(ii) A minimum of 1ha of public open space adjacent to existing public open space.</p> <p>(iii) The emerging Neighbourhood Plan is intended to shape the character of the development</p>	<p>To ensure consistency with other policies.</p> <p>To provide clarification with regards to access.</p>	<p>No change to findings: No change has been made to the site allocation in relation to ecology, and consequently the previous HRA findings also remain unchanged.</p>
MM63	Policy SS9: Langham	<p>Add the following in relation to Wick Road:</p> <p>Development must conserve, and where appropriate, enhance the significance of heritage assets (including any contribution</p>	<p>To ensure that the policy gives appropriate protection to the historic environment.</p>	<p>No change to findings: No change has been made to the site allocation in relation to ecology, and consequently the previous HRA findings also remain unchanged.</p>

Mod. Number	Policy / Para	Modifications: Bold new text Strikethrough deleted text	Reason	Implications for HRA findings previously reported
		<p>made by their settings). Designated heritage assets close to the sites include the Grade II New House.</p> <p>Amend School Road criteria (v) as follows:</p> <p>A design and layout which protects and enhances the listed building including</p> <p>suitable screening/landscaping to protect their setting. Development must conserve, and where appropriate, enhance the significance of heritage assets (including any contribution made by their settings). Designated heritage assets close to the sites include the Grade II School Farmhouse.</p>		
MM64	Policy SS10: Layer de la Haye	<p>Update criteria i as follows:</p> <p>i) At least 35 dwellings of a mix and type compatible with the surrounding development, to include bungalows and small family homes</p> <p>Include the following additions to the policy:</p> <p>Any proposals will also take into account the Essex Minerals Local Plan and the developer will be required to submit a Minerals Resource Assessment as part of any planning application. Should the viability of extraction be proven, the mineral shall be worked in accordance with a</p>	<p>Wording agreed through SoCG with Tollgate Partnership</p> <p>To provide a requirement for a Minerals Resource Assessment which has previously not been included in error.</p> <p>Recommended mitigation in the Habitat Regulations Assessment</p>	<p>No change to findings: The proposed Main Modification mandate the requirement for wintering bird surveys and mitigation (if required) for SPA birds.</p> <p>The proposed Main Modifications therefore strengthen the conclusions findings of the HRA.</p>

Mod. Number	Policy / Para	Modifications: Bold new text Strikethrough deleted text	Reason	Implications for HRA findings previously reported
		<p>scheme/masterplan as part of the phased delivery of the non-mineral development.</p> <p>Before granting planning consent, wintering bird surveys will be undertaken at the appropriate time of year to identify any offsite functional habitat. In the unlikely event that significant numbers are identified, development must firstly avoid impacts. Where this is not possible, development must be phased to deliver habitat creation and management either on or off-site to mitigate any significant impacts. Any such habitat must be provided and fully functional before any development takes place which would affect significant numbers of SPA birds.</p>		
MM65	Policy SS11: Marks Tey	<p>Growth within the Marks Tey area will largely be guided by the following documents in addition to this Local Plan:</p> <p>i) The Joint Plan Development Plan document to be prepared with Braintree District Council for development of a new Garden Community, as provided by in Section 1 Policy SP9.</p> <p>ii) The Marks Tey Neighbourhood Plan to be developed to include policies to guide the relationship between the existing community of Marks Tey and the gradual development of a Garden Community, and will provide flexibility, including the scope for the allocation of any small parcels of land for development outside with the Garden Community to be considered in the Neighbourhood Plan at the appropriate time.</p>	<p>To remove reference to the Braintree Colchester Borders Garden Community</p> <p>To clarify role of Neighbourhood Plan</p>	<p>No change to findings: This proposed Main Modification removes reference to the Colchester/Braintree Garden Community.</p> <p>The removal of Colchester/Braintree Borders Garden Community was already considered and assessed in the previous HRA of the Section 2 Local Plan and there are no changes to the HRA conclusions.</p>

