# 1. INTRODUCTION

Welcome to Colchester Borough Council's Infrastructure Funding Statement 2021/2022. Councils are now required to produce an Infrastructure Funding Statement (IFS) on an annual basis.

The Statement sets out income and expenditure relating to contributions secured through s106 Agreements on developments throughout Colchester. It is important to note that Colchester Borough Council is only responsible for some infrastructure, such as community facilities. This IFS does not therefore detail those contributions which relate to Essex County Council functions such as schools and transportation.

S.106 agreements are used to mitigate the impacts of development and ensure that Colchester Borough Council's planning policy requirements are fully met.

Planning obligations or 'developer contributions' are used to help fund:

- The provision of, or improvements to, open space provision, community facilities and affordable housing contributions accepted in lieu of on-site provision.
- Provision of on-site affordable housing; and
- Non-financial obligations, including requirements such as travel plans.

The information included in this statement will be updated annually and published on the Council's website. The statement does not include information on open space provision delivered on-site as part of new development in the Borough.

The data on contributions is imperfect as it represents estimates at a given point in time and can be subject to change. However, it is the most robust available at the time of publication.

Infrastructure Funding Statements are required to comply with regulations published by the Government and are only concerned with financial and non-financial obligations secured through S106 agreements. Financial developer contributions are always secured through S106 agreements but there are occasions where some non-financial obligations are secured through planning conditions. These obligations are not listed within this statement. This Statement only relates to S106 obligations for which Colchester Borough Council is legally responsible for ensuring compliance. The data in this IFS therefore does not cover S106 obligations applying to land in the Borough in the following cases:

- (A) Where the S106 obligation is given to Essex County Council and where the County Council are signatory to the legal agreement (e.g., education; highway works; sustainable transport; Public Rights of Way)
- (B) Where Essex County Council is the Local Planning Authority and is responsible for determining the application (e.g. mineral and waste applications)
- (C) Section 278 Highways works agreements between the developer and Essex County Council
- (D) Where Colchester Borough Council determined a planning application, but where Essex County Council is signatory of the S106 to the effect that it is directly responsible for compliance — this mainly relates to certain highway payments.

Therefore, this Infrastructure Funding Statement should be read in conjunction with the IFS produced by Essex County Council to obtain the complete picture of all financial and non-financial developer contributions originating from developments in Colchester. The Essex County Council IFS will be made available on their website: [Welcome to Essex County Council](#)

## 2. INFRASTRUCTURE FUNDING STATEMENT 2021/2022

### S106 Contributions Summary

For the financial year 2021/22 the Council received a total £2,312,037.65 in financial contributions with £1,361,479.38 spent across the Borough. The contributions received can be spent over a number of years and this enables the Council to plan ahead for the growth and future needs of the Borough and budget for larger scale, or more expensive, projects.

### **3. OUR PROCESSES**

#### **The Planning Application:**

S.106 Agreements are a mechanism that makes a development proposal, that would not otherwise be, acceptable in planning terms.

The tests for when a S.106 Agreement can be used, are:

- a) necessary to make the development acceptable in planning terms
- b) directly related to the development; and
- c) fairly and reasonably related in scale and kind to the development.

Once signed, the S.106 Agreement is binding on successive owners of the land.

### **The Obligations:**

Details of the obligations, and the point at which they become due, are detailed within the Agreement. This may, for example, be on commencement of development or after a certain number, or percentage, of properties are built or sold.

### **Collection of Monies Due:**

Where the obligation is financial, the amount due will be calculated and the developer invoiced at appropriate times. The sum due is index linked and given a specific budget code to allow us to monitor spend and balance.

### **Requests to Spend:**

Many S.106 Agreements contain specific covenants that detail where the monies must be spent or provision of housing, located.

For open space, sport, leisure and community facilities monies, it is important that up to date, local information is used to inform spend. This can be provided by Town & Parish Councils as well as ward Councillors. S.106 contributions may be used for the provision or upgrade of open space, play areas and community facilities in accordance with Council policy.

Once a payment has been made, the financial database is updated to show the amount now available to spend.

The S.106 financial report is available by following this link [S.106 Financial Report](#)

## **4. MONITORING FEES**

The Community Infrastructure Levy (Amendment)(England)(No.2) Regulations 2019 allow Local Authorities to charge a monitoring fee through section 106 agreements, to cover the cost of the monitoring and reporting on delivery of the section 106 obligations it contains. Monitoring fees can be used to monitor and report on any type of planning obligation, for the lifetime of that obligation. The regulations allow monitoring fees to be either a fixed percentage of the total value of the section 106 agreement or individual obligation; or could be a fixed monetary amount. Monitoring fees must be proportionate and reasonable and reflect the actual cost of monitoring and authorities are required to report on monitoring fees in their Infrastructure Funding Statements. Colchester Borough Council set monitoring fees at £400 per trigger for financial contribution clauses and £570 for all other clauses per trigger.

£54,955 was received in monitoring fees during the period 2021/22.

## 12. RECREATIONAL DISTURBANCE AVOIDANCE MITIGATION STRATEGY (RAMS)

The Essex coast Recreational disturbance Avoidance and Mitigation Strategy (the 'Essex coast RAMS') aims to deliver the mitigation necessary to avoid significant adverse effects from 'in-combination' impacts of residential development that is anticipated across Essex; thus protecting the Habitats (European) sites on the Essex coast from adverse effect on site integrity.

The whole of Colchester Borough is within the Zone of Influence. All residential proposals within the borough should make a contribution towards the measures in the RAMS to avoid and mitigate adverse effects from increased recreational disturbance to ensure that Habitat Sites are not adversely affected, and the proposal complies with the Habitat Regulations.

Bird Aware Essex Coast is a tool being used to lessen potential impacts from increased local housing development. The initiative is run by the Essex Coast Recreational disturbance Avoidance and Mitigation Partnership (Essex Coast RAMS). This is made up of twelve local councils, Essex County Council and Natural England, and funded by contributions from all new residential dwellings within the Zones of Influence via S106 agreements.

The planned mitigation measures are set out in the Essex Coast Recreational disturbance Avoidance and Mitigation Strategy (Essex Coast RAMS). The mitigation measures include a team of rangers to help coastal visitors and communities understand the importance of the different bird species and the impact of disturbance. Additional work will take place to encourage responsible dog walking and visits to less sensitive parts of the coast. Mitigation measures will also include new habitat creation.