Mod. Number	Policy / Para	Modifications: Bold new text Strikethrough deleted text	Reason	Implications for HRA findings previously reported
MM66	Policy SS12b: Coast Road, West Mersea	<p>Amend criteria (ii): Enhance historic heritage assets, maritime uses, the traditional maritime character of Coast Road and the landscape character of the coast.</p> <p>Amend criteria (iii) to read: Can demonstrate no likely significant effects on adjacent European sites or where impacts can be appropriately mitigated provide mitigation in accordance with the Recreation Avoidance and Mitigation Strategy (RAMS).</p> <p>Correct the typo: historical</p>	<p>Correction for consistency with the NPPF</p> <p>Update to reflect adoption of the RAMs SPD</p>	<p>No changes to findings: The Main Modification requires new development proposals on the Coast Road to ensure they do not have adverse effects on habitat sites or provide mitigation in accordance with the RAMS.</p> <p>The proposed Main Modifications therefore strengthen the conclusions findings of the HRA.</p>
MM67	Policy SS12c: Mersea Island Caravan Parks	<p>Amend opening sentence: Development proposals at caravan parks on Mersea Island, including change of use, ... on site, will only be supported where they meet all of the following criteria:</p> <p>Amend criteria (ii): Help protect the integrity of habitats European habitats sites and minimise disturbance to migratory or over-wintering birds designated breeding and wintering species using the sites; Any future extensions to caravan parks will require their own HRA and where required appropriate assessment.</p>	<p>To clarify that all criteria in the policy apply.</p> <p>Representations Natural England and RSPB and Statement of Common Ground 1.</p>	<p>No changes to findings: The Main Modification requires new development proposals at caravan parks on Mersea Island to protect the integrity of habitat sites and minimise disturbance to designated species. The policy also requires proposals for further extensions to caravan parks to be accompanied by a HRA.</p> <p>The proposed Main Modifications therefore strengthen the conclusions findings of the HRA.</p>
MM68	Policy SS13: Rowhedge	<p>Deletion of criteria (iv) – Provision of new health services to be agreed with the North Essex Care Commissioning Group</p>	<p>Clarification in the Update on Cooperation with the North East Essex Clinical Commissioning Group on the need for flexible</p>	<p>No change to findings: No change has been made to the site allocation in relation</p>

Mod. Number	Policy / Para	Modifications: Bold new text Strikethrough deleted text	Reason	Implications for HRA findings previously reported
			approaches to the provision of health care which may not involve land take on the allocated site.	to ecology, and consequently the previous HRA findings also remain unchanged.
MM69	New Para 14.219 & Para 14.221	<p>Infrastructure necessary to deliver the growth up to 2033 will need to address cross boundary issues with neighbouring Local Planning Authorities and neighbouring Parishes. This will include the additional traffic generation forecasts for the proposed new junction 24 onto the A12 as well as from the growth locations. With the northern growth location there is potential for a new road which would ultimately link the B1022 and B1023. The Tiptree Neighbourhood Plan will be expected to deliver the first phases of the road through a design which allows future completion/linkage.</p> <p>Following the Tiptree Neighbourhood Plan examination which concluded in October 2020, it was recommended that the Tiptree Neighbourhood Plan could not proceed to referendum. The Tiptree Neighbourhood Plan Working Group are will preparing a revised draft plan which will include site allocation(s) and be subject to further public consultation. The Plan is still at an early stage of development and evidence is still being gathered to support the allocation of sites in Tiptree and development of the document. The Plan will allocate final site boundaries and will include a policy framework to support the delivery of 400 houses up to 2033 and to guide all other planning issues in the village. The Neighbourhood Working Group will need to work closely with neighbouring Local Planning Authorities to ensure that all strategic cross boundary issues are properly considered and addressed</p>	Update to reflect latest position in relation to Tiptree Neighbourhood Plan.	<p>No change to findings: The proposed Main Modifications reduce the minimum number of dwellings from 600 to 400. The Tiptree Neighbourhood Plan will make the allocations, not the Local Plan.</p> <p>The proposed Main Modification also mandates the need for wintering bird surveys and mitigation, if required, for SPA birds.</p> <p>The proposed Main Modifications therefore strengthen the conclusions findings of the HRA.</p> <p>The proposed Main Modifications do not alter the overall conclusions of the HRA but the number of dwellings detailed in the HRA will be updated.</p>

Mod. Number	Policy / Para	Modifications: Bold new text Strikethrough deleted text	Reason	Implications for HRA findings previously reported
		through the Neighbourhood Plan. The Plan will be subject to examination and referendum prior to being made.		
MM70	New Para 14.222	Add the following new paragraph: Barbrook Lane Planning Permission has been granted for up to 200 dwellings at Barbrook Lane. It is expected that these dwellings will be delivered during the Plan Period. The extent of the application site is reflected on Policy Map SS14 as an existing commitment. Within the site area there will be provision for public open space as well as land reserved for future education purposes as shown on the policies map.	Update to reflect latest position in relation to consents granted.	
MM71	Policy SS14: Tiptree	Within the preferred directions of growth bread areas of growth shown on the Tiptree policies map, to the south west and north/north west, subject to existing constraints , the Tiptree Neighbourhood Plan will: (i) Define the extent of a new settlement boundary for Tiptree; (ii) Allocate specific sites for housing allocations to deliver a minimum 6400 dwellings;	Consistency of wording used in policy and policies map. Clarification that housing number specified is a minimum number in accordance with national policy Modifications to update in relation to the Tiptree Neighbourhood Plan, as explained in the Tiptree Topic Paper.	

Mod. Number	Policy / Para	Modifications: Bold new text Strikethrough deleted text	Reason	Implications for HRA findings previously reported
		<p>(iii) Set out any associated policies needed to support this housing delivery i.e. housing mix, type of housing and density for each site allocated for housing;</p> <p>(iv) Set out the policy framework within the parish to guide the delivery of any infrastructure/community facilities required to support the development in accordance with the requirements of Policies SG7 and PP1. This will include a detailed transport assessment with a view to confirming provision of the first phases of a road between the B1022 and B1023;</p> <p>(v) Consider strategic-cross boundary issues e.g. A12 junction improvements</p> <p>(vi) Identify other allocations in the Parish, including employment and open space.</p> <p>Proposals for development outside of the identified broad areas and the settlement boundary or settlement boundary defined by the Tiptree Neighbourhood Plan once adopted, for growth-will not be supported. This policy should be read in conjunction with the generic Neighbourhood Planning policy SG8, policy SG3 and policies in the Tiptree Neighbourhood Plan, once it has been adopted.</p> <p>Before granting planning consent, wintering bird surveys will be undertaken at the appropriate time of year to identify any offsite functional habitat. In the unlikely event that significant numbers are identified, development must firstly avoid impacts. Where this is not possible, development must be</p>	<p>Recommendation in HRA and agreed in SOCG with Natural England.</p>

		phased to deliver habitat creation and management either on or off-site to mitigate any significant impacts. Any such habitat must be provided and fully functional before any development takes place which would affect significant numbers of SPA birds		
MM72	Policy SS15: West Bergholt	Replace entire policy with the following: All development proposals in West Bergholt parish will be determined against and be required to comply with policies in the West Bergholt Neighbourhood Plan and any relevant Local Plan policies.	Correction to update the plan to reflect the adoption of the West Bergholt Neighbourhood Plan. New policy wording is consistent with the policy wording for the Boxted Neighbourhood Plan and other adopted neighbourhood plans.	No change to findings: Policy SS15 was assessed in the previous HRA of the Section 2 Local Plan. The entire policy has been replaced with new text but this will have no implications on the findings of the HRA.
MM73	Policy SS16: Wivenhoe	Replace entire policy with the following: The Wivenhoe Neighbourhood Plan has been made and: (i) Identifies the settlement boundary for Wivenhoe; (ii) Identifies specific sites for housing allocations needed to deliver 250 dwellings with additional land for a care home outside the settlement boundary at the housing allocation at Land Behind the Fire Station, Colchester Road should an appropriate scheme be forthcoming;	Correction to update the plan to reflect the adoption of the Wivenhoe Neighbourhood Plan. Amended wording agreed between Council and Third Party following EIP Hearing	No change to findings: Policy SS16 was assessed in the previous HRA. The entire policy has been replaced with new text but this will have no implications on the findings of the HRA.

Mod. Number	Policy / Para	Modifications: Bold new text Strikethrough deleted text	Reason	Implications for HRA findings previously reported
		<p>(iii) Sets out policies needed to support this housing delivery i.e. housing mix, type of housing and density for each site allocated for housing;</p> <p>(iv) Identifies other allocations in the Parish, including employment and open space; and</p> <p>(iv) identifies the infrastructure requirements to support new development.</p> <p>Proposals for development outside of the settlement boundary will not be supported unless the Neighbourhood Plan or other Local Plan policy specifically allows for it.</p> <p>All development proposals in Wivenhoe parish will be determined against and be required to comply with policies in the Wivenhoe Neighbourhood Plan and any relevant Local Plan policies.</p>		
MM74	Para 14.246/Policies OV1: Development in Other Villages & OV2: Countryside	Move the following text from para 14.246 to Policy OV1 & OV2: Proposals in close proximity to a habitats site must demonstrate through HRA screening that the scheme will not lead to likely significant effects to the integrity of the habitats site. Where this cannot be ruled out a full appropriate assessment will be required to be undertaken.	Representation from Natural England & SCG1.	No change to findings: The proposed Main Modification requires proposals in rural villages and rural areas that are within close proximity to a habitat site to undertake HRA to ensure significant adverse effects on the integrity of the site do not take place.

Mod. Number	Policy / Para	Modifications: Bold new text Strikethrough deleted text	Reason	Implications for HRA findings previously reported
				The proposed Main Modifications therefore strengthen the conclusions findings of the HRA.
MM75	Policy OV2: Countryside	<p>Residential development proposals in the countryside, outside defined settlement boundaries, will need to demonstrate that the scheme respects the character and appearance of landscapes and the built environment and preserves or enhances the historic environment and biodiversity. be restricted to small scale rural exception sites needed to meet local affordable housing needs. Schemes will only be considered favourably on appropriate sites provided a local need is demonstrated by the Parish Council on behalf of their residents, based on evidence gained from an approved local housing needs survey where they are supported by a Local Housing Needs Assessment. Where there is an identified need for certain types of housing, schemes must demonstrate how these needs have been met. Proposals should be supported by the relevant Parish Council.</p> <p>Proposals in close proximity to a habitats site must demonstrate through HRA screening that the scheme will not lead to likely significant effects to the integrity of the habitats site. Where this cannot be ruled out a full appropriate assessment will be required to be undertaken.</p>	<p>Updated to better align with national view of rural residential development.</p> <p>Clarification and consistency matter raised at the EIP Hearings regarding reference to Parish Council support. (Consistent with DM8)</p> <p>Representation from Natural England & SCG1.</p>	<p>No change to findings: The proposed Main Modification requires proposals in rural villages and rural areas that are within close proximity to a habitat site to undertake HRA to ensure significant adverse effects on the integrity of the site do not take place.</p> <p>The proposed Main Modifications therefore strengthen the conclusions findings of the HRA.</p>
MM76	Policy DM1: Health and Wellbeing	All development should be designed to promote healthy and active	To provide further clarification as requested in representations from Sport England and Essex Bridleways Association.	No change to findings: likely significant effects from this policy were screened out during the previous HRA as the policy does not propose any development.

Appendix E
Review of Main Modifications

Habitat Regulations Assessment
September 2021

		lifestyles and avoid causing adverse impacts on public health through: (i) Ensuring good access to health facilities and services; (ii) Providing a healthy living environment where healthy lifestyles can be promoted including green space and creating attractive opportunities for activities including walking, and cycling, horse riding and formal sport, as well as clearly seeking to improve opportunities to increase levels of physical activity within the community		The Main Modification does not alter this screening decision.
MM77	Policy DM2: Community Facilities	Add the words " (in both cases) " after 'and' at the end of criteria (ii). Add new criteria (iv) as follows: The proposal involves a state funded school which is seeking to relocate into new buildings or sell assets to fund improved education services.	To clarify that criteria (iii) applies to both criteria (i) and (ii). To ensure the policy is flexibly worded to enable school provision and to ensure consistency with DM3.	No change to findings: likely significant effects from this policy were screened out during the previous HRA as the policy will only result in small scale development that will not result in likely significant effect on European sites. The Main Modification does not alter this screening decision.
MM78	Policy DM3: Education Provision	Delete the first paragraph and replace with the following text, with the last paragraph remaining unchanged. Sites proposed for, or in current educational use, or which have ceased to be used for education in the recent past, will be	To enable school provision and to ensure consistency with Policy DM2.	No change to findings: likely significant effects from this policy were screened out during the previous HRA as the policy will only result in small scale development

Mod. Number	Policy / Para	Modifications: Bold new text Strikethrough deleted text	Reason	Implications for HRA findings previously reported
		<p>protected for that use. Where it is demonstrated that the educational use of the site is genuinely redundant the change of use, or re-development of educational establishments and their grounds, will be supported where:-</p> <p>i. No other alternative educational, or community use can be found;-</p> <p>ii. satisfactory alternative and improved facilities will be provided; and</p> <p>iii. The area of the site to be redeveloped is genuinely in excess of government guidelines for playing field provision, taking into account future educational projections.-</p> <p>Sites that are in private or public education use or have recently ceased to be used for education purposes will be protected for that use.</p> <p>Where in whole or in part educational use of a site is redundant or proposals for alternative use are put forward, re-development of buildings and/or the grounds will be supported where the local community is and will remain adequately served by alternative provision and receipts from the le of the land will be invested in improved or expanded education facilities.</p>		<p>that will not result in likely significant effect on European sites.</p> <p>The Main Modification does not alter this screening decision.</p>

Mod. Number	Policy / Para	Modifications: Bold new text Strikethrough deleted text	Reason	Implications for HRA findings previously reported
MM79	Policy DM4: Sports Provision	Amend the fourth paragraph of Policy DM4 as follows: The Local Planning Authority will seek to secure community use as part of all strategic sports proposals and as part of other smaller sport and leisure schemes submitted, including school sports facilities , where it is practical to do so.	To provide further clarification as requested in a representation from Sport England.	No change to findings: likely significant effects from this policy were screened out during the previous HRA as the policy will only result in small scale development that will not result in likely significant effect on European sites. The Main Modification does not alter this screening decision.
MM80	Policy DM5: Tourism, Leisure, Culture and Heritage	Amend the first paragraph as follows: ...will be supported in suitable locations subject to minimising impact on, and demonstrating how the development could make a positive contribution to neighbouring areas and provide biodiversity enhancements	To provide further clarification as requested in a representation from Historic England and as shown in SCG3.	No change to findings: likely significant effects from this policy were screened out during the previous HRA as the policy will only result in small scale development that will not result in likely significant effect on European sites. The Main Modification does not alter this screening decision.
MM81	Para 15.32 and Policy DM6: Economic Development to Rural Areas and the Countryside	Move text currently in paragraph 15.32 to the end of Policy DM6: Proposals in close proximity to a habitats site must demonstrate through HRA screening that the scheme will not lead to likely significant effects to the integrity of the habitats site. Additionally, any planning application within 400 metres of a habitats site must provide mechanisms to prevent fly tipping, the introduction of invasive species and vandalism.	To ensure protection of habitats sites as requested in Natural England's representation and as shown in SCG1.	No change to findings: The proposed Main Modification provides greater support for the protection and enhancement of habitats sites.

Mod. Number	Policy / Para	Modifications: Bold new text Strikethrough deleted text	Reason	Implications for HRA findings previously reported
		Where this cannot be ruled out a full appropriate assessment will be required to be undertaken.		The proposed Main Modifications therefore strengthen the conclusions findings of the HRA.
MM82	Policy DM6: Economic Development to Rural Areas and the Countryside	Amend Policy DM6 criteria (i) as follows; "Within allocated Local Economic Areas and on rural sites providing an economic function, the following uses are considered appropriate in principle; (i) Business (B4) Offices to carry out any operational or administrative functions- E(g)(i); Research and development of products or processes- E(g)(ii); Industrial processes- E(g)(iii) , general industrial (B2), storage and distribution (B8);	The Use Classes Order has been modified since submission of the CLP, specifically in relation to Class B1 which has been revoked. A modification is therefore considered necessary to the terminology used in Policy DM6. This reflects the fact that B2 and B8 uses are still considered appropriate within Local Economic Areas and on rural sites, but that the whole range of E class uses are not appropriate.	No change to findings: The proposed Main Modification to the wording of the policy and revision of the terminology to reflect the recent changes in the Use Class Orders will not alter the findings of the HRA.
MM83	Policy DM7: Agricultural Development and Diversification	Amend paragraph 3 in the policy to read: Proposals that are likely to have an adverse impact on the integrity of habitats European sites , Sites of Special Scientific Interest (SSSI) or the Dedham Vale AONB will not be supported.	To ensure protection of SSSIs as requested in Natural England's representation and as shown in SCG1.	No change to findings: The proposed Main Modification provides greater support for the protection and enhancement of habitats sites and SSSIs. The proposed Main Modifications therefore strengthen the conclusions findings of the HRA.

Mod. Number	Policy / Para	Modifications: Bold new text Strikethrough deleted text	Reason	Implications for HRA findings previously reported
MM84	Policy DM8: Affordable Housing	<p>Amend Policy DM8 as follows:</p> <p>Accordingly, 30% of new dwellings (including conversions) on housing developments of 10 or more more than 10 dwellings (major developments) Affordable housing development in villages will be supported on rural exception sites else adjacent or continuous to village settlement boundaries or where it will enhance or maintain the vitality of rural communities, provided a local need is demonstrated by the Parish Council on behalf of their residents, based on evidence gained from an approved local housing needs survey.</p>	To ensure consistency with the NPPF.	<p>No change to findings: likely significant effects from this policy were screened out during the previous HRA as the policy does not propose any development.</p> <p>The Main Modification does not alter this screening decision</p>
MM85	Para 15.49	<p>Add the following text to para 15.49 to read:</p> <p>These sites need to provide gypsy and traveller communities with good access to education, health, welfare, water, sewage and employment infrastructure, bearing in mind the need to have due regard to the protection of local amenity and local environment. Sites should not be located in areas at risk from flooding and where practical to achieve be connected to the mains sewer system.</p>	To ensure consistency with modification to Policy DM11 requested by the Environment Agency and shown in SCG2.	<p>No change to findings: likely significant effects from this policy were screened out during the previous HRA as the policy will only result in small scale development that will not result in likely significant effect on European sites.</p> <p>The Main Modification does not alter this screening decision.</p>
MM86	Policy DM11: Gypsies, Travellers, and Travelling Showpeople	<p>Add the two following paragraphs at the end of the existing policy wording:</p> <p>Planning permission will be refused for the change of use of all Gypsy and Traveller sites or Travelling Showpeople yards identified in the Gypsy and Traveller Accommodation Assessment unless acceptable replacement accommodation</p>	To retain allocations from Adopted Local Plan to ensure needs of G&T are continually met and the policy is NPPF compliant.	<p>No change to findings: likely significant effects from this policy were screened out during the previous HRA as the policy will only result in small scale development that will not result in likely significant effect on European sites.</p>

Mod. Number	Policy / Para	Modifications: Bold new text Strikethrough deleted text	Reason	Implications for HRA findings previously reported
		<p>can be provided, or it can be demonstrated that the site is no longer required to meet any identified needs.</p> <p>Site selection should ensure that pitches are not located within areas at risk of flooding and are capable of being provided with appropriate drainage, water supply and other necessary utility services. For sewerage, a connection to the main sewer system will be preferable except when it is impractical to achieve.</p>	<p>To provide further clarity as requested by the Environment Agency and shown in SCG2.</p>	<p>The Main Modification does not alter this screening decision.</p>
MM87	Policy DM12: Housing Standards	<p>Add the following new criterion:</p> <p>(x) All new applications for accommodation, with a top storey above 11m (about 4 storeys) in height, are required in accordance with Building Regulations to provide sprinkler systems. Consideration should also be given to the inclusion of sprinklers in houses in multiple accommodation (HMOs), care homes and sheltered accommodation.</p>	<p>CBC Corporate decision following Grenfell Fire.</p>	<p>No change to findings: likely significant effects from this policy were screened out during the previous HRA as the policy does not propose any development.</p> <p>The Main Modification does not alter this screening decision</p>
MM88	Policy DM13: Domestic Development	<p>Add the following text to Replacement dwellings in the countryside under criterion (v):</p> <p>Note: There is a presumption in favour of retaining properties considered to be heritage assets and/or properties which positively contribute to the character of a rural conservation area.</p>	<p>To provide further clarity as requested by Historic England and shown in SCG3.</p>	<p>No change to findings: likely significant effects from this policy were screened out during the previous HRA as the policy will only result in small scale development that will not result in likely significant effect on European sites.</p> <p>The Main Modification does not alter this screening decision.</p>

Mod. Number	Policy / Para	Modifications: Bold new text Strikethrough deleted text	Reason	Implications for HRA findings previously reported
MM89	Policy DM15: Design and Amenity	<p>Add the following criteria:</p> <p>(xi) Encourage Active Design.</p> <p>(xii) Provide a network of green infrastructure, open space and landscape as part of the design of the development to reflect the importance of these networks to biodiversity, climate change mitigation, healthy living and creating beautiful places.</p>	<p>To provide further clarity as requested by Sport England.</p> <p>To support recent and emerging government policy on climate change, healthy living and creating beautiful places.</p>	<p>No change to findings: likely significant effects from this policy were screened out during the previous HRA as the policy does not propose any development.</p> <p>The Main Modification does not alter this screening decision</p>
MM90	Policy DM16: Historic Environment	<p>Amend the first paragraph as follows:</p> <p>....Development that will lead to substantial harm to or total loss of significance of a listed building, conservation area, historic park or garden or important archaeological remains (including development that adversely affects in the setting of heritage assets)...</p> <p>Amend second paragraph as follows:</p> <p>...or better reveal the significance of the heritage asset, in the first instance, unless there are not identifiable opportunities available where possible.</p> <p>Amend penultimate sentence of paragraph two as follows:</p>	<p>To provide further clarity as requested by Historic England and shown in SCG3</p> <p>Clarify terminology. Section 1 wording has strengthened to provide Heritage Impact Assessment work to be completed to support plan-making</p>	<p>No change to findings: likely significant effects from this policy were screened out during the previous HRA as the policy does not propose any development.</p> <p>The Main Modification does not alter this screening decision</p>

Mod. Number	Policy / Para	Modifications: Bold new text Strikethrough deleted text	Reason	Implications for HRA findings previously reported
		<p>In instances where existing features have a negative impact on the historic environment, as identified through character appraisals, (or other method of identification of historic assets), the LPA</p> <p>Amend final sentence as follows:</p> <p>Heritage statements Impact Assessments and/or Archaeological Evaluations will be required for proposals related to or impacting on the setting of heritage assets and/or known or possible archaeological sites, and where there is potential for encountering archaeological sites so that sufficient information is provided to assess the significance of the heritage assets and to assess the impacts of development on historic assets together with any proposed mitigation measures</p>		
MM91	Policy DM22: Parking	<p>Change first paragraph to read: '.... the most recent local Parking Guidance-Standards taking account of.....'</p> <p>Change second paragraph to read: '.... with the most recent local Parking Guidance-Standards, with a more flexible approach</p> <p>Add new criteria (v):</p> <p>The need to ensure facilities are incorporated for electric and other ultra-low emission vehicles.</p>	<p>To provide further clarity as requested by Essex County Council.</p> <p>To clarify that an adequate provision of spaces for charging plug-in and other ultra-low emission vehicles is needed.</p>	<p>No change to findings: likely significant effects from this policy were screened out during the previous HRA as the policy does not propose any development.</p> <p>The Main Modification does not alter this screening decision</p>

Mod. Number	Policy / Para	Modifications: Bold new text Strikethrough deleted text	Reason	Implications for HRA findings previously reported
MM92	Para 15.133	<p>Add the following additional criteria for flood risk assessments in Flood Zone 1:</p> <p>Site specific Flood Risk Assessments must therefore be submitted with planning applications for development proposals on sites of 1 hectare (ha) or more in Flood Zone 1 or for all development proposals in Flood Zone 2 and 3 and in Flood Zone 1 for sites over 1 hectare (ha), land which has been identified by the Environment Agency as having critical drainage problems, land identified in a strategic flood risk assessment as being at increased flood risk in future, or land that may be subject to other sources of flooding, where its development would introduce a more vulnerable use.</p>	To ensure consistency with the NPPF.	No change to findings: this paragraph does not propose any development.
MM93	Policy DM23: Flood Risk and Water Management	<p>Amend criterion (ii) as follows:</p> <p>ii) All major development proposals are required to reduce post development run off rate back to the greenfield 1 in 1 year rate, with an allowance for climate change. On brownfield sites where this is not achievable, then a minimum betterment of 50% should be demonstrated for all food events. This approach accords with the NPPF/PPG and al the most up to date UKCIP guidance. All minor sites should limit discharge rates as much as practical while considering the increased risk of blockage associated with smaller outfall orifice sizing.</p>	To provide clarity in regard to the runoff rate sought as identified by Barton Willmore Hearing Statement	No change to findings: this paragraph does not propose any development.
MM94	Policy DM25: Renewable Energy, Water,	Amend the 4 th paragraph as follows:	To provide consistency across the region by using wording in the Anglian Water, Environment	No change to findings: The proposed Main Modification requires all District Heating Networks and community-led

Mod. Number	Policy / Para	Modifications: Bold new text Strikethrough deleted text	Reason	Implications for HRA findings previously reported
	Waste and Recycling	<p>To achieve greater water efficiencies, new residential developments will be required to meet the Building Regulation optional higher water efficiency standard of 110 litres per person per day, as set out in Building Regulations part G2 incorporate water saving measures in line with the tighter optional requirement of Part G2 of national Building Regulations of 440l/h/d.</p> <p>Amend the 6th paragraph as follows:</p> <p>.....District Heating Networks and Community led renewable energy initiatives at appropriate locations in the Borough, which will need to be subject to a Habitats Regulations Assessment and if necessary an Appropriate Assessment, to help reduce Colchester's carbon footprint.</p> <p>Amend 7th paragraph as follows:</p> <p>Renewable energy schemes with potential for adverse effects on internationally or nationally designated nature conservation sites, sites or nationally designated landscapes (Dedham Vale AONB) and heritage assets, will only be supported in exceptional circumstances...."</p> <p>Delete the final paragraph.</p>	<p>Agency and Natural England advice note.</p> <p>To provide further clarity as requested by Natural England and Historic England (Mod C only) as shown in SCG1 and SC3.</p> <p>Unnecessary to refer to National Policy Statement and guidance note.</p>	<p>renewable energy schemes to undertake HRA.</p> <p>The proposed Main Modifications therefore strengthen the conclusions findings of the HRA.</p>
